BEFORE YOU BEGIN

This handbook belongs to...

MY NAME

CLASS / YEAR

SCHOOL OR COLLEGE

DATE I TOOK THE ASSESSMENT

MY PERSONALITY TYPE

MY INTEREST CODE

MY TOP CAREER FIELD

How to use this book

You do not need to read it cover to cover. Each part has its own colour, so you can find your way by the edge of the page.

- **Part 1 · Meet OneGrasp**
  Who we are and why this matters
- **Part 2 · The Assessment**
  Read before you take the test
- **Part 3 · The 8 Dimensions**
  What each part of you means
- **Part 4 · Your Report**
  Read with your report open
- **Part 5 · Your Dashboard**
  Keep next to your screen
- **Part 6 · Startups & Funding**
  311 programmes to fund an idea
- **Part 7 · Research & Conferences**
  Present your work to the world
- **Part 8 · Parents & Schools**
  How the adults can help

Look out for these boxes

IN SIMPLE WORDS
The idea explained the way a friend would.

EXAMPLE
A real situation that shows how it works.

ANANYA'S STORY
Follow Ananya, a sample Class 11 student, through her real report.

TRY THIS
A small action you can do this week.

FOR PARENTS
Advice for mothers, fathers and guardians.

WATCH OUT
Mistakes and scams to avoid.

Every child is good at something.

> *Most career decisions are made on marks, peer pressure or guesswork. OneGrasp replaces guesswork with self-knowledge and a clear, honest plan the whole family can see.*
>
> **The OneGrasp Team**

Dear student, parent and teacher,

A career is rarely one decision. It is a chain of them: which subjects to take, which stream, which entrance exam, which degree, which college, which first job. Each choice shapes the next. When the first link is chosen on marks alone, or because a cousin did the same course, the whole chain can pull in the wrong direction.

The Career Fitment Assessment starts with **you**: how you think, what you enjoy, how you learn, what drives you and what you are naturally good at. It then connects that picture to **real** careers, exams, colleges and money (scholarships, funding and salaries), so the next step is clear.

A OneGrasp session: "Which career fits me?"

After the report, the real work begins. Your dashboard turns the report into lessons, tools and weekly tasks, and this handbook walks you through every one of them, page by page.

Read it slowly. Read it together. Come back to it whenever a big decision arrives.

With warm wishes,

The OneGrasp Team

OneGrasp Education Pvt. Ltd., Hyderabad

Start in three steps

STEP 1

Scan or visit

careerfitment.onegrasp.com on any phone, tablet or laptop.

STEP 2

Register in 2 minutes

Sign up yourself, or join through your school or college link.

STEP 3

Take the test

Answer honestly. Your report is ready the moment you finish.

ABOUT US

What is OneGrasp?

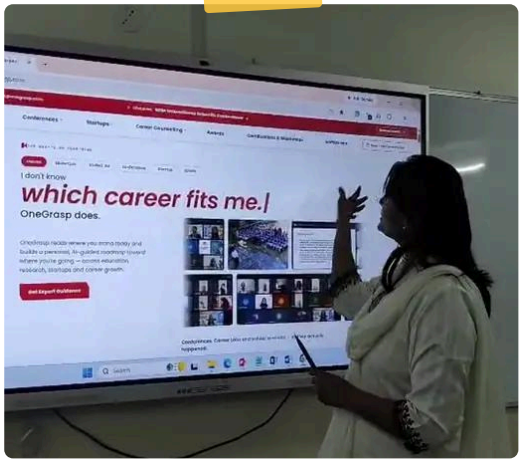
OneGrasp Education Pvt. Ltd. is an education company based in Hyderabad, India. We help students, families, professionals and institutions make better decisions about learning and work.

IN SIMPLE WORDS

OneGrasp is like a **GPS for your career**. First it finds where you are today (your strengths, interests and personality). Then it shows the roads that suit you, and finally it gives you turn-by-turn directions: subjects, exams, colleges, skills, money and jobs.

Our best-known product is the **Career Fitment Assessment**: a psychometric career assessment for students from Class 6 to undergraduates. It measures eight dimensions of a student and turns them into a personal report and a dashboard of more than twenty tools.

Around the assessment, OneGrasp runs international scientific conferences, startup and entrepreneurship programmes, certifications, workshops and internships, one-to-one career counselling, and admissions guidance for India and abroad.



Career guidance in a partner school

4
editions, Class 6 to UG

8
dimensions

20+
dashboard tools

100%
facts linked to sources

Our belief

Every student is good at something. A career assessment should never label a child. It should show where they will thrive, what to try next, and how to get there with honest facts about exams, colleges, costs and jobs.

What makes OneGrasp different

Built on science

Well-known frameworks: personality type, Holland's RIASEC interests, Gardner's intelligences, emotional intelligence and reasoning aptitude.

Written for each age

Class 6–8, Class 9–10, Class 11–12 and undergraduates each get questions and a report made for their stage.

A plan, not just a PDF

The report opens a dashboard of lessons, tools and weekly tasks, so it never sits in a drawer.

Facts you can check

Every exam, scholarship and funding programme links to its official source.

OUR WORK

One company, many ways to help.

Most families meet OneGrasp through the Career Fitment Assessment. Behind it is a whole ecosystem built to support a student from Class 6 to their first job.

Career Fitment Assessment
Class 6 to UG; instant report and dashboard

Career counselling
One-to-one sessions with students and parents

Admissions guidance
Colleges and courses in India and abroad

Scientific conferences
Online, peer-reviewed, DOI-indexed, 11 disciplines

OneGrasp™

One login.
One partner.
Every step.

Startup programmes
Spot, Build, Pitch with universities

Certifications & internships
Hands-on learning with verifiable certificates

Faculty development
Programmes for teachers on campus or online

Spotlight boosters
Publish, ISBN, ISSN and Awardees Magazine

EXAMPLE

A Class 11 student takes the assessment in her school's computer lab. Her report says Computer Science fits her best. She uses the dashboard to plan for JEE Main, finds two scholarships, joins a free coding internship, and later presents a small research project at a OneGrasp student conference. **One partner, every step.**

For institutions: Schools and colleges can run the assessment on campus: an orientation, the test in the computer lab, and a personal report for every student. The Institution Portal then tracks every student daily.

WHY IT MATTERS

Three traps that decide too many careers.

Ask ten adults why they chose their career and many will say “I didn't really choose.” These are the three most common traps.

TRAP 1
Marks

“You scored 95 in maths, so take engineering.”

Marks show how you did in an exam. They do not show what you enjoy, how you work, or what you will want to do for 30 years.

TRAP 2
Peer pressure

“All my friends are taking MPC.”

Your friends have different strengths and dreams. Following the crowd feels safe today and costly later.

TRAP 3
Guesswork

“My cousin did B.Com, so...”

Most families know only a handful of careers. With 930 careers in our library, guessing means missing most of your options.

What a better decision looks like

Old way	OneGrasp way
Choose by marks	Choose by fit: interests + strengths + aptitude
Follow friends	Follow your own profile
Know 5 careers	Explore 930 careers
Decide once, alone	Decide in steps, as a family
Hope it works	Test it first: Test-Drive, internships, projects

IN SIMPLE WORDS

A good career fit is where three circles overlap: **what you enjoy** (interests), **what you are good at** (strengths and aptitude) and **what the world needs and pays for** (real careers). The assessment finds the first two; the dashboard shows you the third.

FOR PARENTS

Your experience matters, and so does your child's profile. Use the report as a shared, neutral starting point for the conversation.

CLEARING THE AIR

Myth or fact?

Eight things students and parents often believe, and what is actually true.

✕ MYTH	✓ FACT
"JEE or NEET decides everything."	Our library covers 930 careers. Many great routes need neither exam.
"Marks are enough to choose a career."	Marks show how you did. Fit shows where you will do well.
"It's too late to change direction."	Many degrees accept any stream. Your report shows which ones.
"My degree decides my career."	Many roles hire from more than one degree. Your report shows which fit you.
"CGPA is all that matters."	CGPA shows how you did. Skills and proof show what you can do.
"Only toppers need career guidance."	Every student benefits from knowing their strengths and options.
"A test tells you one fixed career."	It shows best-fit fields and a plan to test them in real life.
"It's an exam you can fail."	There are no good or bad results, only better fits.

GOOD TO KNOW

Career guidance is not about predicting the future. It is about making the next decision with better information than you had yesterday.

THE NEXT DECADE

The world of work is changing fast.

AI is taking over routine tasks. The World Economic Forum's *Future of Jobs Report 2025* shows which skills and jobs are rising, and which are fading.

Skills employers want most

Relative importance, illustrative. Source: WEF, Future of Jobs Report 2025. None of these skills shows on a mark sheet.

Fading or automating

- Cashiers and ticket clerks
- Administrative assistants and secretaries
- Postal service clerks
- Bank tellers and routine banking clerks
- Data entry and manual bookkeeping
- Scripted telemarketing and call-centre work
- Repetitive assembly-line and sorting work
- Generic content writing without expertise

Rising and future-proof

AI & Machine Learning
The biggest skill multiplier of the decade.

Big Data & Analytics
One of the fastest-growing job groups worldwide.

Cybersecurity
Protecting systems and data: a permanent, growing need.

Green & Climate Tech
Renewables, EVs and sustainability engineering.

Healthcare & Biotech
Ageing populations and genomics keep demand rising.

Fintech
Digital payments and banking technology.

Robotics & Automation
Designing machines that automate physical work.

Creative × Tech
UX, product, content and design.

Care Economy
Health support, elder care, community health.

EdTech & Education
Teaching and training remain in steady demand.

IN SIMPLE WORDS

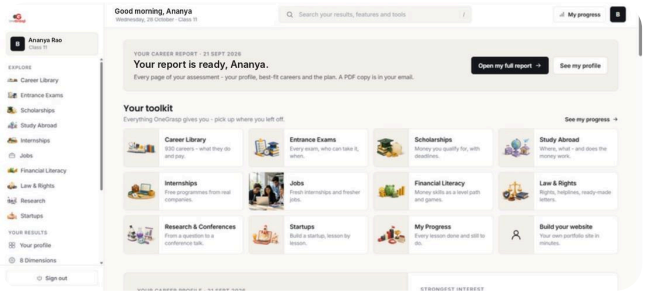
Jobs that mix **human judgement** with **technology** are the safest. That is why the assessment measures how you think, learn, feel and relate to people, not just what you know.

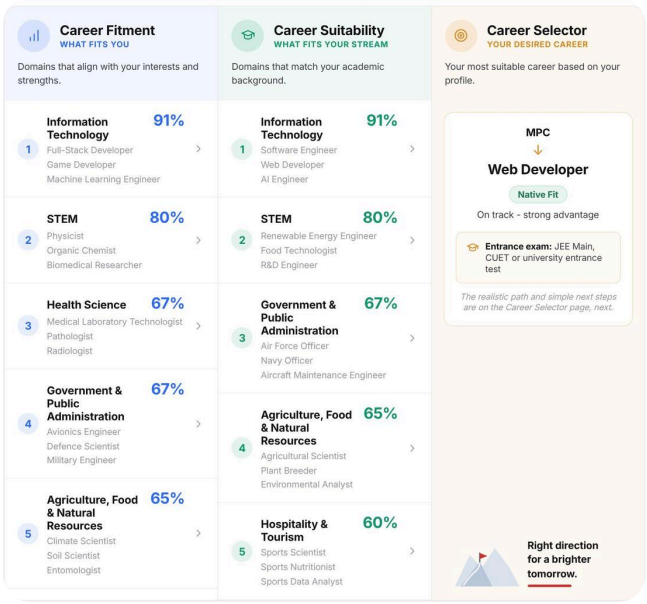
THE JOURNEY

From “I don't know” to a clear plan.

Five stages take a student from the first click to real progress. Each part of this handbook covers one of them.

1. **Register (about 2 minutes)**
   Choose your class, say how sure you are about your career, and create your login. School students can join through their school's link. (Part 2)
2. **Take the assessment (up to 90 minutes)**
   Questions across the 8 dimensions, written for your age. Answers save as you go, and a timer shows the time left. (Parts 2 and 3)
3. **Read your report (instant)**
   Your profile, best-fit careers with a fit %, strengths and growth areas, and a long-term roadmap. Download the PDF; a copy is emailed. (Part 4)
4. **Use your dashboard (every week)**
   One login opens 20+ tools: careers, exams, scholarships, study abroad, internships, jobs, money, law, research, startups, AI and more. (Part 5)
5. **Act and grow (all year)**
   Weekly Career GPS missions, lessons that unlock step by step, certificates, a portfolio website and a verified Career Passport. (Parts 5 to 7)





ON CAMPUS

How an assessment day runs in a school.

When a school or college partners with OneGrasp, our team runs the whole day with the students. Here is what happens, start to finish.

1 · Orientation in the hall

2 · The assessment in the lab

3 · One-to-one report reading

1. **Orientation on campus (30–45 minutes)**
   Our team meets the students, explains what the assessment is and is not, and answers questions. Students learn that honest answers give the most useful report.
2. **Assessment in the computer lab (up to 90 minutes)**
   Students take the test online on the school's computers, one question at a time, with a timer and a navigator. Answers save as they go.
3. **Instant personal reports**
   Every student receives their own Career Fitment Report the moment they finish: on screen, as a PDF and by email.
4. **One-to-one sessions**
   Counsellors sit with students (and parents where possible) to read the report together and agree the first steps.
5. **Daily tracking afterwards**
   The Institution Portal shows who has finished, who is active in the dashboard, and who needs a reminder.

Bring OneGrasp to your school: Call +91 89777 60442 / 43 or write to support@onegrasp.com to plan a campus-wide rollout.

CAREER FITMENT HANDBOOK

02

PART 02

The Assessment

What the Career Fitment Assessment is, who it is for, the science behind it, and exactly how to take it, screen by screen.

IN THIS PART

01 What is a psychometric assessment?

02 Four editions for four stages

03 The science behind every question

04 What happens in the 90 minutes

05 Before you begin

06 Registering, step by step

07 Inside the exam screen

08 Six kinds of questions

09 Built to be trusted

10 After you finish

THE TEST

Is it just another exam?

No. A psychometric career assessment is a structured set of questions that looks beyond marks to understand how you think, what interests you, and where your natural strengths lie.

IN SIMPLE WORDS

Psycho means mind and **metric** means measure. A psychometric assessment measures parts of your mind that an exam does not: your preferences, interests, feelings and ways of thinking. Think of it as a **mirror**, not a **marksheet**.

The OneGrasp Career Fitment Assessment asks short, everyday questions: what would you do in this situation, what do you enjoy, how do you like to learn. It reads your answers through well-established psychology frameworks and turns them into a picture of you.

That picture is then matched against hundreds of careers, so the report can say which fields fit you best, and why.

EXAMPLE

Two students both score 90% in Class 10. One loves taking machines apart and solving puzzles alone; the other loves debating and organising school events. Same marks, very different best-fit careers. Marks could not tell them apart. The assessment can.

Mirror, not marksheet

A school exam	This assessment
Tests what you studied	Explores who you are
Right or wrong answers	Mostly no right answers
Gives a mark	Gives a profile
You can fail	You can't fail
Same for everyone	Written for your age
Ends with a result	Starts a plan

GOOD TO KNOW

Only the **Aptitude** section has right answers, like a reasoning test. Everything else is about you, so the only wrong answer is a dishonest one.

What you get back

Your profile
Your results across 8 dimensions on one page.

Best-fit careers
Top career areas, each with a fit %.

A roadmap
Subjects, exams, degrees, skills and jobs, step by step.

A dashboard
20+ tools to act on it, all year.

WHO IT IS FOR

One assessment, four editions.

A Class 7 student and a final-year engineering student face very different decisions. So each class group takes a test written for its own age, and gets a report built for its own next step.

CLASS 6–8 Career Discovery

"What am I like, and what could I enjoy?"

About 60 question

Career DNA, top 5 of 15 domains, a 20-year picture

CLASS 9–10 Stream Selection

"Which stream after Class 10?"

About 60 question

Best-fit domains, stream guidance, your choice vs your result

CLASS 11–12 Career Planning

"Which exam, degree and college?"

75 questions

Fitment, Suitability and Career Selector; a 15-step roadmap

UNDERGRADUATES Employability Readiness

"What job, what skills, PG or work?"

100 questions

17 career clusters, skill gap, 2026–2046 career horizon

Every edition allows up to 90 minutes. Question counts can change slightly as the question banks are updated.

Which one should I take?

If you are...	Take
In Class 6, 7 or 8	Career Discovery
In Class 9 or 10	Stream Selection
In Class 11 or 12	Career Planning
In any year of a degree	Employability Readiness
Working already	The professional wellbeing check

IN SIMPLE WORDS

You don't have to choose. When you register you pick your class, and the right edition opens automatically.

TRY THIS

Take it again when you move up a stage, for example in Class 8, Class 10 and Class 12. Watching your profile grow is part of the journey.

THE SCIENCE

Built on frameworks psychologists trust.

Every dimension is read through a model that has been studied and used for decades. Here is what sits behind each part of your report.

01 Personality
Personality-type preferences (MBTI-style): introvert–extravert, sensing–intuition, thinking–feeling, judging–perceiving. Some stages use the Big Five traits.
Carl Jung's types; Myers & Briggs

02 Career Interests
Holland's RIASEC model: Realistic, Investigative, Artistic, Social, Enterprising, Conventional.
John L. Holland, 1959

03 Multiple Intelligences
Eight ways of being smart: linguistic, logical, spatial, bodily, musical, interpersonal, intrapersonal, naturalistic.
Howard Gardner, 1983

04 Emotional Intelligence
Self-awareness, self-management, social awareness and relationship management.
Salovey & Mayer; Goleman

05 Learning Style
Preferences for seeing, hearing, reading/writing and doing.
VARK-style preference models

06 Motivators
Work values: achievement, learning, mastery, security, leadership, social impact, autonomy, creativity.
Work-values research

07 Strengths
Eight strength domains, using forced-choice situations.
Strengths-based psychology

08 Aptitude
Verbal, numerical, abstract, spatial and logical reasoning, plus data.
Standard reasoning tests

IN SIMPLE WORDS

A **framework** is a well-tested way of describing people. It means the same answers always give the same result, and every result can be explained in plain words.

GOOD TO KNOW

Class 11–12 adds **subject fit**, **career and stream fit** and your **career aspiration**. Undergraduates take eight career-readiness areas instead (page 46).

INSIDE THE TEST

What happens in the 90 minutes?

Here is exactly how the Class 11–12 edition (75 questions) is divided. The other editions follow the same idea with their own sections.

Aptitude	12
Interests	10
Strengths	9
Personality	7
Intelligences	7
Subjects	7
Career fit	7
Motivators	6
Emotional	4
Learning	3
Careers	3

IN SIMPLE WORDS

Aptitude has the most questions because it is the only part with right answers; more questions give a fairer score.

A realistic timeline

0–5 min	5–30 min	30–60 min	60–80 min	80–90
Read the instructions	Personality, interests, intelligences	Aptitude: take your time	Strengths, motivators, learning, emotions	Review

Most students finish well before the 90 minutes. The timer is a limit, not a target.

Every section, in one line

Section	What it asks you	Right answers?
Personality	How you usually act in situations	No
Interests	Which activities appeal to you	No
Aptitude	Reasoning puzzles with words, numbers, shapes	Yes
Strengths / Intelligences	What you'd naturally do or enjoy	No
Motivators / Learning / Emotional	What drives you, how you learn, how you react	No
Subjects / Career fit / Careers	Your stream, subjects and goals	No, it's information

PREPARE

Before you begin.

No studying is needed. A calm hour and an honest mind are all it takes. Use this page the day before.

Your checklist

- [ ] A laptop (easiest), tablet or phone, charged
- [ ] A stable internet connection
- [ ] Up to 90 minutes in a quiet place, in one sitting
- [ ] Your login email and password, or your school's link
- [ ] Class 11–12: your stream and the career you're aiming for
- [ ] Undergraduates: your degree, specialisation and year
- [ ] Headphones, if you want questions read aloud
- [ ] Water, and notifications switched off

Answer as you really are, not as you think you should be.

There are no good or bad results, only better fits. If you answer the way a parent, teacher or friend would like, the report will describe them, not you.

If two options both feel true, pick the one that is true **more often**.

Good habits during the test

Trust your first reaction
Your first honest answer is usually the most accurate. Don't overthink.

Skip, then return
Not sure? Tap Next and come back using the navigator.

Focus on aptitude
It's the only part with right answers. Read each question fully.

Take a break if needed
Tap Save Progress. You'll resume with the same questions and time.

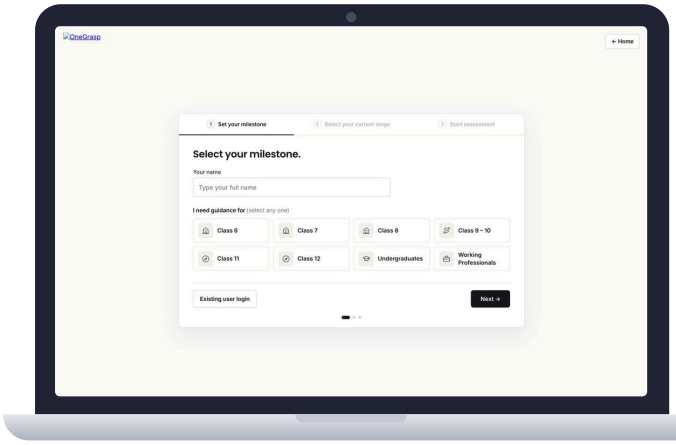
FOR PARENTS
Please let your child answer alone. Sitting beside them changes their answers. You'll read the report together afterwards (Part 8).

FOR TEACHERS
Run the test in a calm lab session. Remind students there are no marks and no ranking: that single sentence improves honesty.

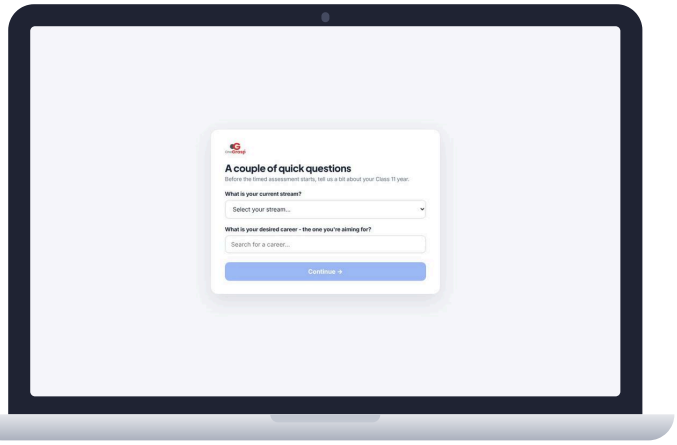
GETTING IN

Registering, step by step.

Registration takes about two minutes. Students can sign up themselves, or join through their school or college link so the institution can follow their progress.



Step 1. Enter your name and pick your class or stage.



Step 4. Class 11–12: your stream and dream career.

STEP 1

Set your milestone

Go to careerfitment.onegrasp.com, enter your name and pick your class: 6, 7, 8, 9–10, 11, 12, Undergraduate or Working Professional.

STEP 2

Set your stage

Say how sure you are today: no idea · confused · a bit sure · sure but need a plan.

STEP 3

Create your login

Your email and password are your login for your report and dashboard.

STEP 4

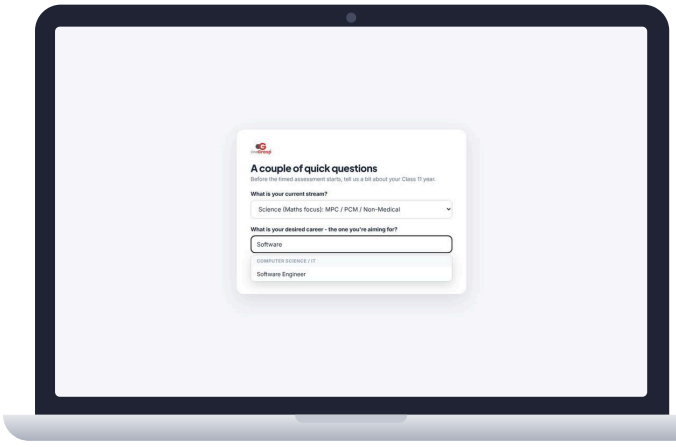
Quick questions

Class 11–12 pick their stream and dream career; undergraduates pick their degree. These tailor your report.

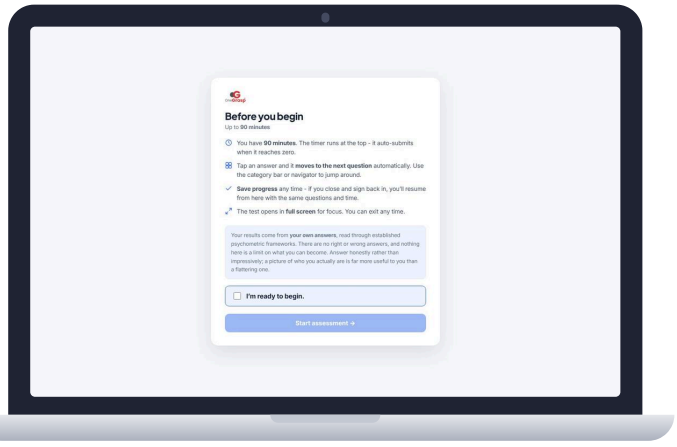
STEP 5

Start

Read "Before you begin", tick the box and start. The test opens in full screen.



Start typing a career and pick it from the list.

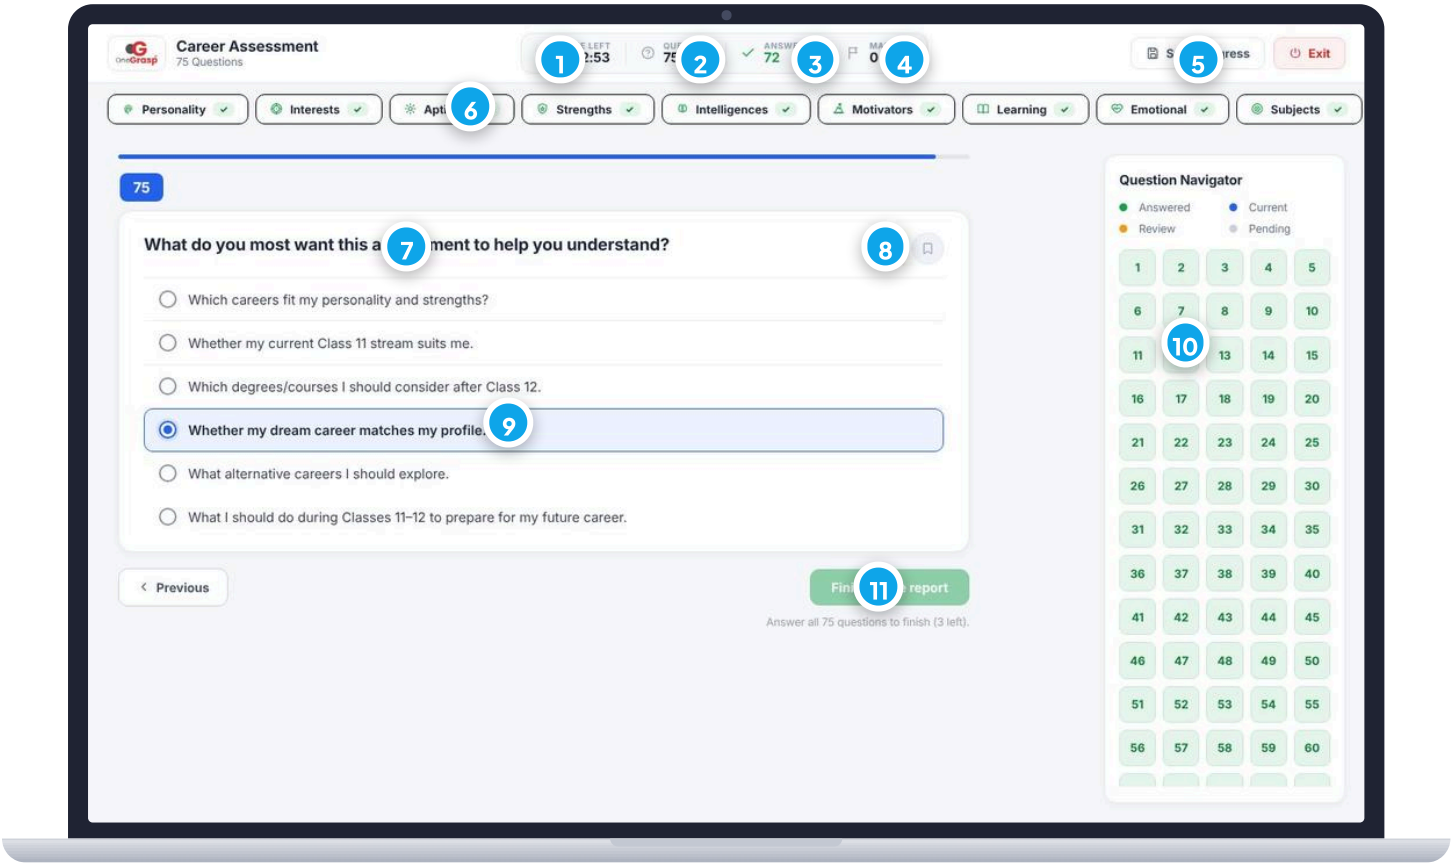


Step 5. Read the instructions, then start.

THE EXAM SCREEN

Everything on one screen.

The exam shows one question at a time. Everything you need stays in view. Match the numbers on the screen to the list below.



1 Time left
A 90-minute timer; it auto-submits at zero.

2 Question
Which question you're on, out of the total.

3 Answered
How many you've done.

4 Marked
Questions you flagged to review.

5 Save / Exit
Save and come back later with the same questions and time.

6 Section bar
Jump between dimensions; a tick means done.

7 The question
One question at a time, in plain words.

8 Read aloud
Hear the question read out.

9 Options
Tap one; it saves instantly.

10 Navigator
Green answered · blue current · amber review · grey pending.

11 Finish
Opens when every question is answered.

IN SIMPLE WORDS

You cannot get lost: the navigator on the right always shows which questions are still grey. Tap a grey tile, answer it, and the **Finish & see report** button turns green.

QUESTION TYPES

Six kinds of questions.

Most questions take a few seconds. Here is what each type looks like on screen, and how to answer it well.

Situation · most like me

You get a difficult problem with no standard method. What do you do first?

- ○ Think independently
- ◉ Find similar examples
- ○ Discuss with others

Pick the one that sounds most like you, not what you'd ideally do.

Scale · 1 to 10

How comfortable are you making a big decision on your own?

1 2 3 4 5 6 **7** 8 9 10

Use the whole scale. 5 is not a "safe" answer.

Pick up to three

Which areas are you considering?

Engineering × Computer Science × Design ×

Add another... ▾

Search the list; tap × to remove a pick.

Dropdown

Which subject do you enjoy the most?

Physics ▾

Choose honestly. It shapes your subject advice.

Aptitude · one best answer

2, 6, 12, 20, 30, ?

- ○ 40
- ◉ 42
- ○ 44

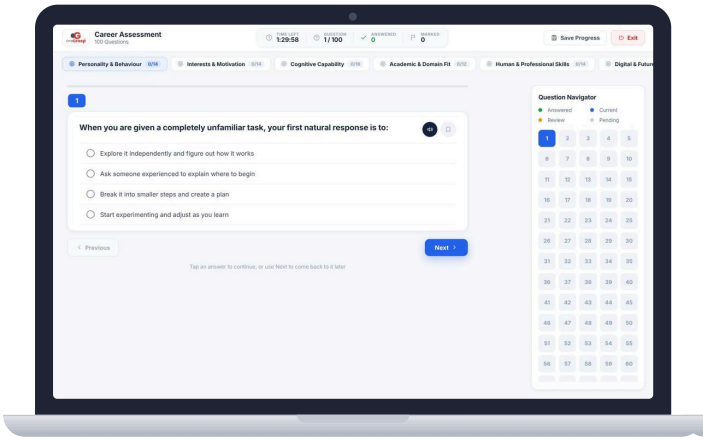
Read fully; skip and come back if stuck. (Answer: 42, the gaps grow by 2.)

Yes / No

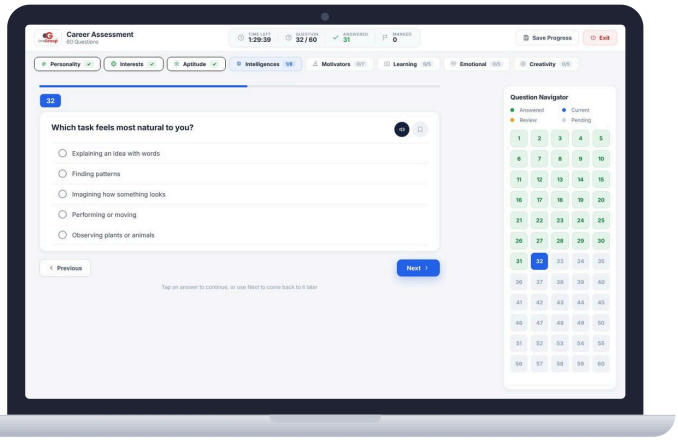
Have you done an internship or project in your field?

- ◉ Yes
- ○ No

Answer for today, not for next year.



The undergraduate edition: question 1 of 100.



Class 11–12: answers save as soon as you tap.

TRUST

Built to be trusted.

A report is only useful if it really describes the student. Three safeguards protect every result.

Answer-quality check

When you submit, the test looks at how the paper was answered: how many answers came in under 3 seconds, and whether the same option was picked again and again. It never changes your scores. It only flags a report that may not reflect you (high, medium or low trust), so a rushed test can be retaken.

Your answers stay private

Your report belongs to you. If you joined through a school, the school sees your progress and activity, never your individual answers.

Facts linked to sources

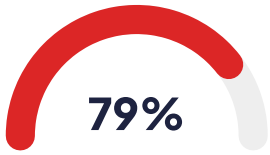
Exams, scholarships, funded routes and funding programmes link to their official websites, so anyone can check them.

What a rushed test looks like

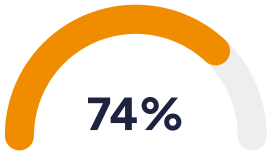
EXAMPLE

To show you the quality check, we raced through a sample test in about **9 minutes**, tapping answers in under 3 seconds. The system noticed straight away and marked the report **low trust**, with the exact reasons below.

Check	Our rushed sample	A thoughtful test
Time taken	9 min	40–80 min
Answers under 3 seconds	79%	Under 15%
Same answer repeated	74%	Under 30%
Longest identical run	42 in a row	3–4
Trust	LOW	HIGH



answers under 3 seconds



same answer as the one before

IN SIMPLE WORDS

Rushing doesn't save time. It just gives you a report about nobody. Slow down, read, and answer as yourself.

TRUST

Your data, your control.

How OneGrasp handles what you share, in plain words.

Only you see your answers

Your individual answers are used to build your report and are never shown to your school.

Schools see progress

If you joined through your school, it sees whether you finished and how active you are, to help at the right time.

A copy to your email

A PDF copy goes only to your registered email address.

Documents for applications only

Scholarship and study-abroad vaults keep your documents for your applications.

Recordings stay on your device

The research practice recorder never uploads your voice.

Quick exit on shared devices

Law & Rights has a quick-exit button and private browsing.

AI tools checked first

AI tools in the dashboard are rated for age and privacy before you see them.

You choose what's public

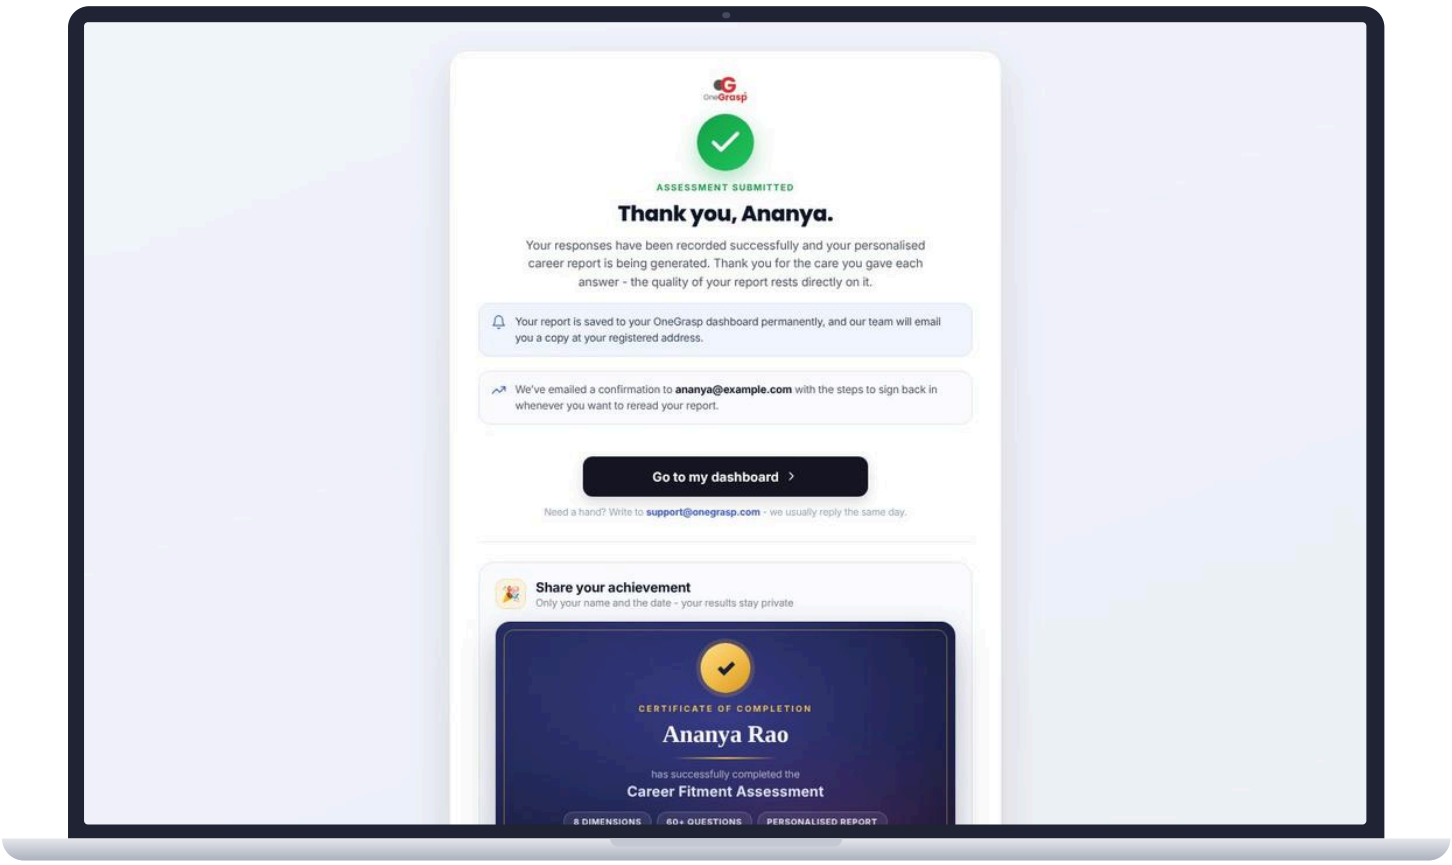
Your portfolio page is private until you choose to share the link.

Our honesty promise: Your results come from your own answers, read through established psychometric frameworks. Nothing in the report is a limit on what you can become.

SUBMITTED

What happens after you finish.

Tap “Finish & see report” when every question is answered. Your personalised report is generated instantly.



The confirmation screen: your answers are recorded and your report is being generated.

STEP 1
Report saved
It stays on your dashboard permanently. Reopen it any time.

STEP 2
Copy by email
A confirmation email explains how to sign back in.

STEP 3
Dashboard unlocks
Your results pages and every tool appear in the menu.

STEP 4
Read it together
Download the PDF and read it with someone who guides you.

Your first 48 hours

- [ ] Open your full report and read the first three pages
- [ ] Write your type and interest code on page 2 of this book
- [ ] Download the PDF and share it with a parent or mentor
- [ ] Open “My plan” in the dashboard and tick one task
- [ ] Explore 3 careers in your top field in the Career Library

TRY THIS

Within 48 hours, sit with a parent, teacher or counsellor for 20 minutes and read the report using the guide on page 67. Fresh results make the best conversations.

GOOD TO KNOW

Didn't get the email? Check your spam folder. Your report is always on your dashboard, so nothing is ever lost.

OneGrasp™

CAREER FITMENT HANDBOOK

03

PART 03

The 8 Dimensions

Eight simple questions about you. Together they show where you will thrive. Plus the eight career-readiness areas of the undergraduate edition.

IN THIS PART

01 The whole you, at a glance

02 01 Personality

03 02 Career Interests

04 03 Multiple Intelligences

05 04 Emotional Intelligence

06 05 Learning Style

07 06 Motivators

08 07 Strengths

09 08 Aptitude

10 Undergraduates: 8 areas of career readiness

WHAT MAKES YOU, YOU?

Eight dimensions. One complete you.

01 Personality
How do I naturally work and decide?

02 Career Interests
What kind of work excites me?

03 Multiple Intelligences
In which ways am I smart?

04 Emotional Intelligence
How well do I handle feelings and people?

05 Learning Style
How do I prefer to study?

06 Motivators
What drives me?

07 Strengths
What do I naturally contribute?

08 Aptitude
How quickly can I pick up new skills?

How the eight work together

Who you are
Personality and Emotional Intelligence describe how you work, decide and get on with people.

What pulls you
Career Interests and Motivators show the work that excites you and why you keep going.

How you think
Multiple Intelligences and Learning Style show the ways you are smart and how you learn.

What you can do
Strengths and Aptitude show what you naturally give and how fast you learn a field's skills.

IN SIMPLE WORDS

No single dimension decides your career. The best-fit careers are where **several dimensions agree**: for example, an Investigative interest + a Logical intelligence + a strong Numerical aptitude all point toward science and data.

DIMENSION 01 OF 08

01 Personality

"How do I naturally work and decide?"

IN SIMPLE WORDS

Your personality is your **natural style**, like being left- or right-handed. You can use both hands, but one feels easier. This dimension finds the style that feels easiest for you, so you can choose work where you don't have to fight yourself every day.

What it measures

Where you get your energy, how you take in information, how you make decisions and how you like to plan. These patterns shape how you prefer to work with others, handle tasks and make choices.

The framework behind it

Personality-type preferences in four pairs, widely known as MBTI-style typing (from Carl Jung's work, developed by Myers and Briggs). Some stages also look at the five everyday traits psychologists call the Big Five.

What it looks at

Energy: Introvert or Extravert
Do you recharge alone or with people?

Information: Sensing or Intuition
Facts and details, or patterns and possibilities?

Decisions: Thinking or Feeling
Logic first, or values and people first?

Planning: Judging or Perceiving
A clear plan, or keep options open?

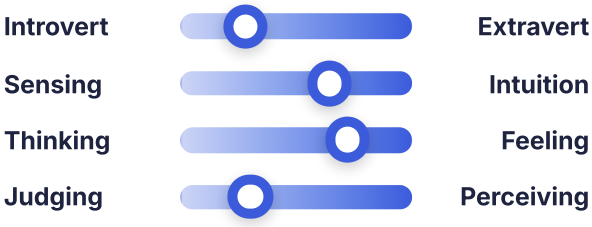
EXAMPLE

Before a school trip, **Ravi** makes a checklist a week early (Judging); **Meera** packs the night before and enjoys deciding on the spot (Perceiving). Neither is wrong. But Ravi may enjoy project management, and Meera may thrive in fast-changing roles like journalism or event work.

PERSONALITY · IN YOUR REPORT

What your report shows you.

Example result



ISFJ "The Defender" · quiet, practical, caring, organised

Each slider shows which side you lean to and how clearly. Your four letters together make your type, for example ISFJ. *Illustrative, not a real result.*

Why it matters

Different work settings suit different patterns. Knowing your personality helps you pick paths where you contribute in your natural way, enjoy the work and grow steadily.

In the age of AI, employers want people who…

- ✓ Know how they work best
- ✓ Work well with different kinds of people
- ✓ Adapt quickly when plans change
- ✓ Keep learning new skills

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
Introversion + Sensing	Accountant, lab scientist, software developer, archivist
Extraversion + Feeling	Teacher, counsellor, HR, sales, hospitality
Intuition + Thinking	Engineer, scientist, strategist, architect, entrepreneur
Sensing + Judging	Doctor, civil services, operations, banking, law

Try this month

Class 6–8
Notice when you feel most energetic: in a group or alone.

Class 9–10
Pick one club that uses your type's strengths.

Class 11–12
Compare your type with your top career's daily work.

Undergraduates
Use your type to explain how you work in interviews.

GOOD TO KNOW

There is no good or bad personality, only better fits. Your type is a preference; you can act outside it whenever you need to.

DIMENSION 02 OF 08

02 Career Interests

"What kind of work excites me?"

IN SIMPLE WORDS

Interests are the **activities that pull you in**, the things you'd happily do even without marks. When your work matches your interests, effort feels lighter and you keep going longer.

What it measures

Your natural interests and the kinds of work and activities that energise you. Most people are strongest in two or three of six interest themes.

The framework behind it

John L. Holland's theory of career interests (RIASEC), used by career counsellors worldwide since 1959. People and work environments are described with the same six themes, so your code points straight to matching careers.

What it looks at

Realistic · doing
Tools, machines, nature, building things.

Investigative · thinking
Research, analysis, solving puzzles.

Artistic · creating
Design, writing, music, new ideas.

Social · helping
Teaching, caring, counselling.

Enterprising · leading
Persuading, selling, starting things.

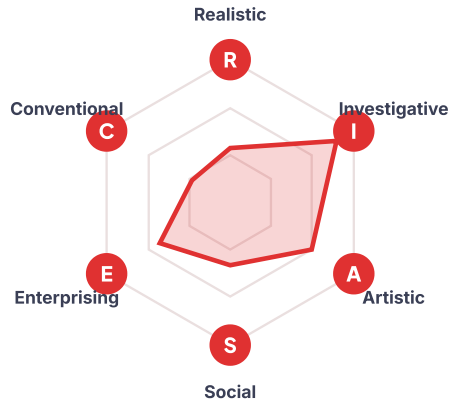
Conventional · organising
Data, order, systems and accuracy.

EXAMPLE

Arjun loves fixing his bicycle and building science-fair models (Realistic + Investigative). His friend **Sana** loves organising the school fest and convincing sponsors (Enterprising + Social). Their codes, RIE and ESA, point to very different but equally good careers.

What your report shows you.

Example result



IAE "The Analytical Investigator" · curious, creative, driven

The further a corner reaches out, the stronger that interest. Your top three letters make your interest code. *Illustrative, not a real result.*

Why it matters

Interests drive motivation, persistence and satisfaction. When your studies and work match what genuinely holds your attention, you are far more likely to thrive.

In the age of AI, employers want people who…

- ✓ Choose work they are curious about
- ✓ Keep learning as their field changes
- ✓ Bring energy and ideas, not only skills
- ✓ Stay with hard problems until solved

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
Realistic	Mechanical engineer, pilot, chef, agriculture, architecture
Investigative	Doctor, data scientist, researcher, software engineer
Artistic	Designer, architect, writer, filmmaker, UX
Social	Teacher, nurse, psychologist, social worker
Enterprising	Entrepreneur, lawyer, marketing, management
Conventional	Chartered accountant, banker, analyst, administrator

Try this month

Class 6–8
Try one activity from each of your top two themes.

Class 9–10
Match your code to streams (Part 4).

Class 11–12
Test-drive one career from your top theme.

Undergraduates
Pick an internship in your top theme.

GOOD TO KNOW

Interests can change once you try a field for real. That's why the dashboard pushes you to try small tasks, not just read about careers.

DIMENSION 03 OF 08

03 Multiple Intelligences

"In which ways am I smart?"

IN SIMPLE WORDS

Being "smart" isn't just about maths marks. A dancer, a debater and a gardener are all smart, in different ways. This dimension finds **your** kinds of smart.

What it measures

Your natural strengths across eight different ways of thinking, creating and solving problems. It shows how you prefer to learn, express ideas and contribute.

The framework behind it

Howard Gardner's theory of multiple intelligences (1983), which recognises that intelligence is not one-size-fits-all.

What it looks at

Linguistic
Words, reading, writing.

Logical–Mathematical
Numbers, logic, reasoning.

Spatial
Pictures, shapes, 3D.

Bodily–Kinaesthetic
Learning by doing and moving.

Musical
Rhythm, melody, sound.

Interpersonal
Understanding people.

Intrapersonal
Self-awareness, reflection.

Naturalistic
Nature, patterns, living things.

EXAMPLE

Kavya struggles with long essays but can picture a 3D model in her head and sketch it perfectly (Spatial). That is a real intelligence, and architects, product designers and surgeons rely on it every day.

What your report shows you.

Example result

All eight are ranked; your top two are named and explained. *Illustrative, not a real result.*

Why it matters

When you understand your mix of intelligences, you can choose learning methods that suit you, build confidence and contribute your strengths in real-world ways.

In the age of AI, employers want people who…

- ✓ Learn new tools quickly
- ✓ Solve problems creatively
- ✓ Think in more than one way
- ✓ Explain ideas to different people

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
Linguistic	Lawyer, journalist, author, teacher
Logical-Mathematical	Engineer, data analyst, economist, programmer
Spatial	Architect, designer, surgeon, pilot
Interpersonal	Manager, counsellor, sales, HR
Naturalistic	Environmental scientist, agronomist, vet

Try this month

Class 6–8
Learn one topic using your top intelligence.

Class 9–10
Pick an elective that uses it.

Class 11–12
Use your top two to choose between two degrees.

Undergraduates
Build a portfolio project that shows it.

GOOD TO KNOW

Your lowest score isn't a flaw. It's just not how you think first.

DIMENSION 04 OF 08

04 Emotional Intelligence

"How well do I handle feelings and people?"

IN SIMPLE WORDS

Emotional intelligence (EQ) is how well you **understand and manage feelings**, your own and other people's. Many studies find EQ matters as much as IQ for success at work.

What it measures

Your ability to understand yourself and others, manage emotions, build positive relationships and respond wisely in different situations.

The framework behind it

Widely used emotional-intelligence models (Salovey and Mayer; popularised by Daniel Goleman) that look at four everyday areas.

What it looks at

Self-awareness
Recognising your emotions, strengths and values.

Self-management
Staying calm, focused and adaptable.

Social awareness
Understanding others' feelings with empathy.

Relationship management
Building trust and resolving conflict.

EXAMPLE

In a group project, **Nikhil** notices a teammate has gone quiet, checks in with her privately, and adjusts the plan. That's social awareness plus relationship management, and every good team leader does it.

What your report shows you.

Example result

72 Self-awareness	**58** Self-management
66 Social awareness	**61** Relationships

Four areas, each scored out of 100. Your report names the area to practise first. *Illustrative, not a real result.*

Why it matters

Strong emotional intelligence improves communication, builds healthier relationships, helps you work in teams and prepares you to lead and adapt.

In the age of AI, employers want people who…

- Stay calm under pressure
- Handle conflict with respect
- Listen before they respond
- Lead and support a team

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
High social awareness	Doctor, nurse, teacher, counsellor, HR
High self-management	Pilot, surgeon, defence, finance, law
High relationship skills	Manager, sales, politics, entrepreneur

Try this month

Class 6–8
Name one feeling a day at dinner.

Class 9–10
Try Entrance Exams › Wellbeing before exams.

Class 11–12
Practise one calm hard conversation.

Undergraduates
Ask for feedback and act on one point.

GOOD TO KNOW

Every part of EQ improves with practice. Answer honestly to see where you are today and how you can grow.

DIMENSION 05 OF 08

05 Learning Style

"How do I prefer to study?"

IN SIMPLE WORDS

Some people remember what they **see**, some what they **hear**, some what they **write**, and some what they **do**. Knowing your style makes studying easier, not harder.

What it measures

The ways you naturally like to take in, process and organise information. It shows preferences, not potential, so you can choose methods that help you learn with less effort.

The framework behind it

Four common learning preferences (similar to the VARK model). You can be good at all four; this shows which ones you prefer.

What it looks at

Seeing (visual)
Diagrams, charts, videos, demonstrations.

Hearing (auditory)
Listening, discussing, explaining aloud.

Reading / writing
Notes, summaries, lists, re-writing.

Doing (hands-on)
Trying, practising, experimenting.

EXAMPLE

Priya read her biology chapter three times and still forgot it. Then she drew the digestive system as a coloured flowchart and remembered it in one go. She's a visual learner, and now she revises with diagrams.

What your report shows you.

Example result

Your report names your top and second style, with revision tips for each. *Illustrative, not a real result.*

Why it matters

When you study in the ways you prefer, revision is easier to start and keep up. Building flexibility across all four makes you a stronger, more adaptable learner.

In the age of AI, employers want people who…

- ✓ Adapt when the way of working changes
- ✓ Learn new tools quickly
- ✓ Know how they learn best
- ✓ Keep learning without being told

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
Seeing	Revise with mind maps, colour-coding, diagrams, videos
Hearing	Explain topics aloud, study groups, recorded notes
Reading / writing	Summaries, flashcards, rewriting notes
Doing	Practice problems, models, experiments, teaching others

Try this month

Class 6–8
Turn one chapter into a picture or model.

Class 9–10
Plan board revision with your top style.

Class 11–12
Use the exam planner, one method per subject.

Undergraduates
Pick courses that match how you learn.

GOOD TO KNOW

A learning style is a preference, not an ability, and never a reason to pick or rule out a career.

DIMENSION 06 OF 08

06 Motivators

"What drives me?"

IN SIMPLE WORDS

Motivators are your **reasons**: what makes effort feel worth it. Two people can do the same job for different reasons. One wants security, another wants to make a difference. Knowing yours keeps you going on hard days.

What it measures

What energises you to put in effort, keep going through challenges and feel satisfied with your work: the reasons that make a task meaningful.

The framework behind it

Work-values and motivation research. Situations tag your choices with values such as achievement, learning, social impact, recognition, autonomy, mastery, financial security, creativity, collaboration, security and leadership.

What it looks at

Achievement
Reaching goals and seeing results.

Learning
Growing and understanding more.

Leadership
Guiding people and decisions.

Security
Stability and a steady future.

Social impact
Helping people and society.

Autonomy
Freedom to work your way.

Creativity
Making new things.

Recognition
Being valued and seen.

EXAMPLE

Two cousins both become engineers. One loves the steady salary and clear career ladder at a big company (Security). The other quits after two years to build a startup (Autonomy + Achievement). Same degree, different motivators, different happy endings.

What your report shows you.

Example result

Your motivators ranked; the top one is your core driver. *Illustrative, not a real result.*

Why it matters

A role that feeds your top driver keeps you engaged for years. A role that ignores it can feel empty, even when it pays well.

In the age of AI, employers want people who…

- ✓ Start work without being pushed
- ✓ Keep going when the work gets hard
- ✓ Finish what they begin
- ✓ Know what keeps them motivated

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
Security	Government services, banking, PSU engineering, teaching
Achievement / Recognition	Sales, consulting, sports, law, medicine
Social impact	Healthcare, NGOs, education, public policy
Autonomy / Creativity	Startups, design, freelancing, research, media

Try this month

Class 6–8
Notice which reward works for you.

Class 9–10
Ask of each stream: will it feed my top driver?

Class 11–12
Compare two careers against your top two drivers.

Undergraduates
Rank job offers by drivers, not just salary.

GOOD TO KNOW

Motivators shift as you grow. Revisit your report every year or two.

DIMENSION 07 OF 08

07 Strengths

"What do I naturally contribute?"

IN SIMPLE WORDS

Strengths are what you **reach for first**, the role you naturally take in a group. Some people organise, some invent, some keep everyone together. The world needs all of them.

What it measures

How you naturally contribute in a group, across strength domains such as leading, analysing, relating to people, creating, design thinking, strategy and planning ahead.

The framework behind it

A strengths model with eight domains. You answer forced-choice situations (you pick the option most like you), and there are no wrong answers.

What it looks at

- **Problem-solving** — Finding a way through.
- **Communication** — Explaining and persuading.
- **Organisation** — Planning and order.
- **Creativity** — New ideas and design.
- **Empathy** — Understanding people.
- **Persistence** — Sticking with it.
- **Leadership** — Taking the lead.
- **Strategy** — Thinking ahead.

EXAMPLE

In the school science exhibition, **Aditi** designed the model (Creativity), **Rahul** made the timetable (Organisation) and **Faiz** presented it to the judges (Communication). They won because each used their strength.

STRENGTHS · IN YOUR REPORT

What your report shows you.

Example result

Problem-solving STRONG	Creativity STRONG
Persistence MODERATE	Communication MODERATE
Organisation DEVELOPING	Empathy DEVELOPING

Strong = natural strength · Moderate = situational strength · Developing = area to build. *Illustrative, not a real result.*

Why it matters

Your strengths are already there. Seeing them helps you choose paths where you contribute meaningfully, and build confidence by practising what comes naturally.

In the age of AI, employers want people who…

- ✓ Know their top strengths and can name them
- ✓ Use them to solve real problems
- ✓ Work well with people who are different
- ✓ Keep building what they do best

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
Problem-solving / Strategy	Engineer, consultant, analyst, scientist
Creativity	Designer, architect, marketer, entrepreneur
Empathy / Communication	Doctor, teacher, counsellor, journalist
Organisation / Persistence	Operations, civil services, project manager, CA

Try this month

Class 6–8
Ask two people what you're good at.

Class 9–10
Use a signature strength in one event.

Class 11–12
Write a paragraph on each signature strength.

Undergraduates
Add proof of each strength to your Passport.

GOOD TO KNOW
Your last-ranked strength isn't a weakness, just not your first instinct.

DIMENSION 08 OF 08

08 Aptitude

"How quickly can I pick up new skills?"

IN SIMPLE WORDS

Aptitude is how **quickly you can learn** the thinking a field needs. It's the only section with right answers, like a puzzle round. And unlike height, it grows with regular practice.

What it measures

Your ability to learn new concepts, solve problems and think logically across different kinds of challenge. It shows how quickly you can pick up the skills a field demands.

The framework behind it

Standard reasoning areas used in entrance-style and placement tests. Each question has one best answer.

What it looks at

Verbal reasoning
Words, ideas and meaning.

Numerical reasoning
Numbers and quantities.

Abstract reasoning
Patterns in shapes.

Spatial reasoning
Turning objects in your mind.

Logical reasoning
Rules and deductions.

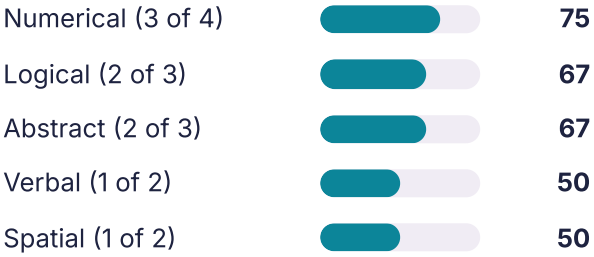
Data interpretation
Reading charts and tables.

EXAMPLE

Try one: **2, 6, 12, 20, 30, ?** The gaps are 4, 6, 8, 10, so the next gap is 12 and the answer is **42**. Questions like this test numerical and logical reasoning, the core of JEE, CAT and placement tests.

What your report shows you.

Example result



Each area shows how many you got right; your sharpest area is named, with exam-practice tips. *Illustrative, not a real result.*

Why it matters

A strong aptitude helps you grasp new ideas faster and tackle complex problems. Analytical thinking is the number one skill employers want (World Economic Forum, 2025).

In the age of AI, employers want people who…

- Think through unfamiliar problems
- Check whether an answer makes sense
- Pick up technical skills quickly
- Work confidently with numbers and data

Careers that often suit each pattern

If you lean towards…	You may enjoy careers such as…
Numerical + Logical	Engineering, finance, data science, actuarial
Verbal	Law, civil services, journalism, management
Spatial	Architecture, design, aviation, surgery
Abstract	Programming, research, mathematics, AI

Try this month

Class 6–8
10 minutes of puzzles, three times a week.

Class 9–10
Try NMMS or olympiad practice.

Class 11–12
Take a timed mock and study the analysis.

Undergraduates
Practise placement aptitude sets.

GOOD TO KNOW

Aptitude improves with regular, timed practice. It is not fixed, and the overall assessment is still not a pass-or-fail exam.

Eight areas of career readiness who you are and how you think.

Undergraduates don't need to discover themselves from scratch; they need to know how ready they are for the job market. So their edition measures eight career-readiness areas.

AREA 01

Personality & Behaviour

Measures: How you naturally work, decide and react to change.

Your report shows: Your four-letter type and how clear your preferences are. Plus a score, your strengths, where to grow and next steps.

AREA 02

Interests & Motivation

Measures: The work you enjoy, what keeps you going, the life you want.

Your report shows: Your top interest types and what drives you. Plus a score, your strengths, where to grow and next steps.

AREA 03

Cognitive Capability

Measures: Reasoning with numbers, words, logic, patterns, charts.

Your report shows: How many reasoning questions you got right, area by area. Plus a score, your strengths, where to grow and next steps.

AREA 04

Academic & Domain Fit

Measures: How well you know your subject and where your degree leads.

Your report shows: A score and breakdown for your degree and specialisation. Plus a score, your strengths, where to grow and next steps.

Eight areas of career readiness how ready you are for work.

AREA 05

Human & Professional Skills

Measures: Explaining ideas, feedback, teamwork, leading, bouncing back.

Your report shows: How you'd handle real work situations. Plus a score, your strengths, where to grow and next steps.

AREA 06

Digital & Future Skills

Measures: Learning new tools, using AI sensibly, checking data.

Your report shows: Your digital and AI readiness. Plus a score, your strengths, where to grow and next steps.

AREA 07

Career & Employability Readiness

Measures: Knowing the role you want, experience, proof of skills.

Your report shows: How ready you are for your first job. Plus a score, your strengths, where to grow and next steps.

AREA 08

Future Career Adaptability & Fit

Measures: How fast you learn, handle change; the career and place that suit you.

Your report shows: How well you adapt, and your long-term preferences. Plus a score, your strengths, where to grow and next steps.

IN SIMPLE WORDS

Areas 1–4 describe **you and your subject**. Areas 5–8 describe **how ready you are for work**. Your report adds a skill gap and a 20-year career horizon (Part 4).

OneGrasp™

CAREER FITMENT HANDBOOK

04

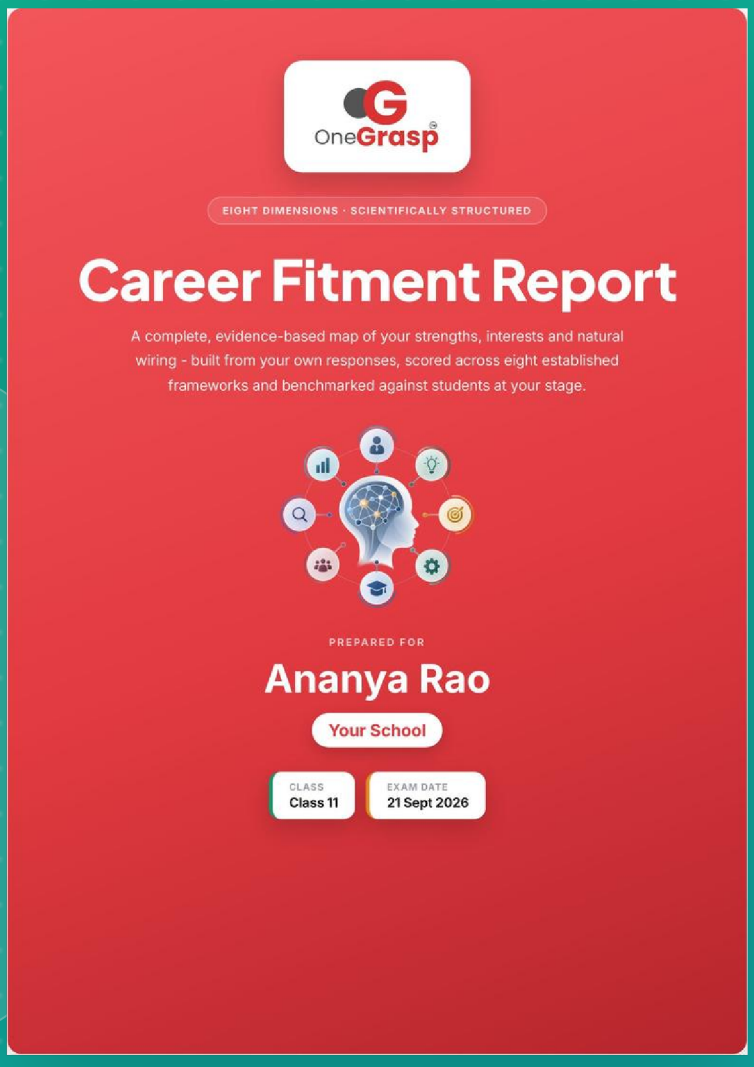
PART 04

Your Report

What every class receives, page by page, a complete worked example, and how to read your own report with confidence.

IN THIS PART

01 One assessment, four reports
02 Your report, page by page
03 Meet Ananya: a worked example
04 Class 6–8: Career Discovery
05 Class 9–10: Stream Selection
06 The 15 career domains
07 Class 11–12: Career Planning
08 Undergraduates: Employability Readiness
09 How to read your report
10 Your 90-day plan



BY STAGE

One assessment, four reports.

Every report is built only from the student's own answers. What it focuses on changes with the decisions in front of them.

What's in the report	Class 6–8	Class 9–10	Class 11–12	Undergraduates
Dimension scorecard on one page	✓ 8–9 dimensions	✓ 8 dimensions	✓ 8 dimensions	✓ 8 readiness areas

IN SIMPLE WORDS

Younger students get a report that **opens doors** (what could I enjoy?). Older students get a report that **plans routes** (which exam, which degree, which skills?).

GOOD TO KNOW

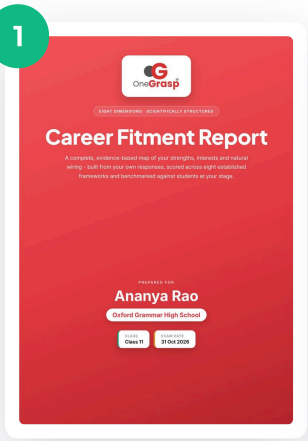
The same report powers the **Your results** pages of your dashboard, so you can explore it on screen too (Part 5).

ANATOMY

Your report, page by page.

This is a real Class 11 report, the one our sample student Ananya received. Every report follows the same clear order.

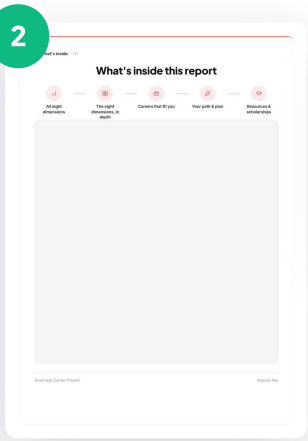
1



Cover

Your name, school, class and date.

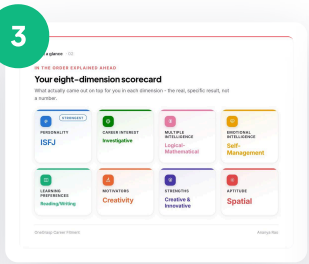
2



What's inside

A map of the report's four sections.

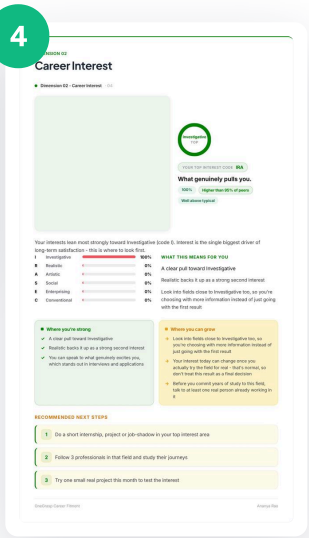
3



Scorecard

Your real result in each dimension.

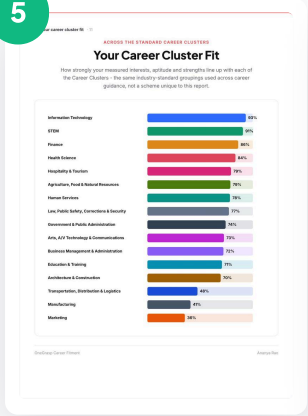
4



Deep dives

One page per dimension.

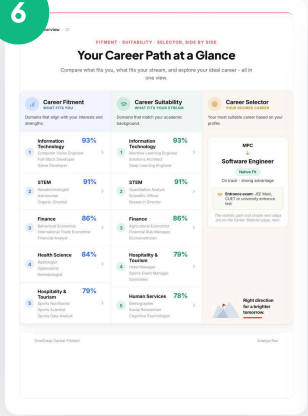
5



Cluster fit

How you match every career cluster.

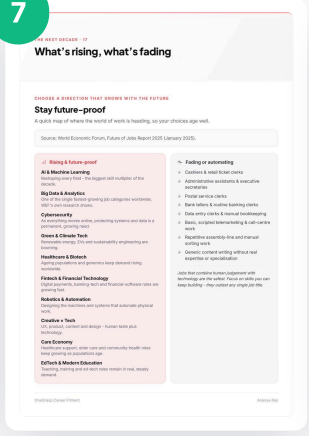
6



Path at a glance

Fitment, Suitability, Selector.

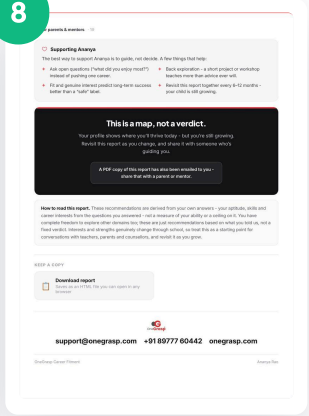
7



Future of work

What's rising and fading.

8



For parents

How to guide, not decide.

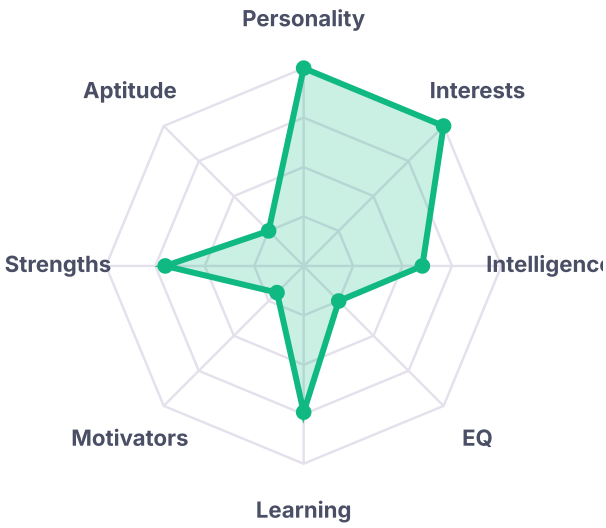
IN SIMPLE WORDS

Read it in this order: **who you are** (scorecard and deep dives), then **what fits you** (clusters and the three views), then **how to get there** (roadmap, exams, money), then share the **parents' page**.

Meet Ananya.
Let's read her report together.

Ananya Rao is a sample Class 11 MPC student we created to show you every screen in this handbook. Her answers were generated for demonstration, so treat her numbers as an example, not a real person's profile.

Her eight dimensions



The shape shows where her answers were clearest. Big points: personality, interests, learning style, strengths. Small points: emotional intelligence, motivators, aptitude.

What her profile says

ISFJ — "The Systematic Organiser": draws energy from quiet, focused time and prefers structure and planning.

Dimension	Her result
Strongest interest	Investigative (I): curious, analytical
Top intelligences	Logical-Mathematical, Interpersonal
Learning style	Reading/Writing, then hands-on
Signature strength	Creative & innovative
Core motivators	Creativity, social impact, achievement

ANANYA'S STORY

When Ananya first saw "EQ 25", she worried it meant she was bad with people. It doesn't. It means her answers didn't show a clear pattern yet, and the report suggests small, practical ways to build it. **A low score is a starting point, not a verdict.**

IN SIMPLE WORDS

Look for the **2–3 points that stick out** on the radar. Those are what make a profile unique. Don't worry about the small ones on day one.

TRY THIS

Draw your own radar on this page with a pencil, using your scorecard. Compare it with Ananya's: what's different?

WORKED EXAMPLE

Ananya's best fits and her dream career.

Her top career fields

Computer Science / IT	92%
AI / Data Science	92%
Pure Science	90%
Research	89%
Mathematics / Statistics	88%
Biotechnology	88%
Engineering	87%
Economics	86%

Computer Science / IT and AI / Data Science tie at the top: both reward an investigative, logical, organised profile.

Her dream career: Software Engineer

IN SIMPLE WORDS

Her dream career **matches** her best-fit field. Her profile and stream fit strongly; her aptitude score is the gap to work on, and aptitude grows with practice.

Strengths to use

- ✓ Clear personality (100/100)
- ✓ Clear career interest (100/100)
- ✓ Learning style (74/100)

Areas to grow

- ↗ Motivator clarity (19/100)
- ↗ Aptitude and reasoning (25/100)
- ↗ Emotional intelligence (25/100)

What Ananya did next

STEP 1
Week 1
Read 5 careers in Computer Science in the Career Library.

STEP 2
Week 2
Took a Career Test-Drive as a software engineer.

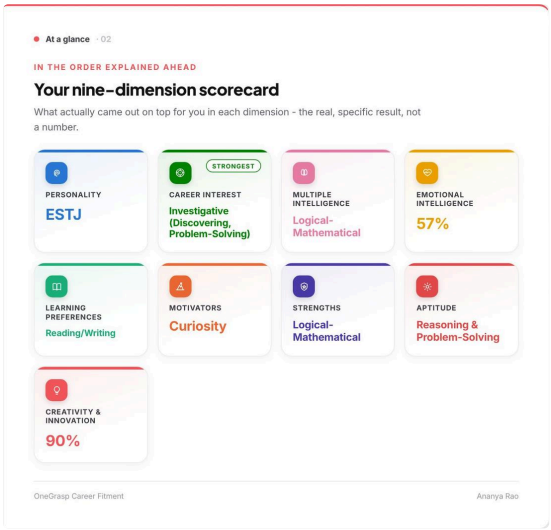
STEP 3
Week 3
Started a JEE Main study plan and a mock test.

STEP 4
Week 4
Joined a free coding programme in Internships.

CLASS 6–8 · CAREER DISCOVERY

Curiosity first, labels never.

At 11 or 12, nobody should pick a career. The Class 6–8 report is shorter and friendlier, and it is built to spark curiosity and good habits.



The Class 6–8 scorecard: every dimension's result at a glance.

What Class 6–8 students get

- About 60 short, age-appropriate questions
- A scorecard across Personality, Career Interest, Strengths, Aptitude, Motivators, Learning Style, Emotional Awareness and Creativity & Innovation
- Your personality type and interest code in simple words
- Top 5 career domains out of 15, each with a fit %
- “Your career, in one page”: a profile wheel and best-fit fields
- A 20-year roadmap: what to explore now, in school and beyond
- Free resources, and a page for parents

Two dimensions made for younger students

Emotional Awareness

Noticing your own feelings and other people's in everyday school and home situations. It grows into full Emotional Intelligence in later editions.

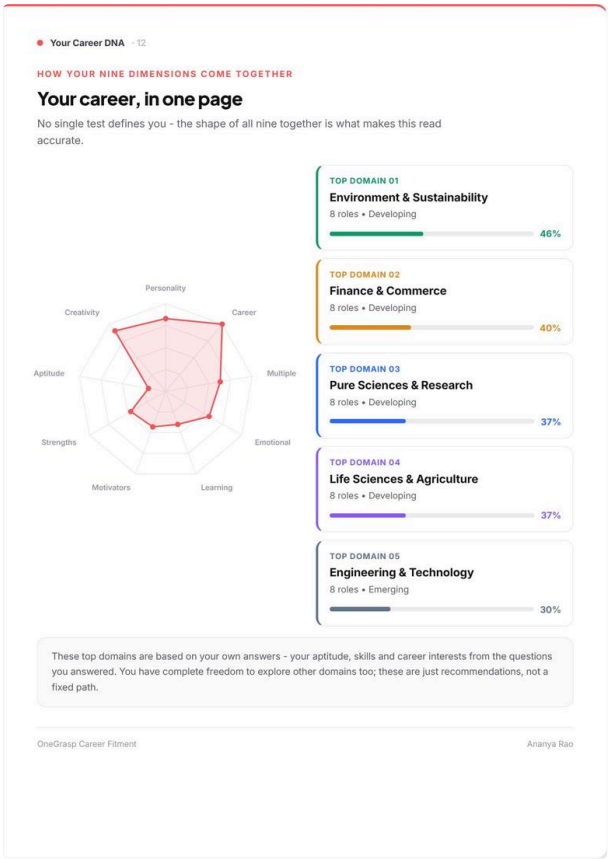
Creativity & Innovation

Four indicators: problem-solving, adaptability, innovation and future orientation. How you come up with ideas and handle the new.

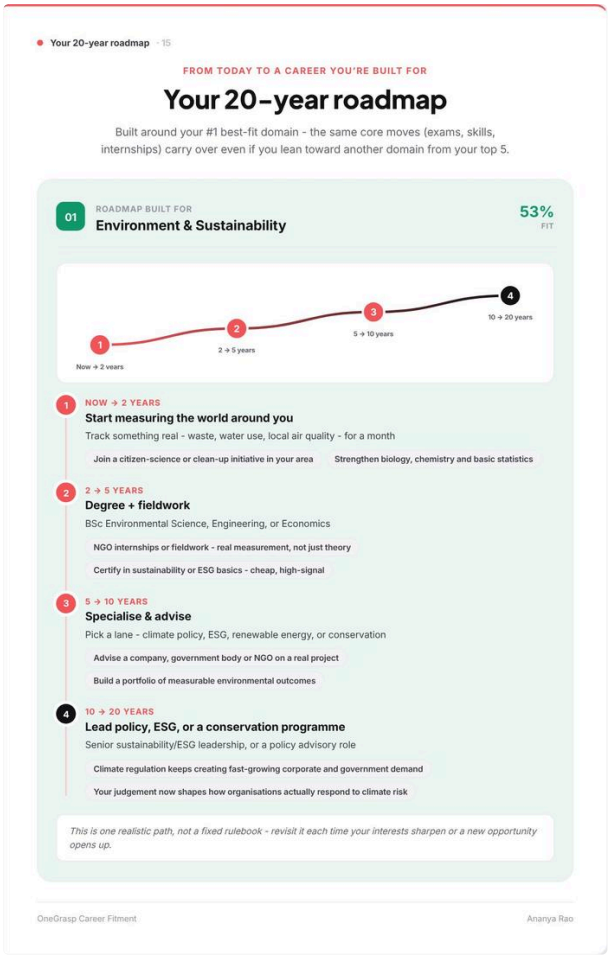
FOR PARENTS

A Class 7 report is a snapshot of a growing child. Celebrate the strengths, don't worry about the lowest scores, and plan to retake the assessment in Class 9–10.

Reading the Class 6–8 report together.



"Your career, in one page": the profile wheel and best-fit domains.



The 20-year roadmap, rising step by step from today.

What to do with it at this age

Explore, don't decide

Use the top 5 domains as a menu of things to try: clubs, books, videos, visits.

Build habits

The roadmap's first steps are habits: reading, curiosity, money basics, asking good questions.

Play the dashboard

Financial Literacy games, Communication Lab and AI Aware are made for younger students too.

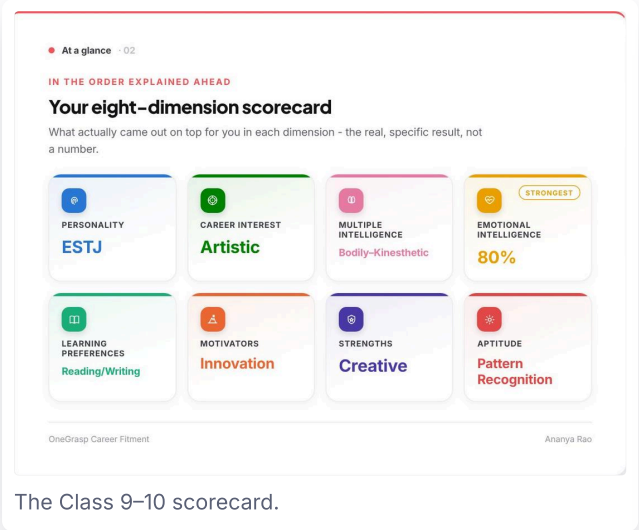
Know the early exams

JNVST (Navodaya, Class 6), AISSEE (Sainik School, Class 6 and 9) and NMMS (Class 8).

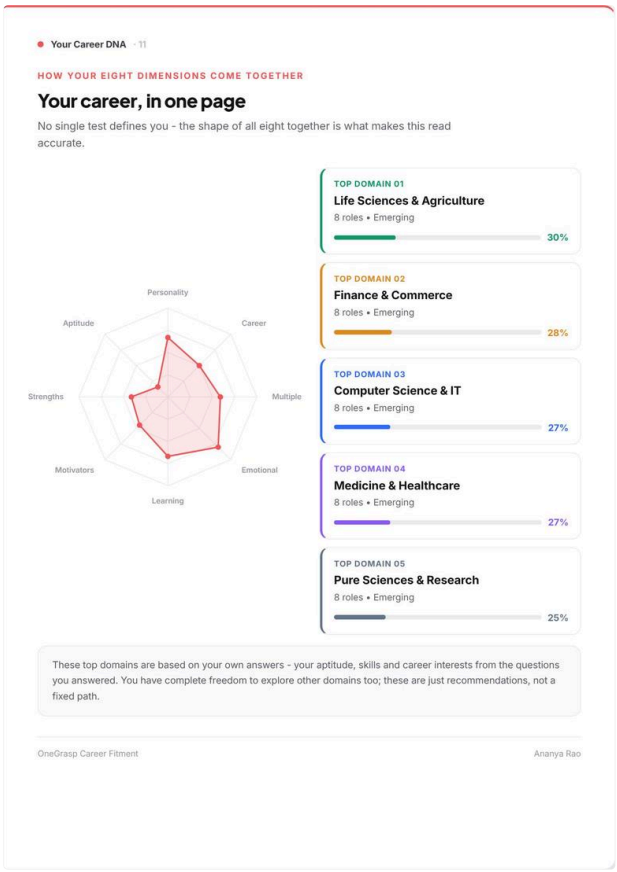
CLASS 9–10 · STREAM SELECTION

The first big choice: your stream.

After Class 10 every student picks a stream: MPC, BiPC, MEC, CEC, HEC or vocational. It's easier to choose than to change, so the Class 9–10 report makes sure the stream follows the student, not the crowd.



The Class 9–10 scorecard.



"Your career, in one page": radar and best-fit domains.

What Class 9–10 students get

8 dimensions
About 60 questions, ordered interests and aptitude first.

Top 5 domains
From 15, each with fit % and Strong / Good / Worth exploring.

Domain deep dives
What it is, key roles, skills, how to get in, salary.

Your choice vs your result
The career you want, compared with your profile.

20-year roadmap
From the stream choice to long-term growth.

Money and parents
Scholarships, free courses and a parents' page.

CLASS 9–10 · STREAM SELECTION

From your top domains to a stream.

Find your top domains from the report in the first column. The next columns show the streams that lead there most directly, and the exams you'll meet.

Career domain	Most direct stream	Exams you may meet
Business & Entrepreneurship	MEC, CEC (any)	IPMAT, CUET-UG
Finance & Commerce	MEC, CEC	CUET-UG, CA Foundation
Engineering & Technology	MPC	JEE Main/Adv, BITSAT
Computer Science & IT	MPC (MEC for BCA)	JEE Main, BITSAT, CUET
Medicine & Healthcare	BiPC	NEET-UG
Life Sciences & Agriculture	BiPC	NEET-UG, ICAR, CUET
Pure Sciences & Research	MPC or BiPC	CUET-UG, IISER/NEST
Architecture, Design & Creative Arts	MPC (arch.), any (design)	NATA, NID, UCEED, NIFT
Media & Communication	Any; HEC helps	CUET-UG
Law, Government & Public Service	Any; HEC/CEC helps	CLAT, AILET, CUET
Education & Psychology	Any; HEC/BiPC helps	CUET-UG
Hospitality, Tourism & Events	Any	NCHM JEE, CUET
Defence, Aviation & Transportation	MPC (NDA, pilot)	NDA & NA
Environment & Sustainability	BiPC or MPC	CUET-UG, ICAR
Sports & Fitness	Any	CUET-UG, sports quotas

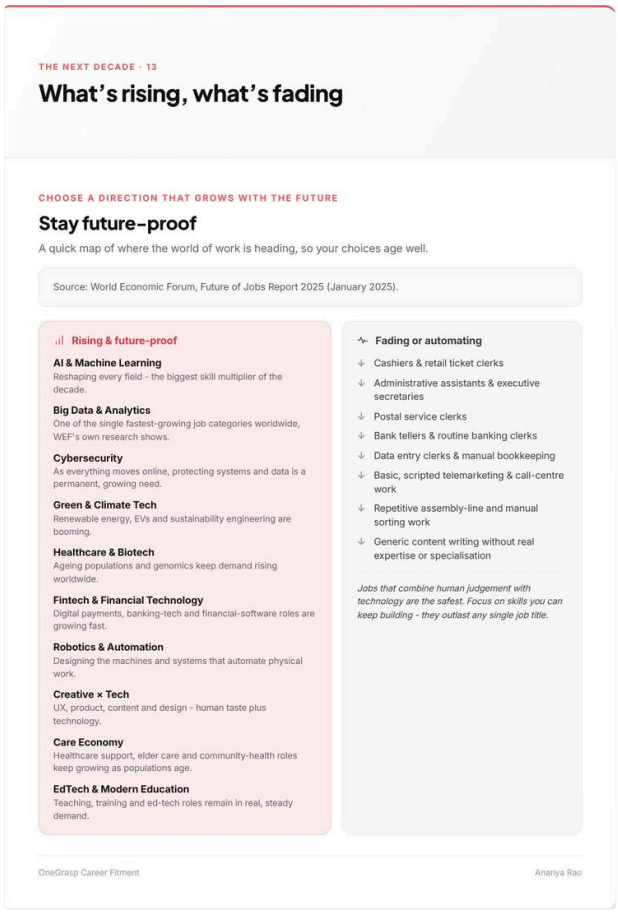
IN SIMPLE WORDS

Maths **P**hysics **C**hemistry · **B**iology **P**hysics **C**hemistry · **M**aths **E**conomics **C**ommerce · **C**ivics **E**conomics **C**ommerce · **H**istory **E**conomics **C**ivics.

WATCH OUT

This is a starting guide. Many degrees accept any stream and rules change, so confirm eligibility on each exam's official site (linked in Entrance Exams).

Your roadmap and a stream checklist.



THE NEXT DECADE · 13

What's rising, what's fading

CHOOSE A DIRECTION THAT GROWS WITH THE FUTURE

Stay future-proof

A quick map of where the world of work is heading, so your choices age well.

Source: World Economic Forum, Future of Jobs Report 2025 (January 2025).

Rising & future-proof

AI & Machine Learning
Reshaping every field - the biggest skill multiplier of the decade.

Big Data & Analytics
One of the single fastest-growing job categories worldwide, WEF's own research shows.

Cybersecurity
As everything moves online, protecting systems and data is a permanent, growing need.

Green & Climate Tech
Renewable energy, EVs and sustainability engineering are booming.

Healthcare & Biotech
Ageing populations and genomics keep demand rising worldwide.

Fintech & Financial Technology
Digital payments, banking-tech and financial-software roles are growing fast.

Robotics & Automation
Designing the machines and systems that automate physical work.

Creative × Tech
UX, product, content and design - human taste plus technology.

Care Economy
Healthcare support, elder care and community-health roles keep growing as populations age.

EdTech & Modern Education
Teaching, training and ed-tech roles remain in real, steady demand.

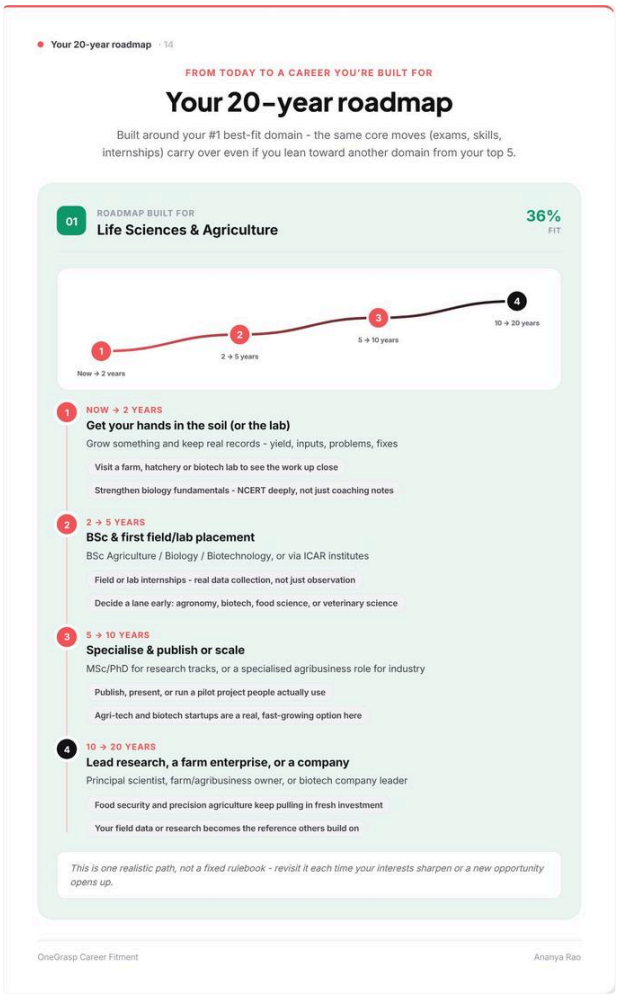
Fading or automating

- Cashiers & retail ticket clerks
- Administrative assistants & executive secretaries
- Postal service clerks
- Bank tellers & routine banking clerks
- Data entry clerks & manual bookkeeping
- Basic, scripted telemarketing & call-centre work
- Repetitive assembly-line and manual sorting work
- Generic content writing without real expertise or specialisation

Jobs that combine human judgement with technology are the safest. Focus on skills you can keep building - they outlast any single job title.

OneGrasp Career Fitment · Ananya Rao

Your 20-year roadmap.



Your 20-year roadmap · 14

FROM TODAY TO A CAREER YOU'RE BUILT FOR

Your 20-year roadmap

Built around your #1 best-fit domain - the same core moves (exams, skills, internships) carry over even if you lean toward another domain from your top 5.

01 ROADMAP BUILT FOR
Life Sciences & Agriculture
36% FIT

1 Now → 2 years
2 2 → 5 years
3 5 → 10 years
4 10 → 20 years

1 NOW → 2 YEARS
Get your hands in the soil (or the lab)
Grow something and keep real records - yield, inputs, problems, fixes
- Visit a farm, hatchery or biotech lab to see the work up close
- Strengthen biology fundamentals - NCERT deeply, not just coaching notes

2 2 → 5 YEARS
BSc & first field/lab placement
BSc Agriculture / Biology / Biotechnology, or via ICAR institutes
- Field or lab internships - real data collection, not just observation
- Decide a lane early: agronomy, biotech, food science, or veterinary science

3 5 → 10 YEARS
Specialise & publish or scale
MSc/PhD for research tracks, or a specialised agribusiness role for industry
- Publish, present, or run a pilot project people actually use
- Agri-tech and biotech startups are a real, fast-growing option here

4 10 → 20 YEARS
Lead research, a farm enterprise, or a company
Principal scientist, farm/agribusiness owner, or biotech company leader
- Food security and precision agriculture keep pulling in fresh investment
- Your field data or research becomes the reference others build on

This is one realistic path, not a fixed rulebook - revisit it each time your interests sharpen or a new opportunity opens up.

OneGrasp Career Fitment · Ananya Rao

Take the next step: learn, find work and get funded.

Before you sign the stream form

- [ ] Our top 2 domains from the report point to this stream
- [ ] We checked aptitude: the maths or biology load is manageable
- [ ] We tried one Career Test-Drive in this stream
- [ ] We have a backup plan if the first-choice exam doesn't work out
- [ ] The student enjoys at least two core subjects of this stream
- [ ] We read 3 careers from this stream in the Career Library
- [ ] We know the main entrance exam and its eligibility
- [ ] The decision is the student's, with the family's support

FOR PARENTS

If the report and the family's wish disagree, don't fight. Use the dashboard's **Family Decision Room** to compare both paths side by side with facts.

REFERENCE

The 15 career domains.

Class 6–10 reports rank these 15 broad fields. Each domain card in the report adds what it is, key roles, skills, how to get in, salary in India and abroad, and future scope.

Business & Entrepreneurship — A

Building and growing organisations from the ground up.

Entrepreneur, Startup Founder, Business Owner

₹3.5–7 LPA to start

Finance & Commerce — B

Making sense of money, risk and value.

Chartered Accountant, Cost Accountant, Company Accountant

₹3.5–8 LPA to start

Engineering & Technology — C

Designing and building the physical world.

Mechanical Engineer, Civil Engineer, Electrical Engineer

₹3.5–7 LPA to start

Computer Science & IT — D

Building the digital world.

Software Developer, Software Engineer, Web Developer

₹4–10 LPA to start

Medicine & Healthcare — E

Caring for human health and wellbeing.

General Physician, Surgeon, Cardiologist

₹3–6 LPA (allied / nursing)

Life Sciences & Agriculture — F

Understanding and improving living systems.

Agricultural Scientist, Agronomist, Horticulturist

₹3–6 LPA to start

Pure Sciences & Research — G

Uncovering how the universe works.

Physicist, Astrophysicist, Astronomer

₹3–6 LPA to start (research)

Architecture, Design & Creative Arts — H

Shaping how the world looks, feels and functions.

Architect, Landscape Architect, Interior Designer

₹3–6 LPA to start

Media & Communication — I

Telling stories that reach the world.

Journalist, News Reporter, Investigative Journalist

₹2.5–5 LPA to start

Law, Government & Public Service — J

Upholding justice and serving the public.

Advocate, Corporate Lawyer, Criminal Lawyer

₹3–6 LPA to start

Education & Psychology — K

Helping people learn, grow and understand themselves.

Primary School Teacher, Secondary School Teacher, High School Teacher

₹2.5–5 LPA to start

Hospitality, Tourism & Events — L

Creating memorable experiences.

Hotel Manager, Resort Manager, Restaurant Manager

₹2.5–5 LPA to start

Defence, Aviation & Transportation — M

Protecting the nation and keeping the world moving.

Army Officer, Navy Officer, Air Force Officer

₹4–8 LPA to start

Environment & Sustainability — N

Protecting the planet for the future.

Environmental Consultant, Environmental Analyst, Environmental Planner

₹3–6 LPA to start

Sports & Fitness — O

Building performance, health and passion into a career.

Professional Athlete, Sports Coach, Fitness Trainer

₹2.5–5 LPA to start

Salaries are typical starting ranges in India: indicative, not guarantees.

CLASS 11–12 · CAREER PLANNING

Four big decisions. Two short years.

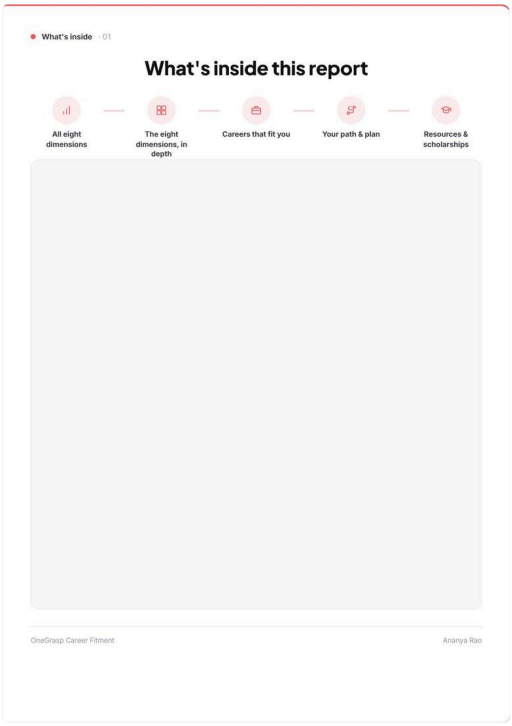
Subjects, entrance exams, degree and college. The Class 11–12 report answers all four with the same clear picture of the student.

01
Subjects
Which subjects to go deeper in, and why.

02
Entrance exams
Which exams you can take; which to prepare first.

03
Degree
Courses that fit your strengths, not just marks.

04
College
Where to apply, the cost, and funding.



What's inside: four sections, in order.

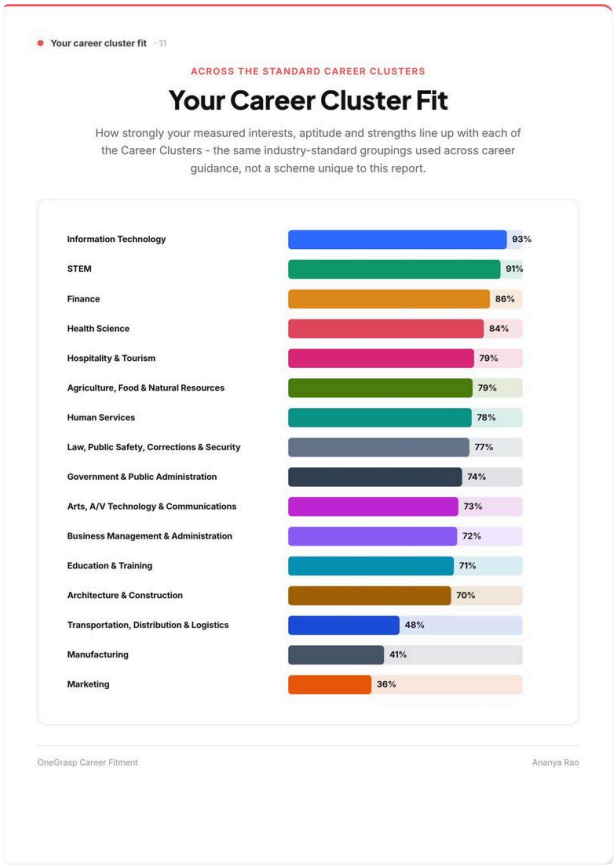
What Class 11–12 students get

- 75 questions: the 8 dimensions plus subject fit, career and stream fit, and career aspiration
- An 8-dimension scorecard and a deep dive per dimension
- Career cluster fit across 16 clusters
- Three views: Career Fitment, Career Suitability, Career Selector
- A 15-step roadmap to the career you choose
- Entrance exams for your stream with official links
- Funded routes such as NDA, Army 10+2 TES, IIST, apprenticeships
- What's rising and fading, resources and a parents' page

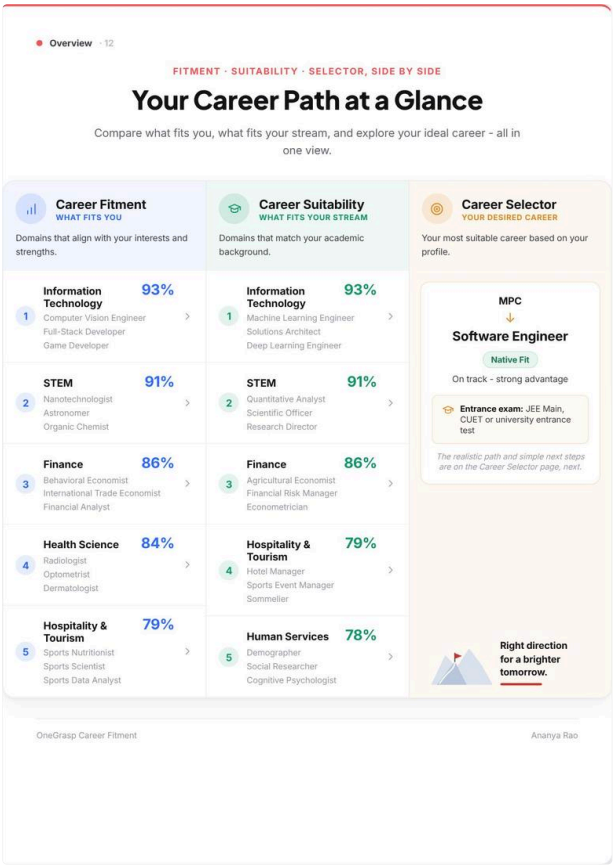
CLASS 11–12 · THE HEART OF THE REPORT

Three ways to see your future.

Your report compares what fits you, what fits your stream, and the career you dream of, side by side.



Career cluster fit: how closely you match each of 16 clusters.



Your career path at a glance: the three views.

Career Fitment
What fits YOU — 1

Your top 5 career areas, ranked purely by your answers. Each shows key roles, skills to build, salary in India (indicative) and entrance exams.

Career Suitability
What fits your STREAM — 2

Careers your current stream (MPC, BiPC, MEC, CEC, HEC) already reaches, plus top companies that hire and funded routes.

Career Selector
Your DREAM career — 3

The career you choose, how well it fits, and the realistic route from Class 11 to senior roles.

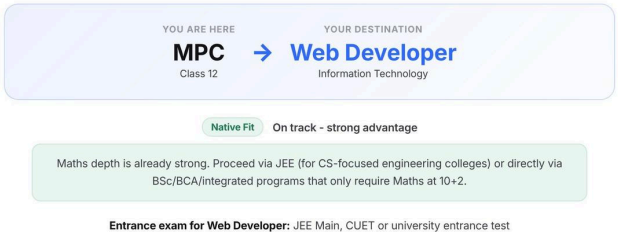
IN SIMPLE WORDS

If all three views agree, you have a clear path. If they disagree, that's useful too: it shows exactly what you'd need to build or change to reach your dream.

CLASS 11–12 · CAREER SELECTOR

Pick your dream career. Get the whole route.

Choose the career you want. Your report shows how well it fits, and lays out every step from Class 11 to senior roles.



1. Subjects in 11–12
2. Entrance exam
3. Degree options
4. Colleges in India
5. Scholarships
6. Year-by-year skills
7. Internships
8. First job titles
9. PG and study abroad
10. Long-term growth

EXAMPLE

For Ananya (MPC → Software Engineer), the selector says: fit 92%. Route: JEE Main / CUET → B.Tech CSE or BCA → build projects and a portfolio from year 1 → internships in year 2–3 → first job as a junior developer.

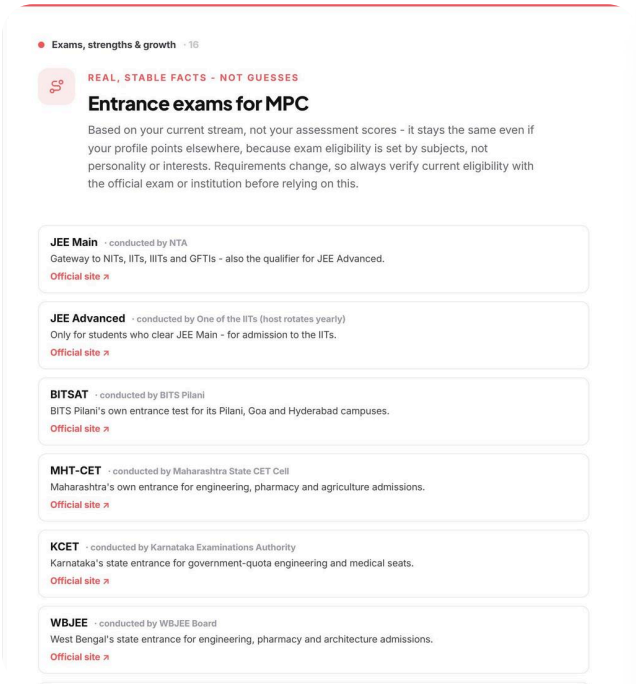
WATCH OUT

A roadmap is a guide, not a guarantee. Entry routes and requirements change; always confirm with the college, exam body or employer.

CLASS 11–12 · ALSO IN YOUR REPORT

Real facts. Not guesses.

Every exam and funded programme links to its official source, so you can check it yourself.



Exams, strengths & growth · 16

REAL, STABLE FACTS - NOT GUESSES

Entrance exams for MPC

Based on your current stream, not your assessment scores - it stays the same even if your profile points elsewhere, because exam eligibility is set by subjects, not personality or interests. Requirements change, so always verify current eligibility with the official exam or institution before relying on this.

JEE Main · conducted by NTA
Gateway to NITs, IITs, IIITs and GFTIs - also the qualifier for JEE Advanced.
Official site ↗

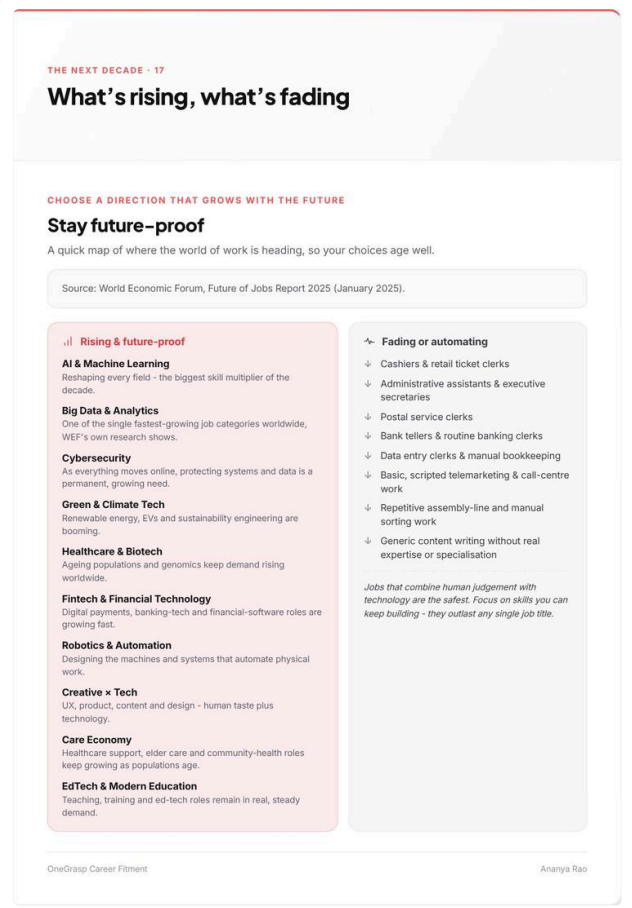
JEE Advanced · conducted by One of the IITs (host rotates yearly)
Only for students who clear JEE Main - for admission to the IITs.
Official site ↗

BITSAT · conducted by BITS Pilani
BITS Pilani's own entrance test for its Pilani, Goa and Hyderabad campuses.
Official site ↗

MHT-CET · conducted by Maharashtra State CET Cell
Maharashtra's own entrance for engineering, pharmacy and agriculture admissions.
Official site ↗

KCET · conducted by Karnataka Examinations Authority
Karnataka's state entrance for government-quota engineering and medical seats.
Official site ↗

WBJEE · conducted by WBJEE Board
West Bengal's state entrance for engineering, pharmacy and architecture admissions.
Official site ↗



THE NEXT DECADE · 17

What's rising, what's fading

CHOOSE A DIRECTION THAT GROWS WITH THE FUTURE

Stay future-proof

A quick map of where the world of work is heading, so your choices age well.

Source: World Economic Forum, Future of Jobs Report 2025 (January 2025).

Rising & future-proof

AI & Machine Learning
Reshaping every field - the biggest skill multiplier of the decade.

OneGrasp Career Fitment · Ananya Rao

What's rising, what's fading (WEF 2025).

Entrance exams for your stream

With who conducts them and official links.

Funded programmes

Genuinely funded or stipend-linked routes, checked against official sources.

Learn, work, get funded

Free courses (NPTEL, Coursera, edX, Khan Academy), job sites and scholarships.

A page for parents

"Guide, not decide": simple ways to support.

UNDERGRADUATE EDITION

Know your fit. Build your career.

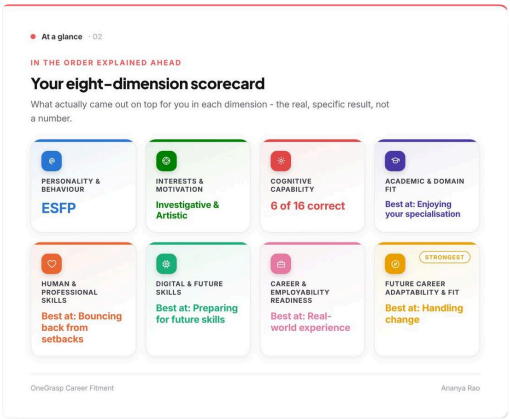
Skills, internships, first job and higher study: the undergraduate report covers the four choices to make before graduation.

01
Skills
Which skills to build each year, and which matter most.

02
Internships
Where to get real experience, and how to make it count.

03
First job
Roles that fit your strengths, not just your degree name.

04
Higher study
Whether a PG or study abroad is right, and when.



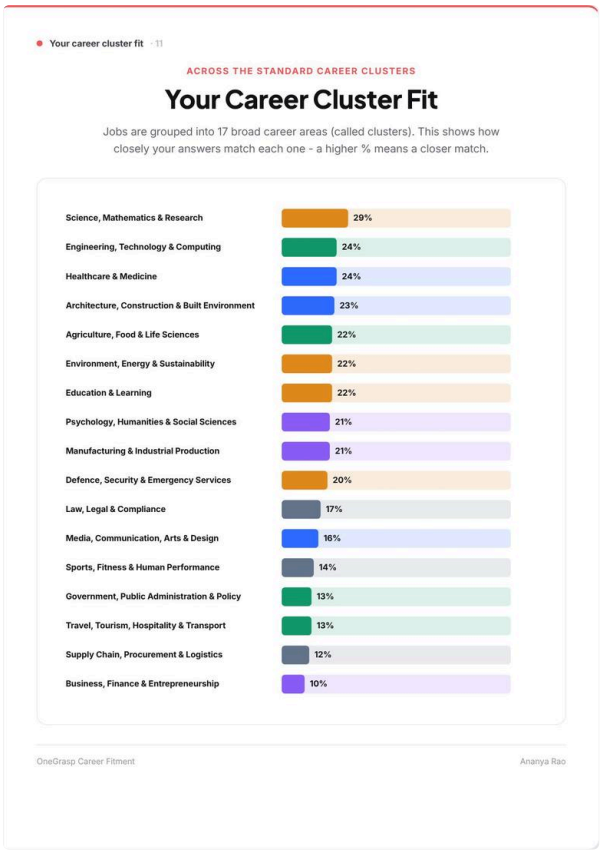
The undergraduate scorecard: eight career-readiness areas.

What undergraduates get

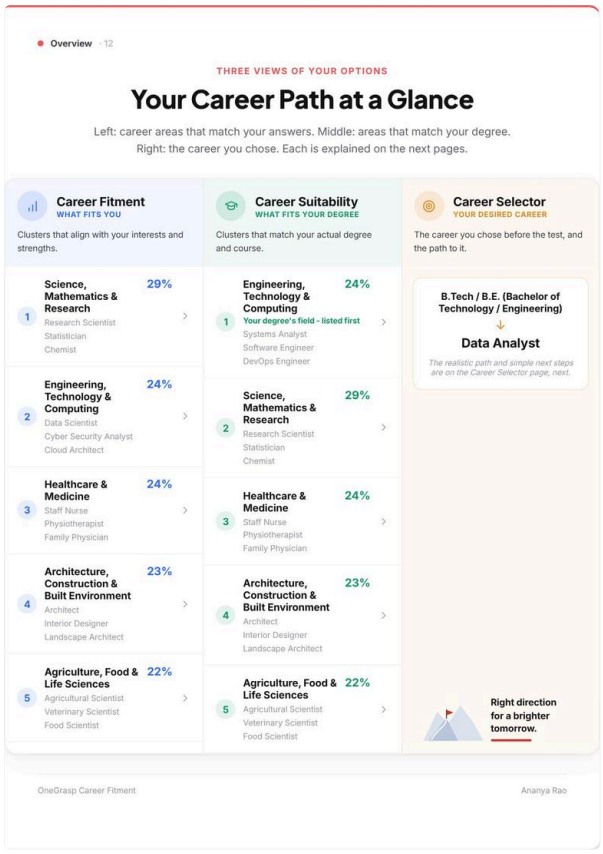
- 100 questions across 8 areas of career readiness
- A scorecard and a deep dive per area
- Career cluster fit across 17 clusters
- Fitment (what fits you), Suitability (what fits your degree), Selector (your target role)
- A skill gap: your level vs what jobs need
- Your 2026–2046 career horizon
- PG entrance exams for your field: CAT, CUET-PG, state PGCETs and more
- Learn, find work and get funded; a page for parents and mentors

UNDERGRADUATE EDITION

Your clusters and your realistic path.



Your career cluster fit across 17 clusters.

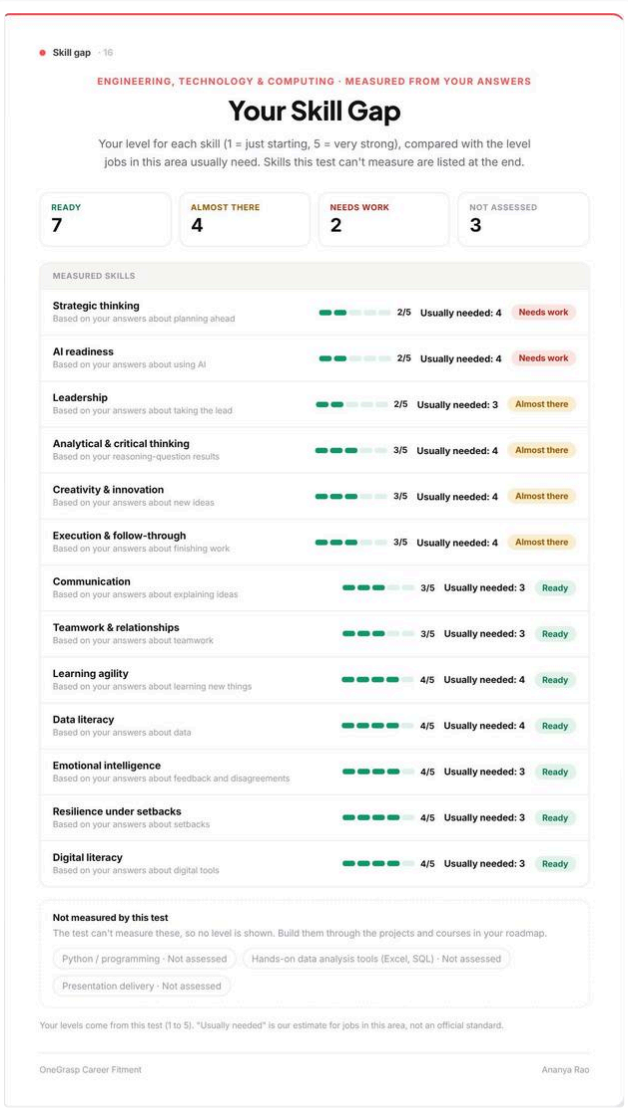


Your career path at a glance.

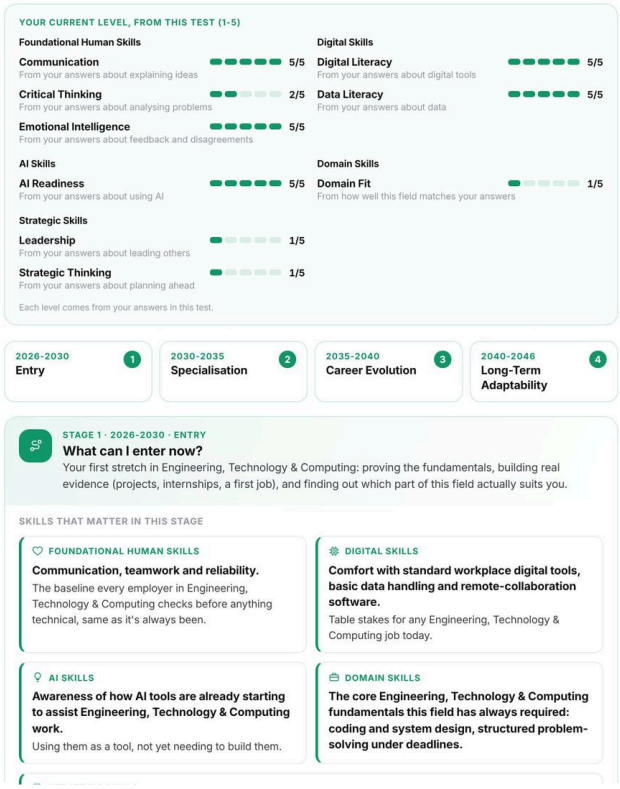
The Career Selector's realistic path includes

- ✓ Career overview and horizons
- ✓ Three-year learning roadmap
- ✓ Technical skills to master
- ✓ Portfolio projects
- ✓ Skill-gap assessment
- ✓ Internship strategy
- ✓ Entry-level job titles
- ✓ Employer skill matrix
- ✓ Certifications and short courses
- ✓ Higher education options
- ✓ Specialisations and progression
- ✓ Target profile by graduation

Know your gaps. See 20 years ahead.



Your skill gap: your level (1–5) next to what jobs in your area usually need.



Reading the skill gap

Mark	Meaning	Do this
Ready	At the level jobs need	Show proof of it
Almost there	A little practice closes it	One course or project
Needs work	Your clear focus	Make it this year's goal

Your 2026–2046 career horizon

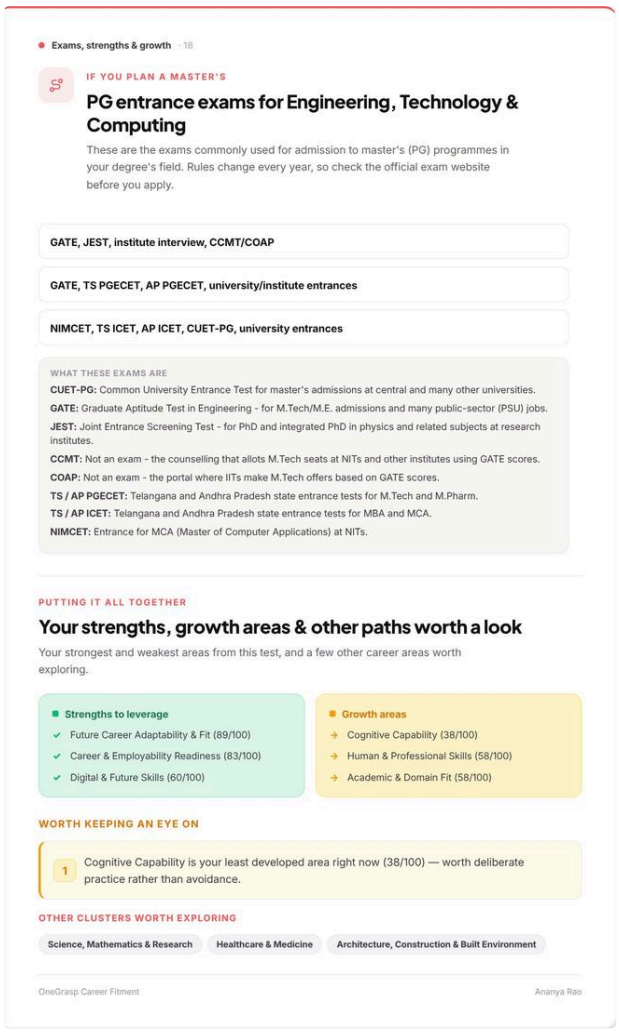
Four stages (entry, specialisation, evolution and long-term adaptability) and the skills that matter at each. It shows how your field is likely to change over 20 years, so you can plan to keep up.

IN SIMPLE WORDS

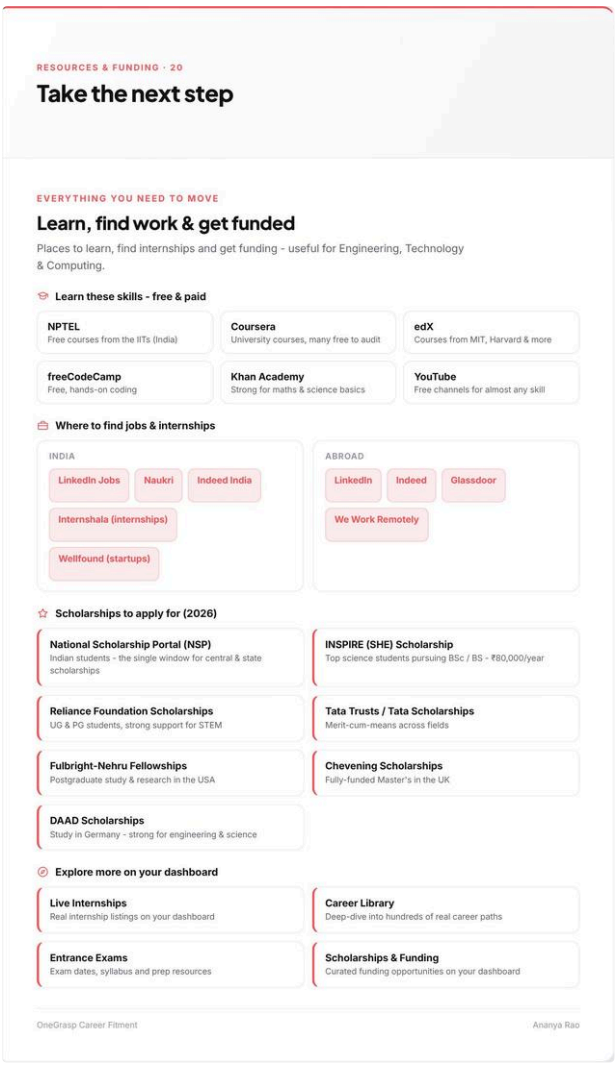
The skill gap is your **to-do list for this year**. The horizon is your **compass for the next twenty**.

UNDERGRADUATE EDITION

Plan your next step with real facts.



PG entrance exams for your field, with what each is for.



Take the next step: learn, find work and get funded.

Free places to learn

Platform	Good for
NPTEL	Free courses from the IITs
Coursera / edX	University courses, many free to audit
freeCodeCamp	Hands-on coding
Khan Academy	Maths and science basics

Where to find work

Portal	Good for
LinkedIn Jobs	Jobs and networking
Naukri / Indeed	Indian job listings
Internshala	Internships
Wellfound	Startup jobs

This is a map, not a verdict. Your profile shows where you will thrive today, but you are still growing. Revisit your report as you change, and share it with someone who is guiding you.

READING GUIDE

How to read your report in 20 minutes.

Read it in this order the first time. Have a pen and the 90-day plan on the next page ready.

1. **Start with "At a glance" (2 min)**
   The scorecard shows your real result in each dimension. Notice the two or three that stand out.
2. **Read your personality type and interest code (4 min)**
   These two explain most of the rest. Ask yourself: does this sound like me?
3. **Look at your best-fit fields (4 min)**
   Note the top 3 and their fit %. Read why each was matched.
4. **Compare with your own choice (3 min)**
   "Your choice vs your result" or the Career Selector shows how your dream career fits. A gap is not a no; it's a plan to build.
5. **Read strengths and growth areas (3 min)**
   Pick one strength to use and one area to practise this month.
6. **Read the roadmap and next steps (4 min)**
   Circle the very first step. That's your homework for this week.

Scores (0–100)

Score	Label	Read it as
75–100	Very High	Clear, strong preference or ability
65–74	High	A real strength
50–64	Medium	Balanced either way
35–49	Developing	Not your first instinct yet
0–34	Emerging	Early days; a place to practise

Fit % and match labels

Fit	Label	Do this
65%+	Strong match	Explore deeply; test-drive
45–64%	Good match	Keep on the list; try a task
under 45%	Worth exploring	Read about it; stay curious

Fit % compares your whole profile with what a field rewards. It is **not** a probability of success.

IN SIMPLE WORDS

In Personality, Learning Style and Motivators a score shows a **preference**, not quality. Only Aptitude has right answers, and even Aptitude grows with practice.

READING GUIDE

Turn your report into a 90-day plan.

Fill this in with your report open. Keep it on your desk, or photograph it and pin it to your phone.

My report in one line

My type is _____ · my interest code is _____

My top 3 fields

One strength to use

One area to grow

When	Goal	Dashboard tool I'll use	Done
Days 1–30 · Explore	Read 5 careers from my top field	Career Library, Test-Drive	☐
			☐
Days 31–60 · Do	One small task or free course	Internships, AI & Certifications	☐
			☐
Days 61–90 · Build	One project or proof	Portfolio, Career Passport	☐
			☐

TRY THIS

The dashboard's **My plan** page and weekly **Career GPS** missions turn this sheet into ticked-off tasks (Part 5).

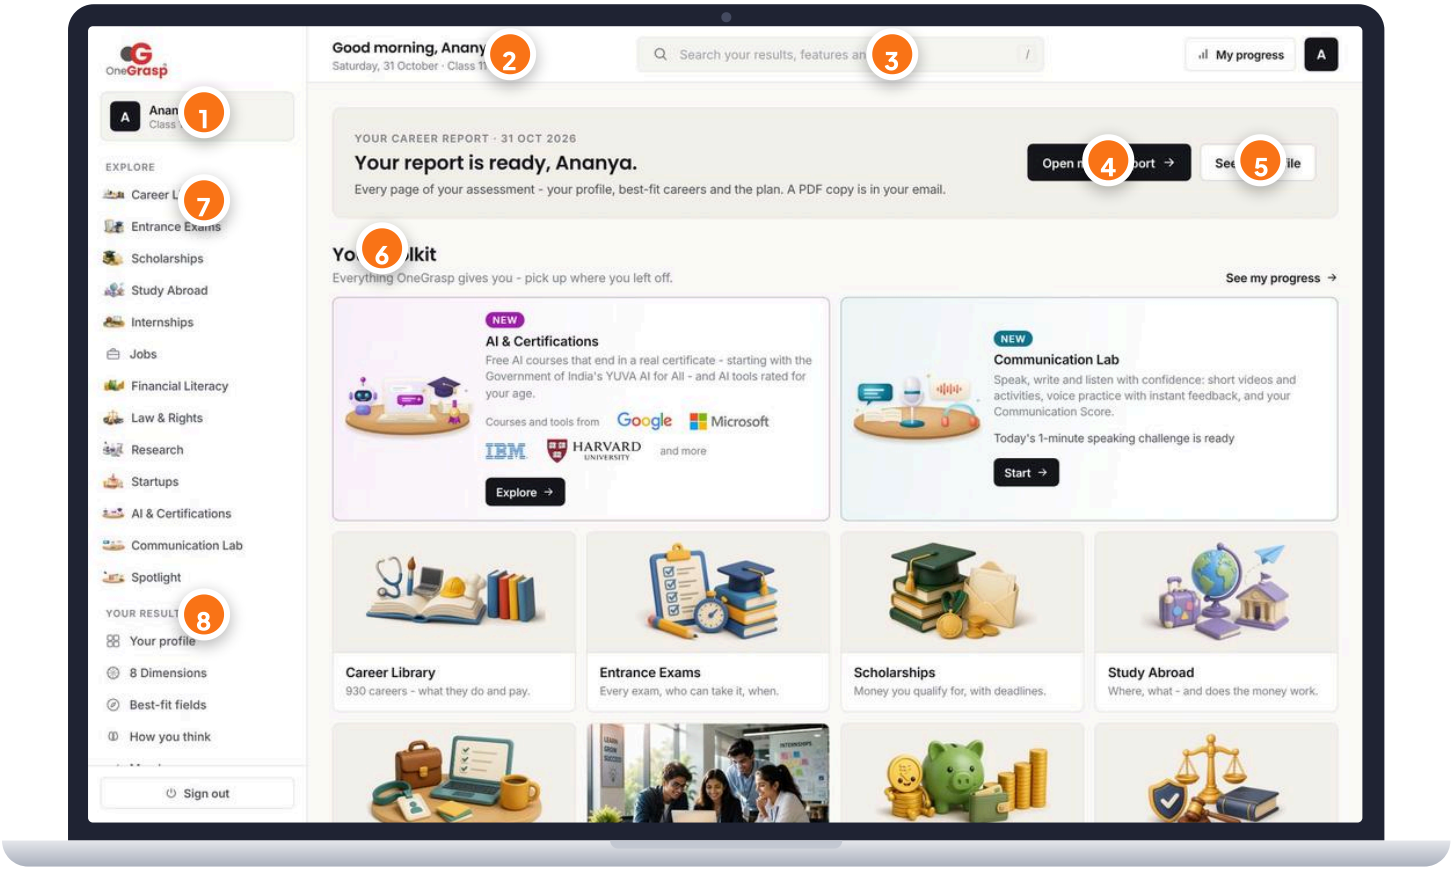
02 Finding your way around
03 Your results pages
04 Explore: careers, exams, scholarships, study abroad
05 Get experience: internships and jobs
06 Life skills: money and law
07 Build and prove: research, startups, AI, communication
08 Create: resume, interview, portfolio
09 Track: GPS, progress, certificates
10 Tasks to complete, and a quick map

DASHBOARD HOME

Your report becomes a dashboard you use.

Sign in at careerfitment.onegrasp.com with your email and password. You land on the dashboard home: your report at the top, your toolkit below, the menu on the left.



1 Your name and class
Confirms you're in the right account.

2 Search (press /)
Find any result, tool or page.

3 My progress
Everything you've done so far.

4 Open my full report
Every page of your report, with Download.

5 See my profile
Your results at a glance.

6 Your toolkit
One card per tool; new tools say NEW.

7 Explore menu
All tools, always on the left.

8 Your results
Profile, 8 dimensions, fields, thinking, plan.

IN SIMPLE WORDS

Think of the dashboard as your **career home**. The report says *who you are*; the dashboard helps you *do something about it*, every week.

GOOD TO KNOW

Forgot your password? Tap "Forgot password" on the sign-in page for a reset link. Nobody, including OneGrasp, can see your password.

NAVIGATION

Finding your way around.

The left menu stays on every screen and is grouped so you always know where a tool lives. On a phone, tap Menu at the top.

EXPLORE

Career Library · Entrance Exams · Scholarships · Study Abroad · Internships · Jobs · Financial Literacy · Law & Rights · Research · Startups · AI & Certifications · Communication Lab · Spotlight

YOUR RESULTS

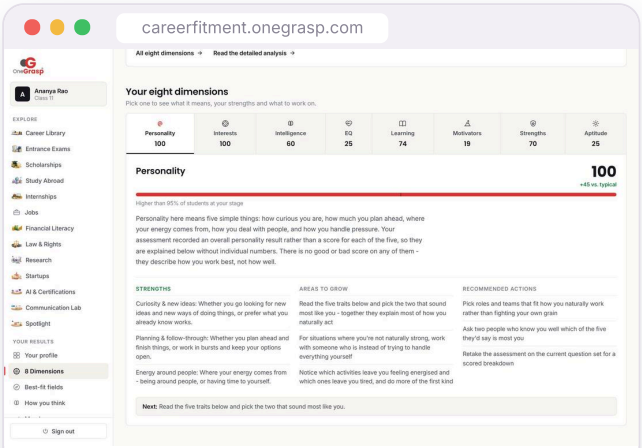
Your profile · 8 Dimensions · Best-fit fields · How you think · My plan

TRACK

My Progress · Certificates

CREATE

Resume & Interview · Build your website



The menu, on the left of every screen.

Inside every tool, the same five things

STEP 1
Breadcrumb
Dashboard › Tool › Page. Click any part to go back.

STEP 2
Tabs
Each tool's sections across the top.

STEP 3
First-visit tour
A short tour the first time. Skip any time.

STEP 4
Start here cards
The four best things to do first.

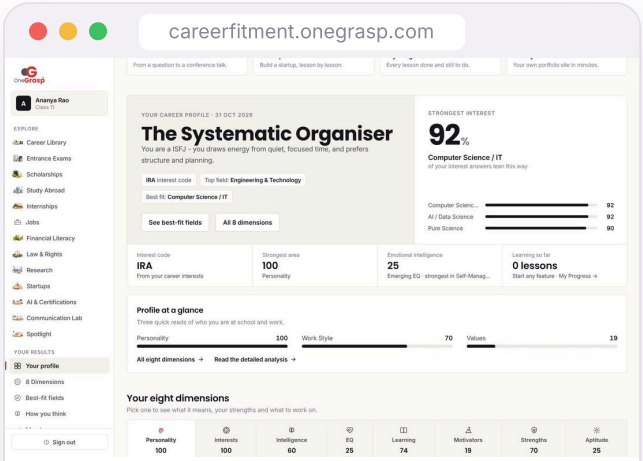
STEP 5
Get certified
Finish a course, earn a certificate.

TRY THIS

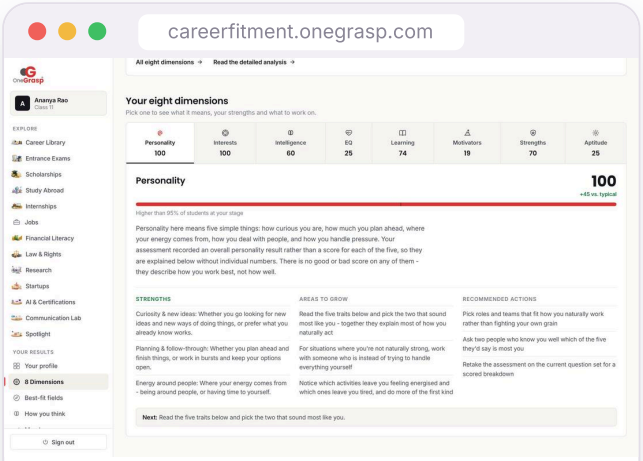
Spend 10 minutes clicking every item in the menu once. You'll never feel lost again.

Your profile and your 8 dimensions.

The Your results pages are your report made interactive. Open them from the left menu.



Your profile: title, type, strongest interest, top field.



8 Dimensions: tap a dimension to open its explanation.

Your profile

Your title (for example “The Systematic Organiser”), personality type, interest code, top field, emotional intelligence and learning style in one view, plus a profile at a glance: personality, work style, values.

8 Dimensions

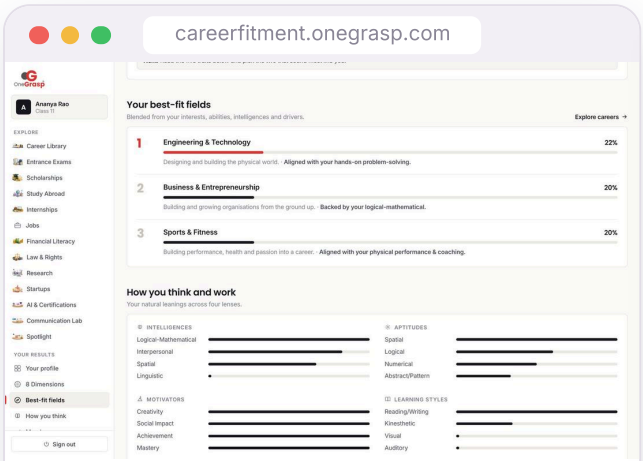
A tab for each dimension: your score against a typical student, a plain-words explanation, strengths, areas to grow and recommended actions.

IN SIMPLE WORDS

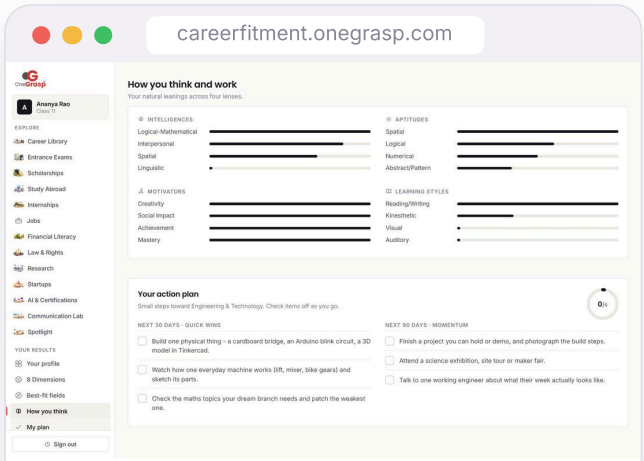
Your results pages and your PDF report show the **same results**. The dashboard version is easier to explore: tap any dimension to open it.

YOUR RESULTS

Best-fit fields, how you think, and your plan.



Best-fit fields: ranked, with a fit % and the reason.



My plan: next 30 days (quick wins) and next 90 days (momentum).

Best-fit fields

Your top fields ranked with fit % and the reason ("aligned with your hands-on problem-solving"). Tap Explore careers to open them in the Career Library.

How you think

Your intelligences, aptitudes, motivators and learning styles as bars, side by side.

My plan

Small steps for your top field. Tick each item off; the ring shows how much you've done.

YOUR TASK

Complete the three "next 30 days" items in **My plan** this month. They're chosen for your top field.

EXPLORE · CAREER LIBRARY

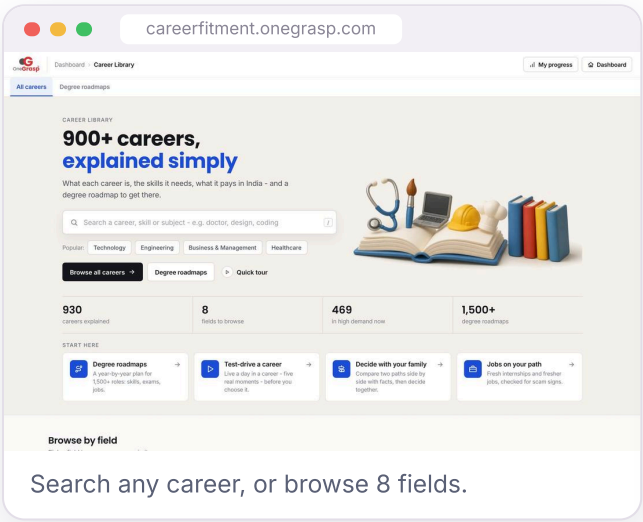
930 careers, explained simply.

What each career is, the skills it needs, what it pays in India, and a degree roadmap to get there.

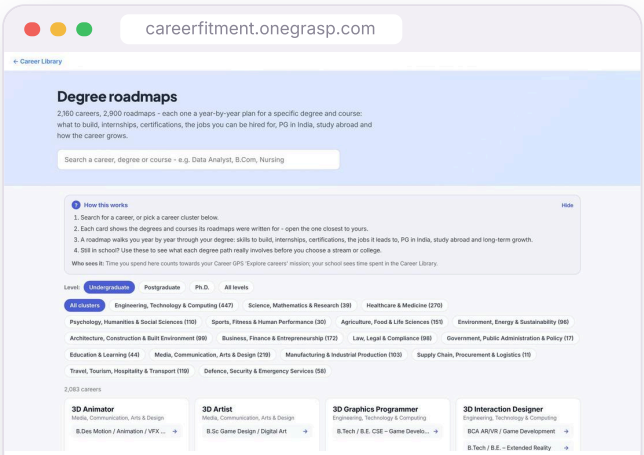
930 careers

8 fields

2,500+ degree roadmaps



Search any career, or browse 8 fields.



Degree roadmaps: a year-by-year plan for 1,500+ roles.

How to use it

STEP 1

Search or browse

Type a job, skill or subject, or pick a field.

STEP 2

Open a career

What the job is, skills, salary, demand, how to get in.

STEP 3

Open its roadmap

Year by year: skills, internships, exams, first jobs.

STEP 4

Save and compare

Shortlist 3–5 careers to discuss at home.

FIND IT **Dashboard menu** › **Career Library**

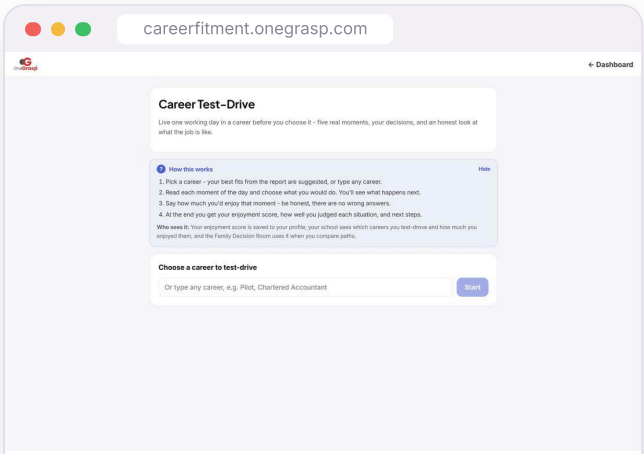
WATCH OUT

A roadmap is a guide, not a guarantee. Entry routes change, so confirm with the college or employer.

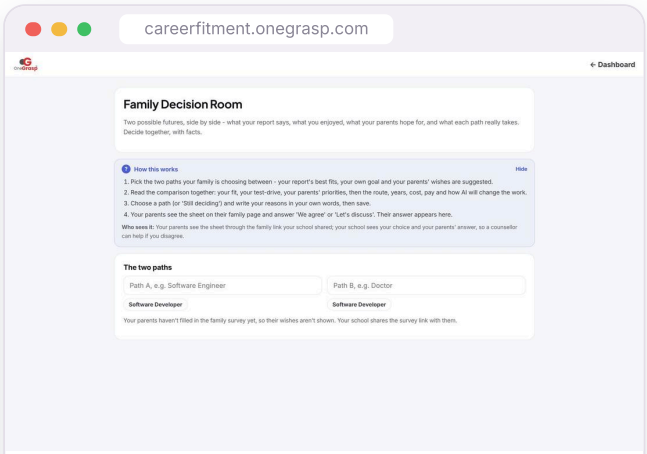
EXPLORE · TRY BEFORE YOU CHOOSE

Test-drive a career. Decide as a family.

Two tools that turn reading into real experience, and arguments into calm conversations.



Career Test-Drive: live a working day in five moments.



Family Decision Room: compare two paths side by side.

Career Test-Drive

1. **Pick a career**
   Any career you're curious about.
2. **Live five moments**
   Real situations from a working day.
3. **Choose what you'd do**
   See what happens next.
4. **Rate each moment**
   How much would you enjoy it?
5. **Get an honest summary**
   Likes, honest downsides, facts, and something to try this month.

Family Decision Room

Put two paths side by side (for example B.Tech CSE vs B.Sc Data Science) and compare them with facts: fit with your report, cost, time, exams, jobs and risks.

Each family member adds their view, and the page ends with a decision and a first step.

FOR PARENTS

Use it whenever you and your child disagree. Facts on a screen cool a debate faster than any lecture.

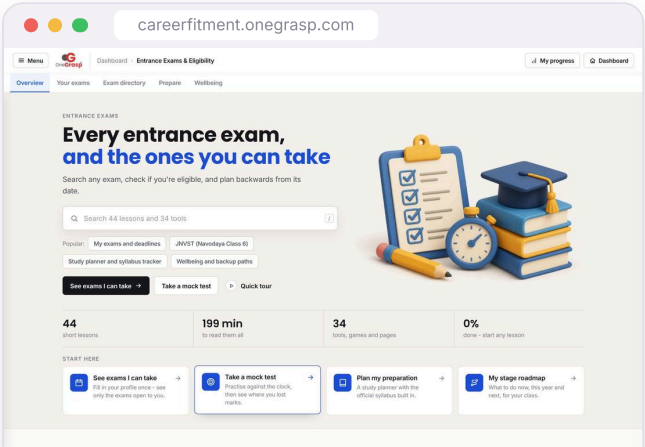
FIND IT Career Library › Test-drive a career · Decide with your family

EXPLORE · ENTRANCE EXAMS

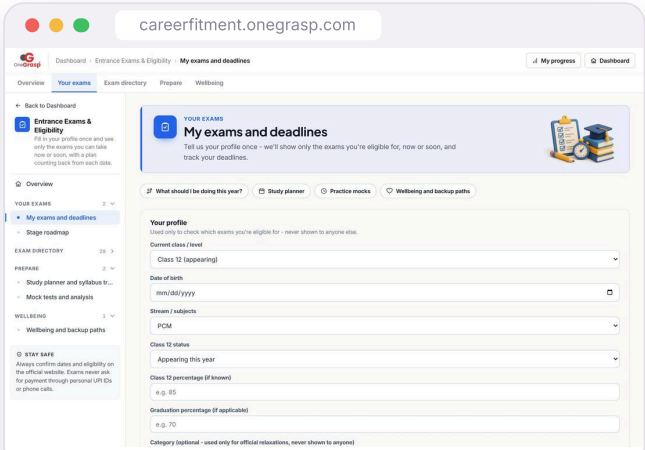
Every entrance exam, and the ones you can take.

Search any exam, check if you're eligible, and plan backwards from its date.

29 exams · **44** lessons · **34** tools and planners



Entrance Exams home.



My exams and deadlines: only the exams open to you.

The 29 exams in the directory

JNVST (Navodaya) · AISSEE (Sainik School) · NMMS · NSEP · NSEC · NSEB · NSEA · NSEJS · JEE Main · JEE Advanced · NEET-UG · CUET-UG · CLAT · AILET · NDA & NA · NATA · NIFT · NID DAT · UCEED · IPMAT · BITSAT · GATE · CAT · XAT · CMAT · CUET-PG · UGC NET · UPSC Civil Services · CDS · SSC CGL · IBPS PO · IBPS Clerk · SAT

STEP 1
Fill your profile once
Class, stream, marks, category, state.

STEP 2
See what you can take
Exams open to you now or soon.

STEP 3
Follow exams
Get deadline reminders on your dashboard.

STEP 4

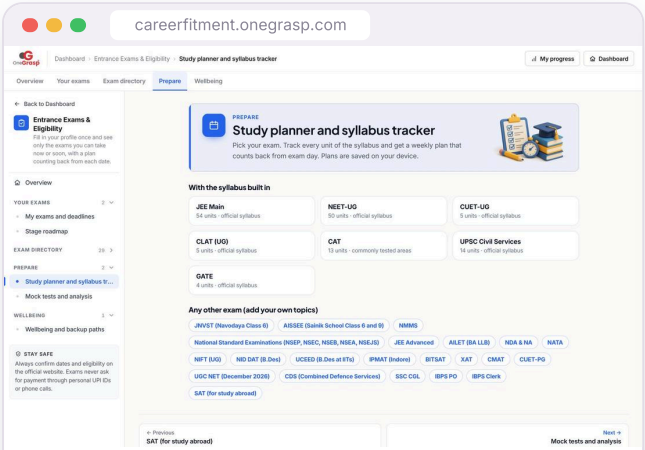
Every exam links to its official website.

FIND IT Dashboard menu › Entrance Exams › Your exams

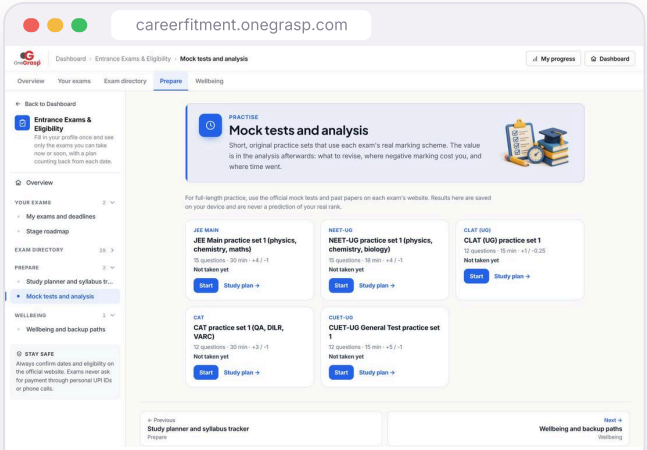
EXPLORE · ENTRANCE EXAMS

Plan, practise and stay well.

Four tools take you from “which exam?” to exam day.



Study planner with the syllabus built in for seven major exams.



Mock tests with each exam's real marking scheme.

Study planner

Pick an exam and its date. Get a week-by-week plan and tick off syllabus topics as you finish them.

Mock tests

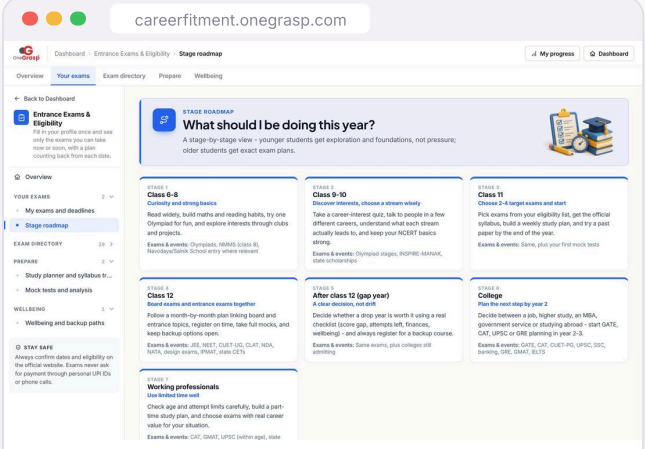
Short timed practice sets, then a clear view of what to revise.

Stage roadmap

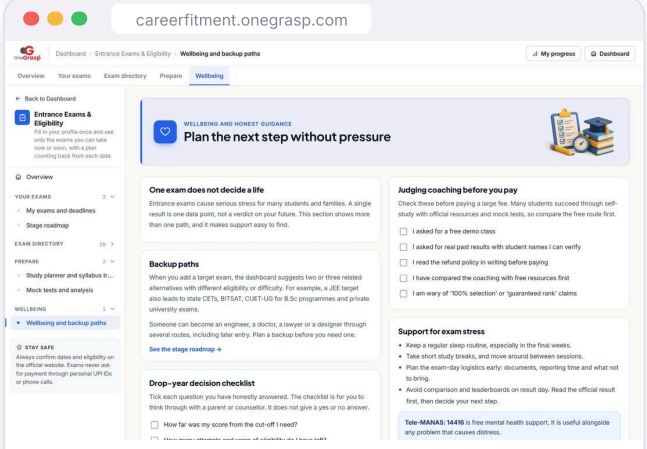
What to do now, this year and next, for your class.

Wellbeing and backup paths

Stress support, and good options if an exam doesn't go your way.



Stage roadmap: what should I be doing this year?



Wellbeing: plan the next step without pressure.

GOOD TO KNOW

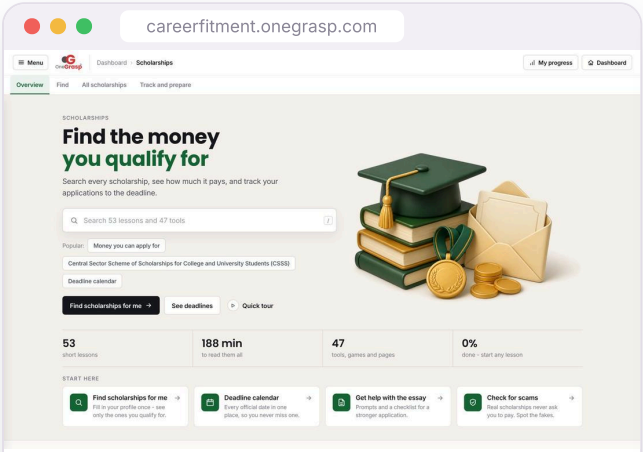
Practice results are never a prediction of your real rank. Use them to find what to revise.

EXPLORE · SCHOLARSHIPS

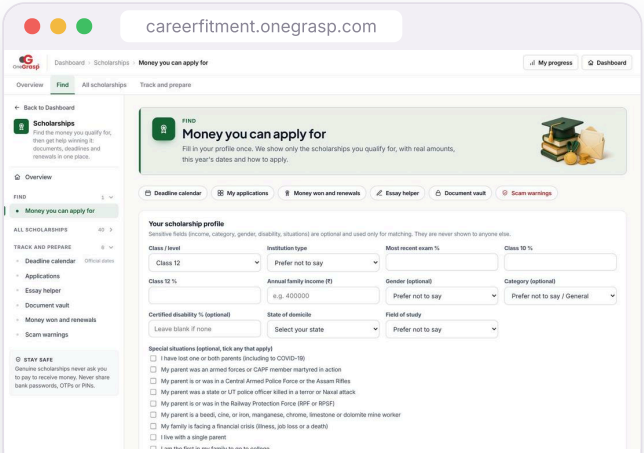
Find the money you qualify for.

Search every scholarship, see how much it pays, and track your applications to the deadline.

40 scholarships **53** lessons **47** tools



Scholarships home.



Money you can apply for: only what you qualify for.

Some of the 40 schemes

Central Sector (CSSS) · INSPIRE-SHE · NMMSS · AICTE Pragati · AICTE Saksham · AICTE Swanath · PM YASASVI · Post-Matric SC/ST · Reliance Foundation · Kotak Kanya · Tata Capital Pankh · SBI Asha · HDFC Parivartan · L'Oréal Women in Science · Santoor · ICAR Talent · Ishan Uday · PM Scholarship (CAPF/RPF) · Chevening · Commonwealth · DAAD · Erasmus Mundus · Fulbright-Nehru · J N Tata · K C Mahindra · Inlaks

WATCH OUT

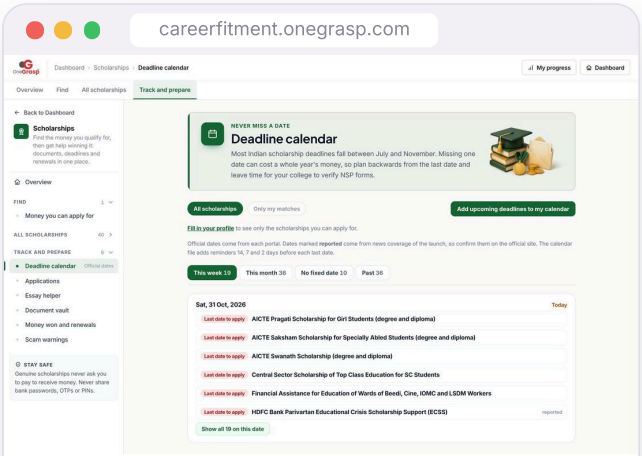
Genuine scholarships **never** ask you to pay to receive money. Never share bank passwords, OTPs or PINs.

FIND IT Dashboard menu › Scholarships › Find

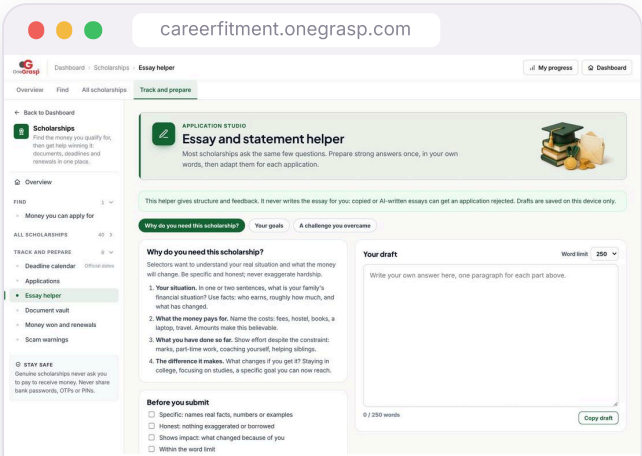
EXPLORE · SCHOLARSHIPS

Track it. Win it. Keep it.

Finding a scholarship is half the job. These tools help you apply on time and win.



Deadline calendar: every official date in one place.



Essay helper: prompts, structure and a checklist.

Deadline calendar

Official dates with reminders.

My applications

Track each one from planning to won.

Essay helper

Prompts and a checklist for a stronger statement.

Document vault

Upload certificates once; reuse everywhere.

Scam check

Spot fake scholarships and report them.

Money won

What you won and the renewal rules.

YOUR TASK

Add 3 scholarships to **My applications** and put their deadlines in the calendar this week.

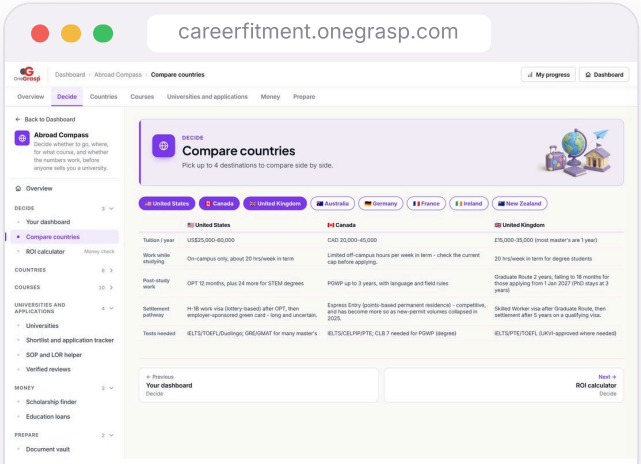
EXPLORE · STUDY ABROAD (ABROAD COMPASS)

Study abroad, one decision at a time.

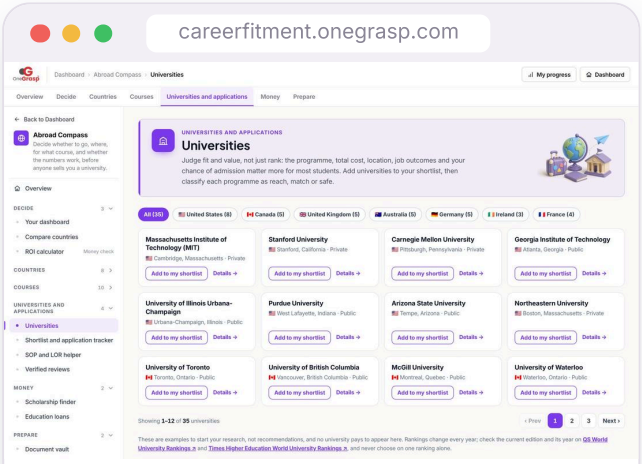
Decide whether to go, where and for what, and check the money works before anyone sells you a university.

6 steps · 30 lessons · 29 tools · 8 countries

1 Decide · 2 Country · 3 Course · 4 Universit · 5 Money · 6 Prepare



Compare up to four countries: costs, work rights, what's next.



Shortlist universities as reach, match or safe.

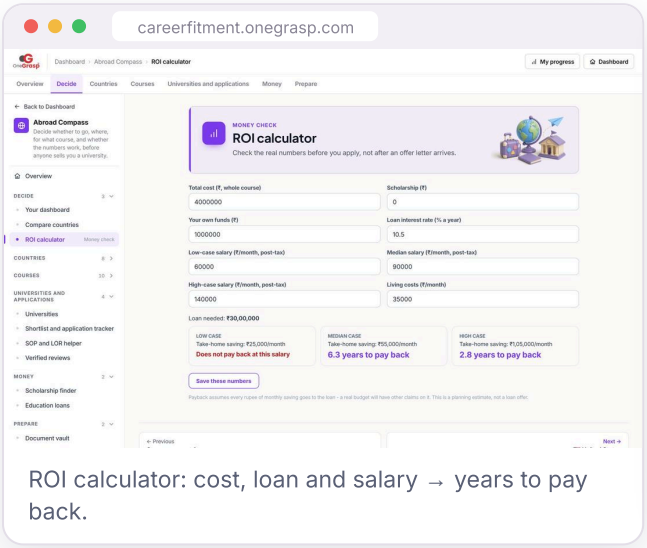
Countries covered: **United States, Canada, United Kingdom, Australia, Germany, France, Ireland, New Zealand.**

FIND IT Dashboard menu › Study Abroad

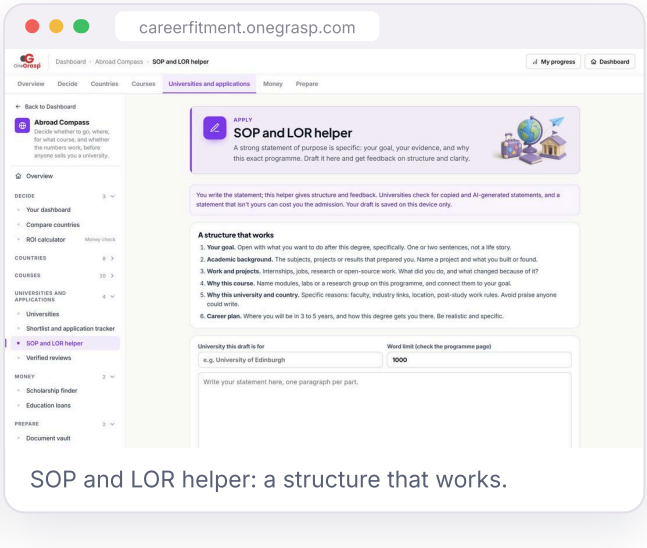
EXPLORE · STUDY ABROAD

Make the money work, then prepare.

Two tools save families from costly surprises; four more get the application right.



ROI calculator: cost, loan and salary → years to pay back.



SOP and LOR helper: a structure that works.

ROI calculator

See how many years a degree abroad takes to pay back.

Education loans

Secured vs unsecured, interest, repayment.

Scholarship finder

Abroad scholarships for Indian students.

SOP and LOR helper

A statement of purpose that sounds like you.

Agent and offer checks

Before you pay anyone. MBBS abroad: NMC rules.

Vault and applications

Documents once; track every application.

EXAMPLE

A family plans an MS in Germany. The ROI calculator shows low tuition but living costs of about ₹10–12 lakh a year, and roughly 2–3 years to pay back on a typical starting salary. They budget for it before applying, not after.

GOOD TO KNOW

The calculator gives a planning estimate, not a loan offer. A real budget will have other costs too.

GET EXPERIENCE

Free internships and fresh jobs.

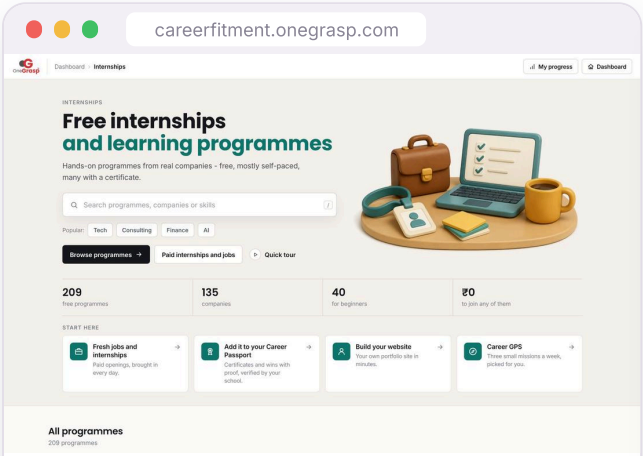
Employers look for proof. Free programmes from real companies, and checked job listings, help you build it.

209 free programmes

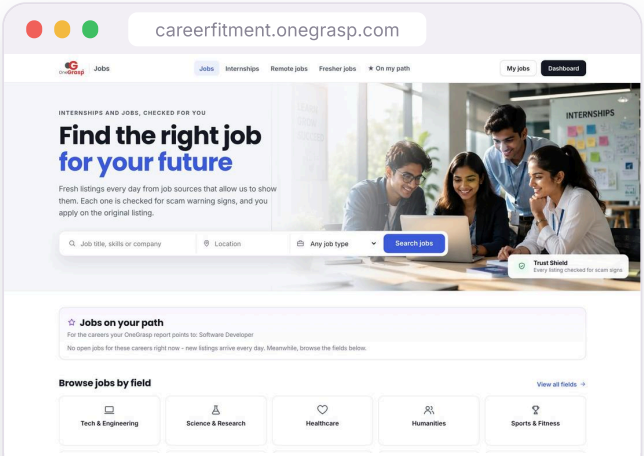
135 companies

₹0 to join

Daily fresh jobs



Internships: filter by level and field.



Jobs: fresh listings, checked for scam signs.

Internships

- Beginner, intermediate and advanced levels
- Filter by tech, consulting, finance, AI and more
- Each card shows level, time needed and top skills
- Many end with a certificate for your CV

Jobs

- Trust Shield: every listing checked for scam warning signs
- Internships and fresher-friendly jobs first
- Jobs for your best-fit careers show up for you
- You apply on the original listing

WATCH OUT

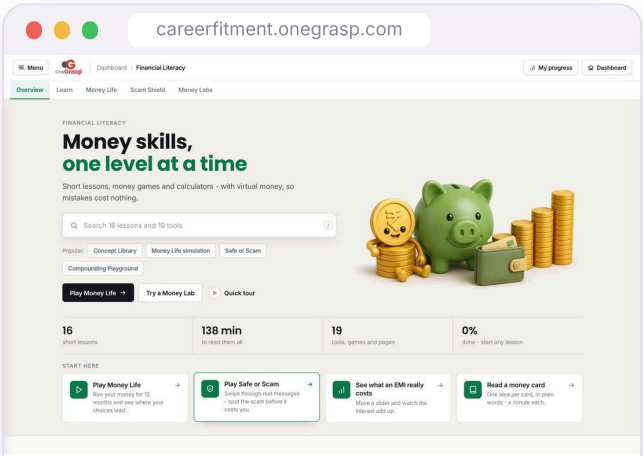
A real employer never asks you to pay for a job, a training kit or a “security deposit”.

LIFE SKILLS · FINANCIAL LITERACY

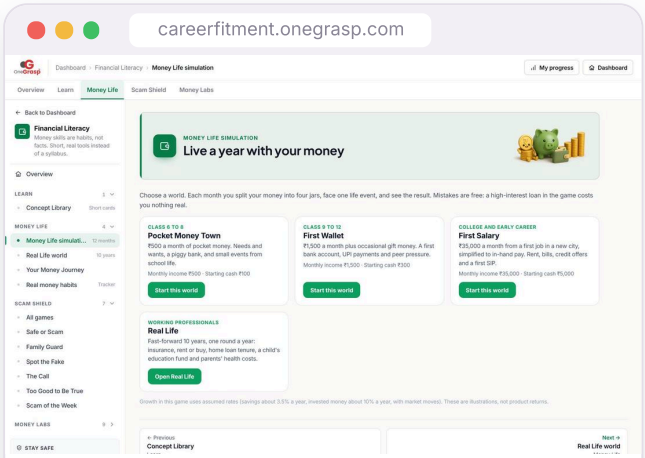
Money skills, one level at a time.

Short lessons, money games and calculators, with virtual money so mistakes cost nothing.

6 levels **16** lessons **19** tools



The level path, games and labs.



Money Life: run your money for 12 months, or ten years.

The eight Money Labs

Compounding Playground
Watch savings grow.

Inflation Time Machine
What ₹100 buys later.

EMI Truth Teller
The real cost of a loan.

Minimum-Due Trap
Why minimum payments hurt.

Save vs Grow
Bank vs investing.

Salary Slip Decoder
Gross, net, PF, tax.

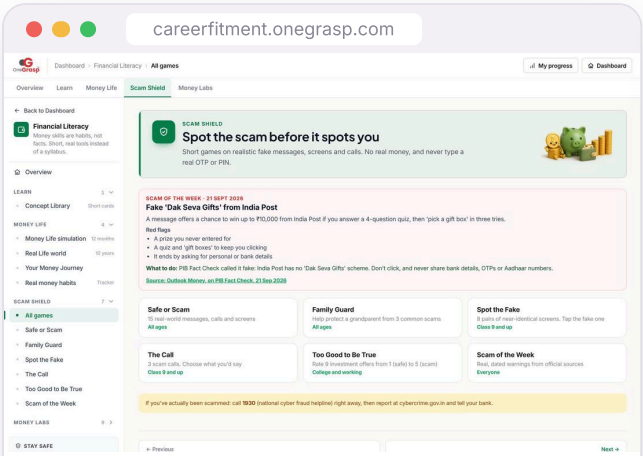
Goal Planner
How much to save each month.

Rent vs Buy
Which makes sense, when.

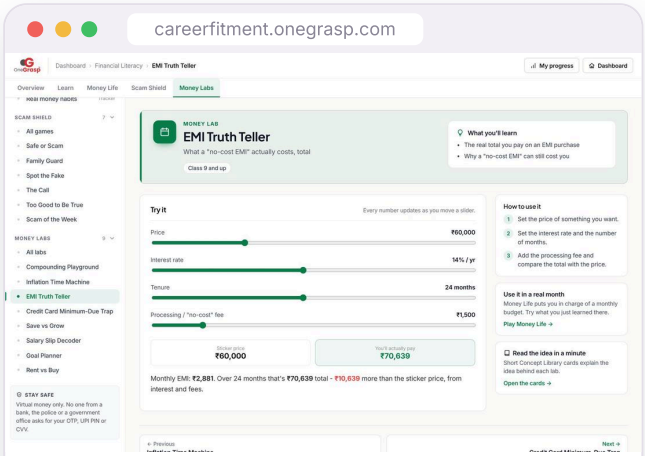
FIND IT Dashboard menu › Financial Literacy

Spot a scam before it costs you.

Real, recent scams and quick games that train you to spot fakes, plus calculators that show what money decisions really cost.



Scam Shield: a real scam each week, with its red flags.



EMI Truth Teller: move a slider, watch the interest add up.

Six Scam Shield games

- Spot the Fake: messages and links
- Safe or Scam: swipe through real requests
- Too Good to Be True: deals and offers
- The Call: bank-security and "digital arrest" calls
- Scam of the Week
- Family Guard: protect parents and grandparents

Four rules to remember

- **Think before you click.** Don't rush.
- **Check** with the official source.
- **Never share** your OTP, PIN or passwords.
- **Report** fraud on **1930** or cybercrime.gov.in.

EXAMPLE

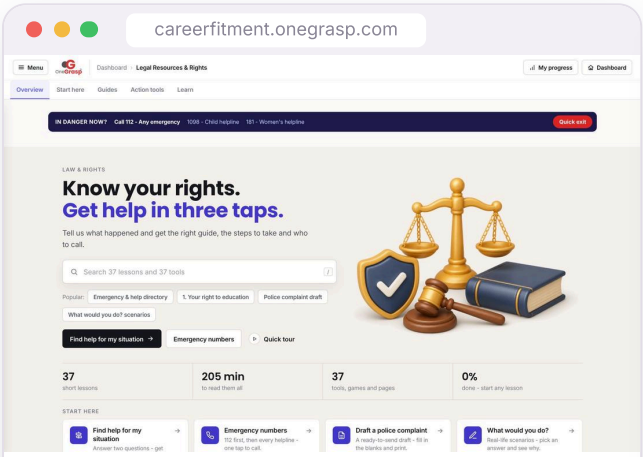
"Your bank account is blocked. Click bit.ly/... to verify." Three red flags: urgency, a short link, and a request to act outside the official app. Scam Shield teaches you to spot all three in seconds.

LIFE SKILLS · LAW & RIGHTS

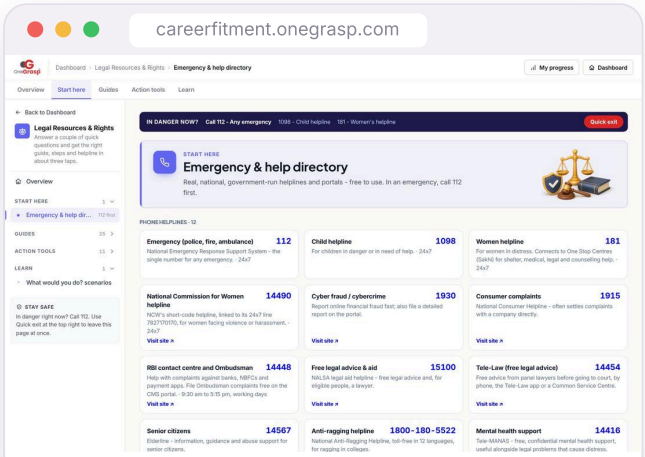
Know your rights. Get help in three taps.

Answer two quick questions and get the right guide, the steps to take and the helpline to call.

24 guides **37** lessons **112** always first



Start with what happened.



Emergency and help directory: 112 first.

Helplines to save in your phone

112 Emergency	**1098** Child helpline	**181** Women helpline	**1930** Cyber fraud	**1915** Consumer	**14490** NCW
14448 RBI	**15100** Free legal aid	**14454** Tele-Law	**14416** Mental health (Tele-MANAS)	**14567** Senior citizens	**1800-180-5522** Anti-ragging

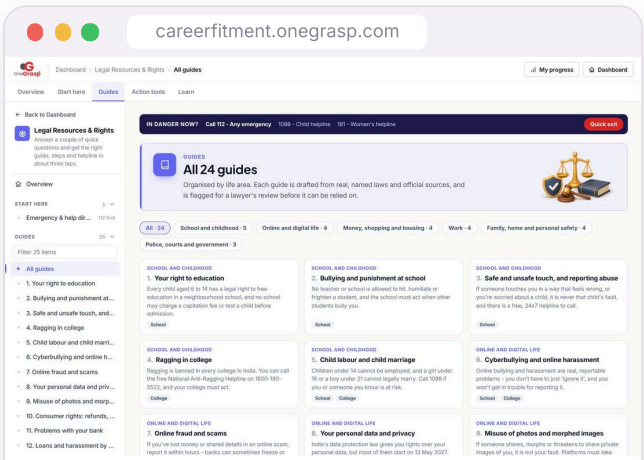
WATCH OUT

In an emergency, call **112** first. The guides explain your rights in simple words; they do not replace a lawyer. A quick-exit button hides the page on shared devices.

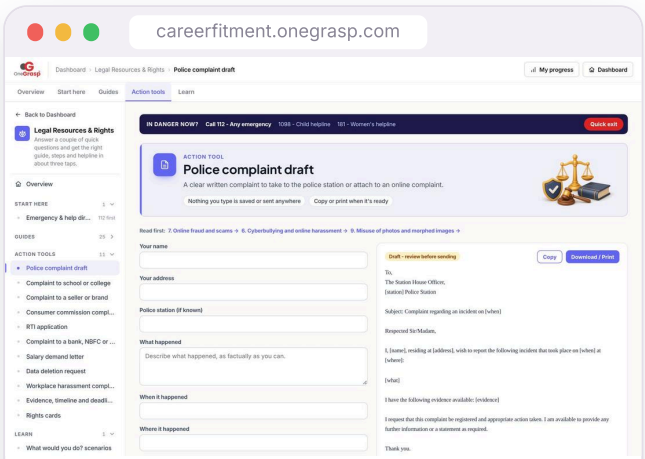
LIFE SKILLS · LAW & RIGHTS

Guides, letters and rights cards.

Plain-word guides for real problems, ready-to-send letters, and cards to keep on your phone.



All 24 guides, by situation.



Police complaint draft: fill in the blanks and print.

The 24 guides

- Right to education
- Bullying at school
- Safe and unsafe touch
- Ragging in college
- Child labour and marriage
- Cyberbullying
- Online fraud
- Data and privacy
- Morphed images
- Consumer rights
- Bank problems
- Loan recovery harassment
- Renting a home
- Your first job
- Harassment at work
- Unpaid salary
- Internships and gig work
- Domestic violence
- Public safety
- Senior citizens
- Disability rights
- Police, FIR and arrest
- RTI
- Free legal aid and courts

Action tools

Police complaint and RTI drafts, an evidence log with legal deadlines, and rights cards for your phone.

Learn by scenarios

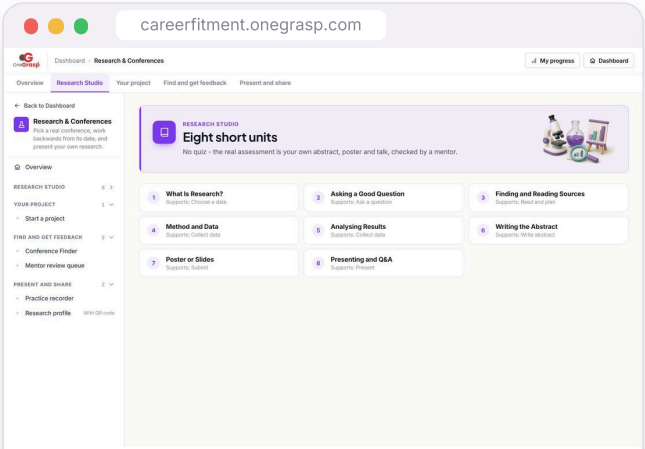
“What would you do?” real-life situations: pick an answer and see why.

BUILD AND PROVE · RESEARCH

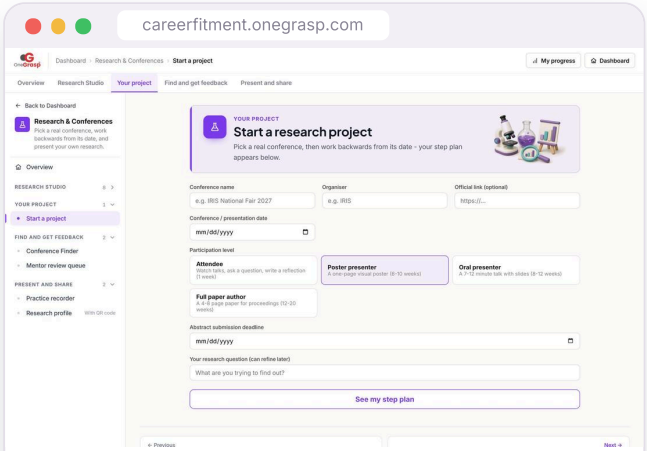
From a good question to your first conference talk.

Learn how research works, plan a project around a real conference, and practise presenting it.

8 studio units · 14 lessons · 13 tools · 5 levels



Research Studio: eight short units.



Start a project: plan backwards from a real conference date.

The 8 studio units

01 What Is Research?
02 Asking a Good Question
03 Finding and Reading Sources
04 Method and Data
05 Analysing Results
06 Writing the Abstract
07 Poster or Slides
08 Presenting and Q&A

Tools

- Conference finder: student conferences in India and worldwide
- Mentor check: 7 items scored 1–4 before an abstract goes forward
- Practice recorder: 3- or 10-minute takes; stays on your device
- Research profile: a public page with a QR code

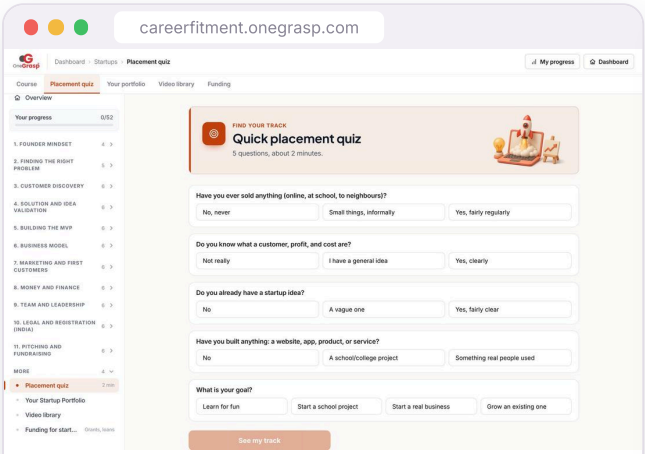
FIND IT Dashboard home › Career Toolkit › Research

BUILD AND PROVE · STARTUPS

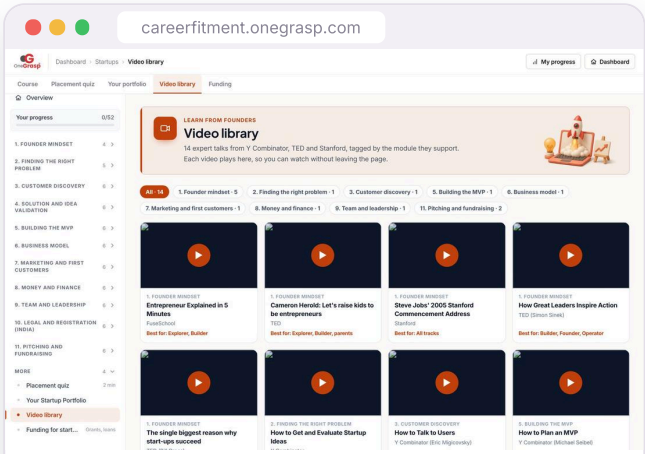
Build a startup, lesson by lesson.

Watch, read, try each idea on your own project and take the quiz. You finish with a startup idea you've shaped yourself.

11 modules **52** video lessons **311** funding programmes



The 2-minute placement quiz.



Video library: talks from founders.

The 11 modules

01 Founder Mindset
02 Finding the Right Problem
03 Customer Discovery
04 Solution and Idea Validation
05 Building the MVP
06 Business Model
07 Marketing and First Customers
08 Money and Finance
09 Team and Leadership
10 Legal and Registration (India)
11 Pitching and Fundraising

How it works

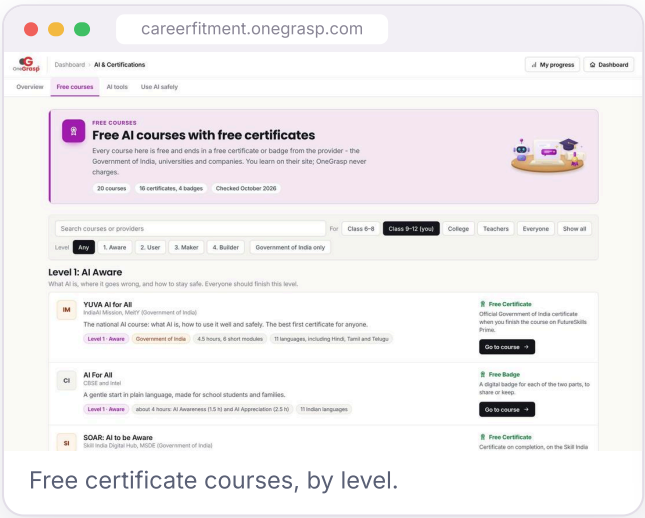
- Each lesson: a short video, a short read and a task on your own idea
- Pass a lesson's quiz to unlock the next
- Each module ends with a short test
- Every mission becomes a page of your Startup Portfolio
- Funding: all 311 programmes are listed in Part 6

BUILD AND PROVE · AI & CERTIFICATIONS

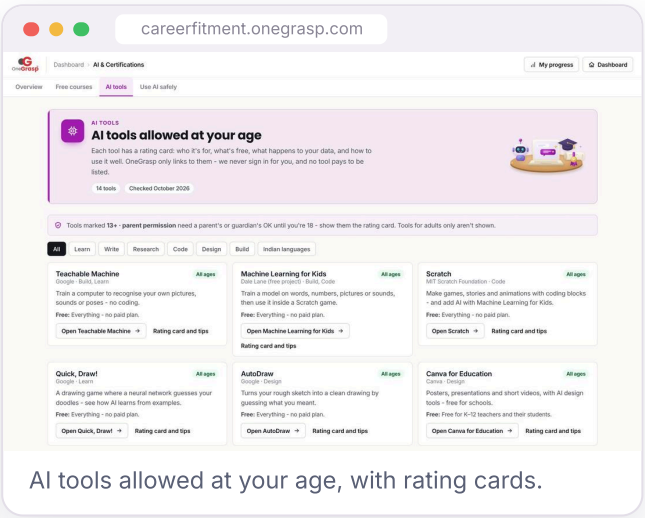
Learn AI for free, get certified.

Free AI courses that end in a real certificate, and AI tools rated for safety and age, picked for your class.

4 levels · **Free** certificates · **Age-rated** AI tools



Free certificate courses, by level.



AI tools allowed at your age, with rating cards.

Four levels

AI Aware	What AI is, where it goes wrong, staying safe. Everyone starts here.
AI User	Using AI tools well for study and work.
AI Maker	Making things with AI: no-code and Python.
AI Builder	Machine learning and building with AI APIs.

Courses and tools include

YUVA AI for All (Government of India) · Elements of AI · Google's Intro to Generative AI · AI Fluency · Kaggle Python, ML and Deep Learning · Harvard CS50 AI · IBM ML with Python · Hugging Face AI Agents · Building with the Claude API · Teachable Machine · Scratch · Bhashini · Google Colab

WATCH OUT

Use AI to think better, not to stop thinking. Read “Use AI safely”: five rules, schoolwork honesty, deepfakes and scams.

BUILD AND PROVE · COMMUNICATION LAB

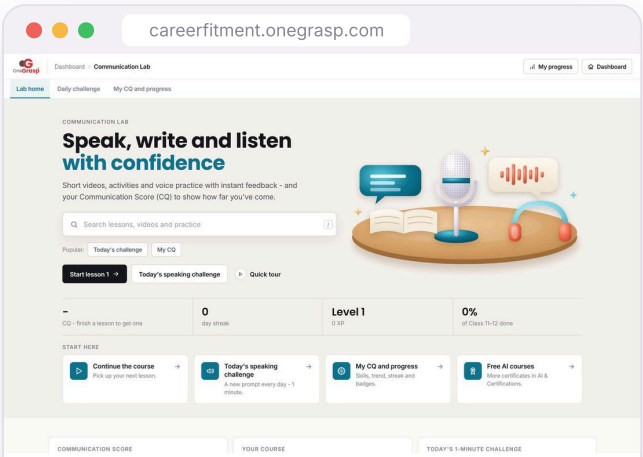
Speak, write and listen with confidence.

Short videos, activities and voice practice with instant feedback, and your Communication Score (CQ) to show how far you've come.

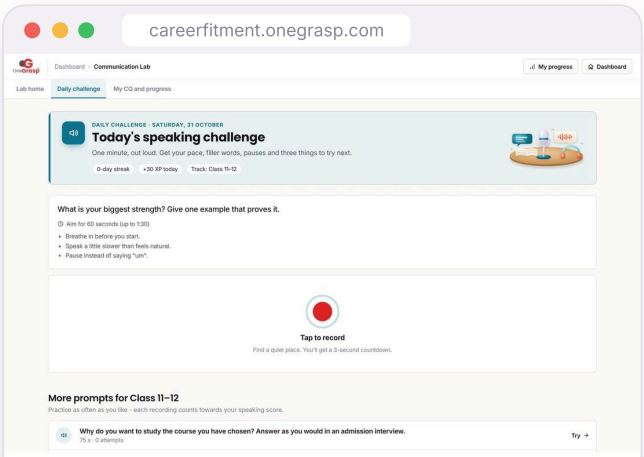
4 tracks by class

1 min daily challenge

CQ your score



A course for your class, module by module.



Today's speaking challenge: one minute, out loud.

A track for your class

Class 6–8, 9–10, 11–12 or college. Modules open week by week: introductions, words that work, professional communication, pitch-ready and more.

Practise out loud

Record yourself; get feedback in seconds on pace, filler words and pauses, plus three things to try next.

Your CQ

Speaking, writing, listening and reading roll into one score, with streaks, XP and badges.

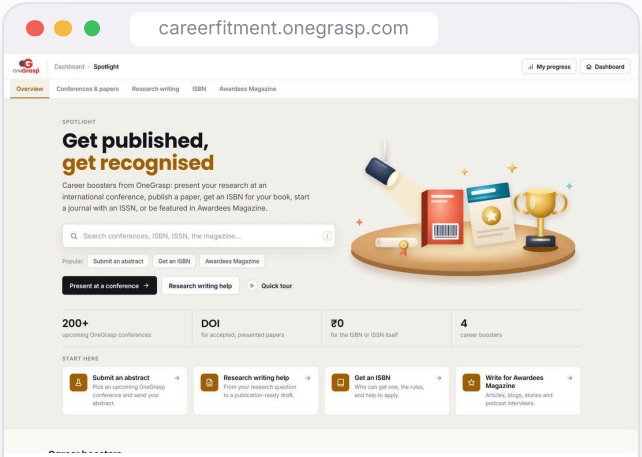
YOUR TASK

Do the 1-minute speaking challenge five days in a row. Watch your filler words drop.

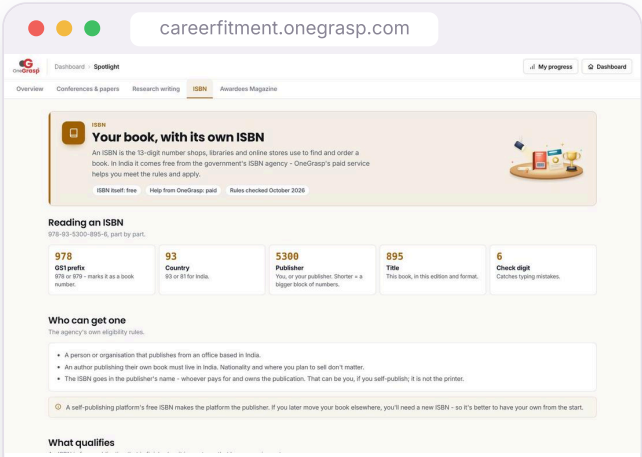
BUILD AND PROVE · SPOTLIGHT

Get published, get recognised.

Career boosters from OneGrasp: present research at an international conference, publish a paper, get an ISBN for your book, start a journal with an ISSN, or be featured in Awardees Magazine.



Spotlight home: five career boosters.



Your book, with its own ISBN: the rules in plain words.

Submit an abstract

To an upcoming OneGrasp international conference (Part 7).

Writing help

From research question to publication-ready draft.

Get an ISBN

Who can get one, the rules, and help to apply.

Start a journal

What a journal needs before an ISSN.

Awardees Magazine

Articles, stories and podcast interviews.

GOOD TO KNOW

Spotlight services are paid, but asking is free. Send a request and the OneGrasp team replies with the fee and next steps. Nothing is charged in the dashboard.

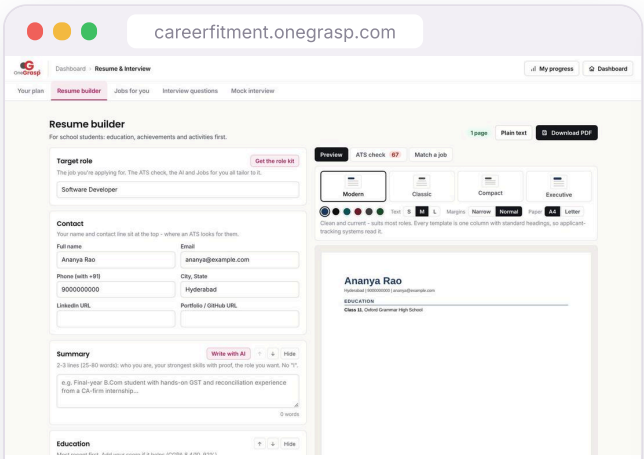
CREATE · RESUME & INTERVIEW

From your resume to your first offer.

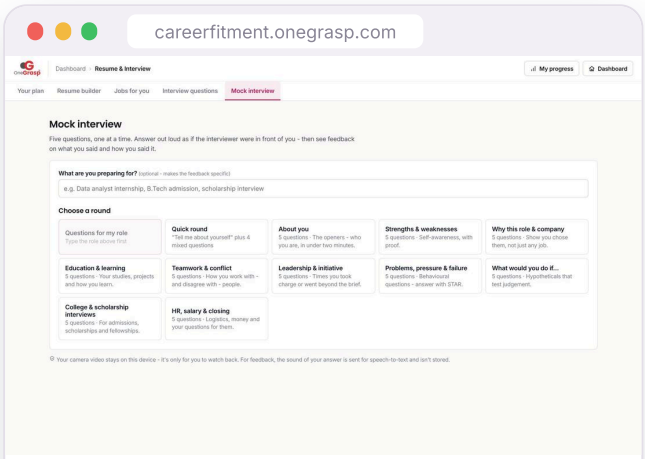
Build an ATS-friendly resume with AI help for your role, apply to jobs that fit with a tailored cover letter, and practise interviews out loud.

6 steps to an offer

100 interview questions



Resume builder: role kit, AI help, live preview, PDF.



Mock interview: answer out loud, get feedback.

STEP 1
Target role
Your plan starts here.

STEP 2
Build resume
AI bullets from your words; ATS check.

STEP 3
Jobs that fit
Live jobs with a fit score.

STEP 4
Cover letter
Tailored in one click.

STEP 5
Practise
100 questions + mock interviews.

STEP 6
Get the offer
Track to the finish.

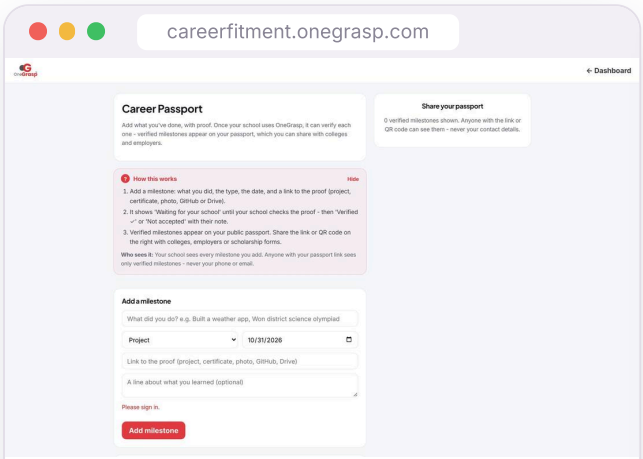
IN SIMPLE WORDS

An **ATS** (Applicant Tracking System) is software companies use to screen resumes before a human reads them. The builder checks your resume the same way.

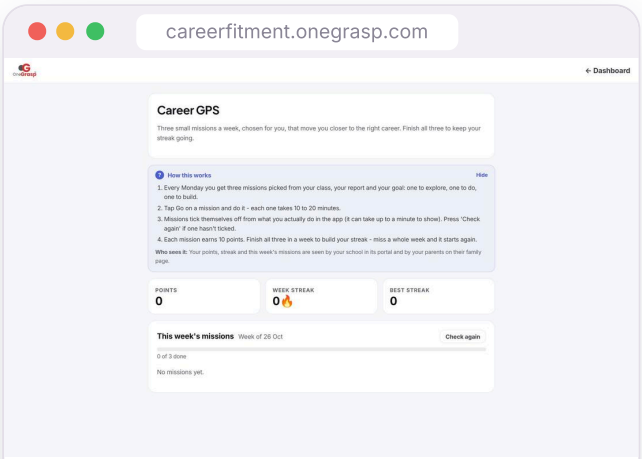
CREATE AND TRACK

Your website, your passport, your weekly GPS.

Three tools that turn what you do into proof you can share.



Career Passport: achievements with proof, verified by your school.



Career GPS: three missions every week.

Build your website

A professional portfolio page, built tab by tab: summary, experience, education, certifications, skills. Private until you share the link.

Career Passport

Add projects, certificates and wins with proof. Your school verifies them. Share one QR-checkable record.

Career GPS

Every Monday: explore a career, try a small task, build something. 10–20 minutes each, +10 points per mission. Do all three to keep your streak.

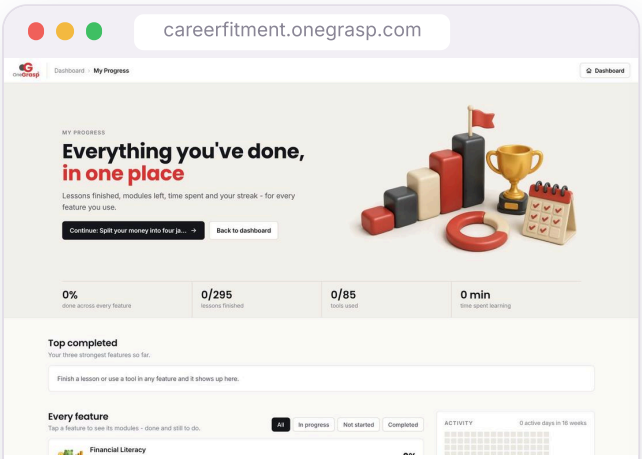
GOOD TO KNOW

Add only what's true and what you can show proof for. A short, honest profile beats a long one.

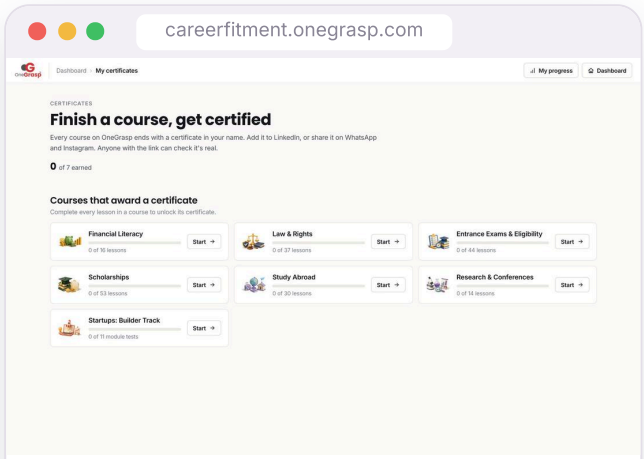
TRACK

Everything you've done, in one place.

Lessons finished, modules left, time spent and your streak, for every feature you use. Plus certificates you can share.



My Progress: lessons, time, streak, and one tap to continue.



Certificates: finish a course, get one with your name.

What My Progress shows

- Lessons done and still to do, per feature
- Your day streak and activity calendar
- Time spent on each feature
- One tap to continue where you stopped

How to earn a certificate

- Finish every lesson of a OneGrasp course
- It carries your name, class and course
- Share it on LinkedIn or with family
- Each one has an ID anyone can verify

FOR TEACHERS

If students joined through your school, the Institution Portal shows this progress too, so help arrives at the right time, without seeing their answers.

YOUR TASKS

Ten weeks to use the whole dashboard.

Complete these in order and you'll have used every major tool within one school term.

Week	Tool	Task to complete	How you know it's done
1	Your results	Read Your profile and all 8 Dimensions	You can explain your type and code
1	My plan	Tick the three “next 30 days” items	The plan ring moves
2	Career Library	Read 5 careers in your top field; open one roadmap	Saved in your history
2	Test-Drive	Live a day in your top career	You get a day summary
3	Entrance Exams	Fill your profile; follow 2 exams; make a plan	Deadlines appear in My exams
3	Scholarships	Add 3 to My applications	Calendar shows deadlines
4	Financial Literacy	Finish Level 1; play Money Life once	Level 2 unlocks
4	Scam Shield	Play Safe or Scam and Spot the Fake	Your score is saved
5	Law & Rights	Answer “what happened?” once; save rights cards	Lessons read in Progress
5	AI & Certifications	Finish AI Aware; start one free course	Certificate or badge
6	Communication Lab	Do 5 daily speaking challenges	Your CQ and streak appear
7	Internships	Start one free programme at your level	Provider certificate
8	Research / Startups	Finish studio unit 1 or startup module 1	Quiz passed; next unlocks
9	Resume & Portfolio	Build your resume; publish your website	PDF downloaded; link copied
10	Career Passport	Add 2 achievements with proof	School verifies them
Every week	Career GPS	Complete all three missions	Streak and +30 points

IN SIMPLE WORDS

Every lesson works the same way: **open → watch or read → do the activity → pass the quiz**. The next lesson unlocks. Finish a course to unlock its certificate.

Where do I find ...?

Keep this page next to your screen. Every path starts from the left menu of the dashboard.

I want to...	Go to
Reopen or download my report	Home › Open my full report › Download

OneGrasp™

CAREER FITMENT HANDBOOK

06

PART 06

Startups & Funding

OneGrasp's startup programmes, and every grant, loan, subsidy, equity and credit-guarantee programme in the dashboard's Funding directory: 311 of them.

IN THIS PART

01 Spot, Build, Pitch

02 How to use the Funding directory

03 Central government programmes

04 Banks and SIDBI

05 Incubators and funds

06 State government programmes

ENTREPRENEURSHIP

Entrepreneurship is best learned by doing.

Most students meet entrepreneurship as a chapter, a guest lecture or a case study. OneGrasp's startup programmes give them a real occasion to take one problem, build a first answer and defend it in front of people who ask hard questions.

01

SPOT

Observe, investigate and define a real problem.

02

BUILD

Develop a prototype or a structured business solution.

03

PITCH

Present the idea, answer questions and plan the next steps.

From problem to pitch: what students actually do

STEP 1
Meet a real-world problem
Chosen by the team.

STEP 2
Find out who lives with it
Talk to real users.

STEP 3
Build and test a first solution
Something people can handle.

STEP 4
Shape a business model
Who pays, and why.

STEP 5
Present it
Answer hard questions.

In the lecture hall

Learning about business: a chapter on business models, a guest lecture, a case study.

In the OneGrasp programme

Building and testing an idea: a real problem chosen by the team, a first solution people can handle, a panel that asks hard questions.

EXAMPLE

A team of second-year students notices that small vegetable vendors throw away unsold stock every evening. They interview 20 vendors (Spot), build a simple WhatsApp ordering prototype (Build), and present the numbers to a panel (Pitch). Then they check the Funding directory for an idea-stage grant.

For universities: OneGrasp designs the cohort with the institution and delivers it on campus. Talk to us at support@onegrasp.com.

FUNDING DIRECTORY

Money to start your startup.

The dashboard's Funding directory lists every grant, loan, subsidy, equity and credit-guarantee programme for Indian startups from CapEasy's scheme directory (CapEasy is OneGrasp's own company). The next nine pages list all 311, as of 2026-10-29.

311
programmes

₹2,936 cr
on offer in total

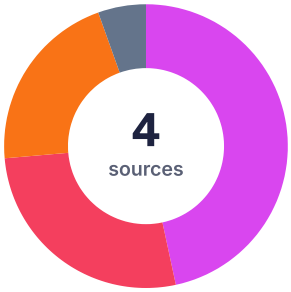
121
for idea / prototype stage

60
one-click applications

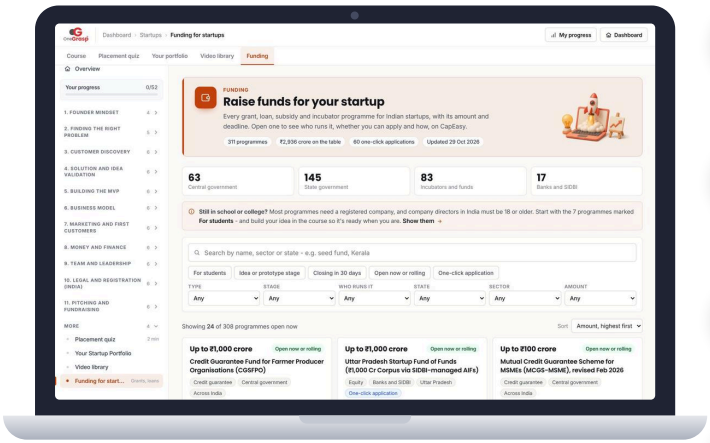
What kind of money?

Grant	174
Subsidy	73
Loan	48
Equity	12
Guarantee	4

Who runs them?



State government	145
Incubators and funds	84
Central government	65
Banks and SIDBI	17



Startups › Funding: filter by stage, amount, type, state and sector.

1. **Filter for students**
   Tick “For students” or pick Idea, Proof of concept or Prototype.
2. **Pick your state and sector**
   State schemes only fund startups registered in that state.
3. **Open the programme**
   Each opens its CapEasy page: details, eligibility, how to apply.
4. **Check the deadline**
   “Open now or rolling”, or a date. Plan back from it.

Reading the listing

Grant · Subsidy · Loan · Equity · Guarantee

Grant: money you don't repay · **Subsidy:** part of a cost paid back to you · **Loan:** repaid, often at low interest · **Equity:** investment for a share · **Guarantee:** cover that helps you get a loan

WATCH OUT

Never pay an agent to “guarantee” a government grant. Real schemes apply directly or through registered incubators.

OneGrasp™

CAREER FITMENT HANDBOOK

07

PART 07

Research & Conferences

From a student's first research question to an international stage: OneGrasp's peer-reviewed conferences and the scientific committee behind them.

IN THIS PART

01 International scientific conferences

02 The researcher journey

03 The OneGrasp Scientific Committee

04 Keynotes, awards and the conference day

CONFERENCES

Where global research gets presented.

Present. Publish. Get recognised. Two-evening online conferences across 11 disciplines, with a DOI for every accepted abstract, CPD-accredited certificates and a 50-member international scientific committee.

500+	70+	10,000+	190M+	10+
conferences held online	countries	researchers reached	Crossref metadata records	indexing directories

11 disciplines, one global calendar

- **Business & Economics** — FinTech, digital payments
- **Engineering & Technology** — Green energy, sustainable manufacturing
- **Sports & Physical Education** — Performance, exercise physiology
- **Agriculture & Food Sciences** — Precision farming, crop biotech
- **Interdisciplinary & Emerging** — Quantum, nanotechnology, materials
- **Social Sciences & Humanities** — Psychology, behaviour, mental health
- **Education** — EdTech, curriculum, hybrid learning
- **Physical & Life Sciences** — Climate, conservation, marine biology
- **Health & Medical Sciences** — AI in medicine, imaging
- **Mathematics & Data Science** — Deep learning, statistics, big data
- **Arts, Culture & Communication** — Digital media, heritage, film

The OneGrasp conference model

Format	Live online, two evenings
Review	Committee peer review
Publication	DOI via Crossref, prefix 10.65838
Accreditation	CPD via PACE Council
Recognition	Three awards per event

Who presents

Faculty and professors · PhD scholars · Postgraduate students · Industry professionals · Policy makers · School and college students

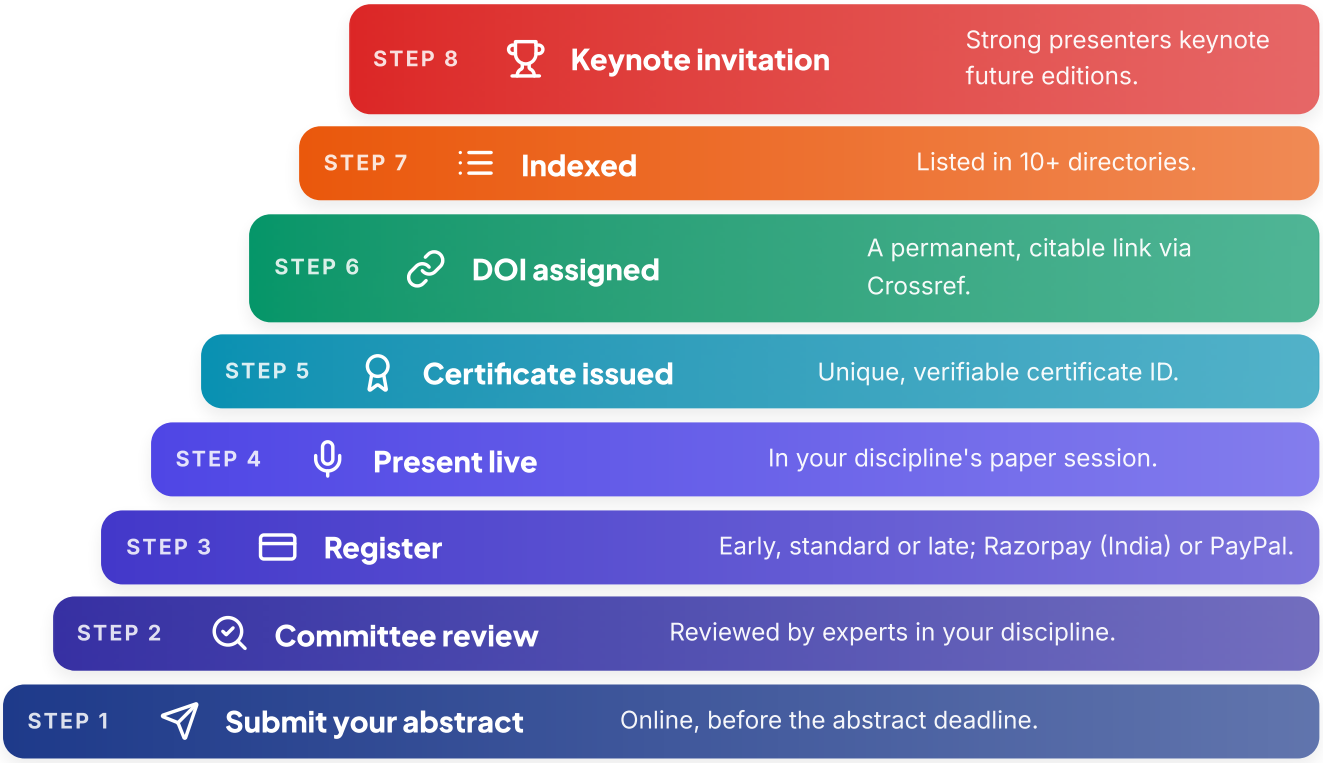
Calendar and call for papers: **onegrasp.com/events**. In the dashboard: Spotlight › Submit an abstract.

Member of Crossref · doi 10.65838 · PACE Council · Journal Citation Index · metaSpectra

CONFERENCES

From research paper to global recognition.

A clear eight-step path takes every presenter from first submission to a published, indexed and certified contribution, and for the best, a future keynote.



What every presenter takes home

Certificate with unique ID
Verifiable by its certificate ID.

A DOI for your abstract
Prefix 10.65838, resolvable at doi.org.

CPD credit
Accredited through PACE Council.

Zero travel, zero visa
Join from your campus or home.

How students get there from the dashboard

STEP 1
Research Studio
Eight units teach the method.

STEP 2
Start a project
Plan back from a conference date.

STEP 3
Mentor check
7 items scored 1–4.

STEP 4
Spotlight
Submit your abstract.

SCIENTIFIC COMMITTEE

The OneGrasp Scientific Committee.

A 50-member committee of professors, researchers and industry experts reviews abstracts, chairs sessions and delivers keynotes across 11 disciplines. Featured here: 39 members from 15 countries.

Dr Santosh Kumar Mishra SNDT Women's University India	**Dr Sudarshan Rao K** SMVITM Bantakal India	**Dr Farid Khallouki** Moulay Ismail University Morocco
Dr Fatiha Hakimi Hassan II Institute (IAV) Morocco	**Dr Rahmatullah Pashtoon** Kandahar University Afghanistan	**Dr Bishnu Pada Bose** Invosystems Singapore
Dr Rudrarup Gupta Business & Economics India	**Dr Rohan Singh** Chandigarh University India	**Dr Pradip Das** Jagannath Kishore College India
Dr Nalanda Roy Georgia Southern University USA	**Dr Ganesh Adhikari** Nepal Engineering College Nepal	**Dr Jamiu Adetola Odugbesan** Royal Docks School of Business United Kingdom
Dr Nazrul Islam Independent University Bangladesh	**Dr Maatouk Khoukhi** UAE University UAE	**Dr Tareq Nael Hashem** Business & Economics
Dr G. Vikram Karunya Institute India	**Dr Subhash Desai** Sabarmati University India	**Dr Maria Cecilia Colautti** UNPSJB Argentina
Dr Ahmed M. Saqr TH Köln Germany	**Dr Chintan Patel** CVM University India	**Dr Hadi Erfani** Islamic Azad University Iran
Dr S. Satish Hindustan Institute (HITS) India	**Dr Subhash Ghimre** Kathmandu University Nepal	**Dr Nilesh Charankar** Industry researcher USA
Dr Sai Suman Singamsetty Centurion University India	**Dr Srikanth V** Acharya Bangalore B School India	**Dr Sanjay G. Patel** Nirma University India
Dr Vijay Anant Athavale Walchand Institute of Tech. India	**Dr Maha Fawzy Anber** El Shorouk Academy Egypt	**Prof D.K. Chaturvedi** Dayalbagh Educational Inst. India
Dr Praneetha Kotla Northern Illinois University USA	**Dr Bright Keswani** Poornima University India	**Dr David Wortley** ISDM · IORMA United Kingdom
Dr Manjunath G N Sri Siddhartha Medical College India	**Prof Heba Afify** Cairo University Egypt	**Dr Ju Lee Kim** RedGene Republic of Korea
Dr C. Bindu Ashwini RV College of Engineering India	**Dr Luisa Maria Arvide Cambra** University of Almería Spain	**Dr Jahanavee** Uka Tarsadia University India

15 countries: India · USA · UK · Germany · Spain · Argentina · Singapore · Korea · UAE · Egypt · Morocco · Iran · Afghanistan · Nepal · Bangladesh

CONFERENCES

Keynotes from leading experts.

Committee members and invited experts open each day with keynotes that bridge research and practice.

Dr Manjunath G N
Professor & Head, Pharmacology, Sri Siddhartha Medical College, India

Mental health & psychological stress in athletes · Brain–computer interfaces

Dr Bishnu Pada Bose
Professor, Partner & Advisor, Invosystems, Singapore

Outcome-based vs traditional education · Greenhouse gases & global warming

Dr Ju Lee Kim
Senior Researcher, R&D Center, RedGene, Republic of Korea

Organoids and gene circuits in stem-cell research

Two evenings, one clear format (IST)

Day 1	
6:00	Inaugural ceremony & welcome
6:30	Keynote I
7:15	Keynote II
8:00	Networking & Q&A
8:15	Paper session I
9:00	Paper session II
9:45	Panel & open Q&A

Day 2	
6:00	Welcome & Day 1 recap
6:30	Keynote III
7:15	Keynote IV
8:00	Open networking
8:15	Paper sessions III & IV
9:00	Award ceremony
9:45	Valedictory & certificates

Awards at every conference

Best Paper Award
For the strongest paper in each discipline.

Young Researcher Award
Recognising early-career excellence.

Outstanding Presenter
For clarity and impact on stage.

TRY THIS

Students: start with the **Research Studio** this term, aim for a student conference next term, and a OneGrasp international conference after that.

OneGrasp™

CAREER FITMENT HANDBOOK

08

PART 08

Parents & Schools

How families and institutions can support students with care, and what everyone gains.

IN THIS PART

01 For parents: guide, not decide

02 Ten questions to talk through

03 For schools: the Institution Portal

04 What everyone gains

05 Questions people often ask

FOR PARENTS

Guide, not decide.

Your child's report is a map of who they are today. Your role is to help them read it, test it in real life, and make their own choice, with your support.

> *A child who chooses a path that fits them works harder, stays longer and recovers faster from setbacks than one who was told what to do.*

FOR PARENTS

Your experience is valuable. Use the report as a **neutral third voice** at the table, so the conversation is about facts, not who wins.

Do

- ✓ Read the report together, slowly, the first time
- ✓ Start with strengths. Say them out loud.
- ✓ Ask what surprised them, and what felt true
- ✓ Help them try things: a visit, a course, a conversation with someone in the field
- ✓ Check facts together: fees, exams, deadlines
- ✓ Use the Decision Room to compare two paths calmly
- ✓ Revisit the report every 6–12 months

Avoid

- ✗ Choosing for them because of marks, relatives or neighbours
- ✗ Treating a lower score as a failure
- ✗ Comparing with siblings or friends
- ✗ Pushing a stream or exam they have no interest in
- ✗ Paying anyone who promises a guaranteed admission, job or scholarship
- ✗ Ending the talk with “because I said so”

What you can see

The full report
Your child can share the PDF or open it with you.

Weekly progress
Career GPS shows the week's missions.

A parents' page
Every report ends with “Supporting your child”.

FOR PARENTS

Ten questions to talk through together.

Use one or two questions per conversation, over a meal or a walk. Listen more than you speak.

01 Which part of the report sounds most like you?

02 Which part surprised you, and why?

03 What are your top two strengths? Where did you use them recently?

04 Which of your top fields would you like to try first, and how?

05 What would a normal working day look like? (Try the Test-Drive together.)

06 Which subjects or exams does that path need? Are you ready to work for them?

07 What does it cost, and which scholarships could help?

08 What's our backup plan if the first choice doesn't work out?

09 Who could you talk to who already does this work?

10 What's one small thing you'll do this week?

FOR PARENTS

For Class 6–8, keep it light: ask what they enjoyed in the test and which careers sounded fun. The goal is curiosity, not a decision.

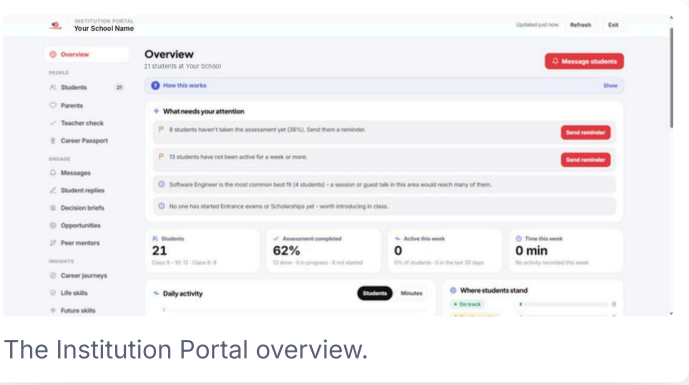
TRY THIS

Write your child's answers to questions 4 and 10 on page 2 of this handbook. Read them again in three months.

FOR SCHOOLS AND COLLEGES

See every student. Nudge the ones who need it.

The Institution Portal shows a school or college its own students every day: who has taken the assessment, who is active, and who needs a reminder.



The Institution Portal overview.

1. **Daily tracking**
   Assessment status, activity and time spent for every student.
2. **One-click reminders**
   Nudge students who haven't started or have gone quiet.
3. **Messages**
   Send updates and learning nudges; students can reply.
4. **Decision briefs**
   Short summaries that support career conversations.

Opportunities
Share useful opportunities with students.

Insights
Career journeys, life skills and future skills at a glance.

School report
A whole-school view of results and progress.

Parents & mentors
Coordinate parents, mentors and counselling.

Observations
Teachers record what they notice.

Career Passport
Verify students' achievements with proof.

Privacy: Schools only ever see their own students, never a student's individual answers. A trust flag shows if a test looks rushed, so it can be retaken.

BENEFITS

What everyone gains.

Students

- Know yourself: type, interests, strengths
- Careers that fit, with real facts
- A plan: subjects, exams, degree, college
- Money: scholarships and funding
- Skills school doesn't teach
- Proof: certificates, portfolio, passport
- Confidence to choose, and to change

Parents

- A calm conversation based on evidence
- Practical questions to support better
- Visibility of weekly progress
- Honest cost checks before big spends
- Protection from scams and false promises
- A report to revisit as your child grows

Schools and colleges

- A structured guidance programme on campus
- Daily tracking and one-click reminders
- Decision briefs for counsellors
- Life and future skills for every student
- Privacy built in
- Better-prepared students for admissions and placements

Built for the world of work that's coming

What employers want (WEF 2025)	Where OneGrasp builds it
Analytical thinking	Aptitude practice, mock tests, research projects, Money Labs
Resilience, flexibility, agility	Career GPS streaks, exam wellbeing, startup missions
Leadership and social influence	Communication Lab, startup pitching, research talks
Creative thinking	Startup Builder, research questions, portfolio projects
Motivation and self-awareness	Your report, My plan, My Progress
AI and big data	AI & Certifications: AI Aware to AI Builder

FAQ

Questions people often ask.

How long does the test take?
Up to 90 minutes. Answers save as you go, and you can stop and resume.

Can I fail?
No. Only the Aptitude section has right answers, and the report is never pass or fail.

Can I retake it?
Yes. Many students retake it as they move up a stage (Class 8, then 10, then 12).

Who sees my answers?
Only you. Schools see progress and activity, never answers.

Is the report accurate?
It reflects your honest answers through established frameworks. A trust check flags rushed tests.

My result doesn't match my dream career.
A gap is a plan to build, not a no. Use the Career Selector, Test-Drive and My plan.

Can I use a phone?
Yes: phone, tablet or laptop. A laptop is easiest for the test.

Are the salaries real?
They're indicative ranges for India, for planning. Actual pay varies.

Are exams and scholarships current?
They link to official sources. Always confirm dates and eligibility there.

Do the tools cost extra?
Dashboard tools are included. Spotlight services are paid; asking is free.

I lost my password.
Tap “Forgot password” on the sign-in page for a reset link.

How do I get help?
Email support@onegrasp.com or call +91 89777 60442 / 43.

Glossary

Aptitude	How quickly you learn a field's skills.
Career domain	A broad family of careers.
CQ	Your Communication Score.
Fit %	How closely you match what a field rewards.
MBTI-style type	A four-letter personality type, e.g. ISFJ.
ROI	How long a cost takes to pay back.
Stream	MPC, BiPC, MEC, CEC, HEC after Class 10.

ATS	Software that screens resumes.
CPD	Continuing professional development credit.
DOI	A permanent link to published work.
ISBN / ISSN	Official numbers for a book / journal.
RIASEC	Holland's six interest themes.
SOP / LOR	Statement of purpose / letter of recommendation.
WEF	World Economic Forum.
